

Trustees Approve Plan For New Parking Area

The Board of Trustees has approved a plan for a new parking area between Electrical Engineering Building and General Extension Building which will accommodate 92 automobiles.

Walter W. Trainer, head of the division of landscape construction and maintenance, said that the new area is scheduled to be completed for the fall semester.

Funeral Set For Victim Of Accident

Funeral services will be held at 1 p.m. tomorrow in New Kensington for James R. Moore, sophomore in the division of intermediate registration, who died Monday morning following an automobile accident.

The services will be conducted in the Mt. Calvary Baptist Church by the Rev. Emanuel Barrett. Burial will be in Union Cemetery, New Kensington.

Fatal Head Injuries
Moore died in Centre County Hospital from head injuries received Sunday night when his automobile failed to negotiate a curve at Weaver's railroad crossing on Route 220 west of Milesburg.

James Robinson, ninth semester student in arts and letters from Pittsburgh, who was a passenger in the automobile, is still a patient in the hospital. Hospital officials yesterday said Robinson's condition is good and that he is "up and around." He sustained lacerations of the forehead and lips.

Return from Picnic
The two students were returning from a picnic at Sycamore Camp, near Wingate, Sunday night when their car went out of control at the crossing and struck a railroad relay box.
Moore was a member of the University track team. He lived at 127 S. Barnard St.

Barb Elected AIM Delegate

Charles Barb, freshman in architecture from Bala-Cynwyd, has been appointed representative-at-large from the West Halls Council to the Association of Independent Men Board of Governors.

The council passed an amendment at its meeting Monday night changing the procedure for amending the West Halls constitution. Formerly an amendment had to be approved in both the council and the residence units. Under the new ruling, an amendment must be passed only by a two-thirds majority of the council at two consecutive meetings.

The compulsory Sunday dress rule was also given a second vote of approval.

Forestry Convocation

J. Allan Hauter, president of the Allan Products Company of Oradell, N.J., will speak on "Markets for Wood Residues" at the forestry convocation at 11 a.m. today in 121 Sparks.

The convocation is open to the public.

Volunteers Asked For Traffic Count

Calvin G. Reen, director of the campus traffic survey, yesterday said about 12 more volunteers are needed to work on the traffic counts to be made next week.

Reen, professor of civil engineering, said the volunteers will complement members of the Sophomore Class Advisory Board and engineering students now pledged to work.

The board members and volunteers will meet at 7:30 tonight in 1 Main Engineering.

Schedule Listed
Eight are needed from 11:30 a.m. to 1:30 p.m. Monday, 2 to 8:45 to 9:15 a.m. and 2 from 11:30 to 12:15 p.m. Friday, May 17.

Others are needed at odd hours during the week, he said.

If there are not enough students to fill the hours, employees of the Department of Physical Plant will take up the slack. However, Reen said, he would rather have students do the work since it concerns them.

The students will be paid \$1.50 an hour for the work, including practice counts.

Traffic Count Automatic
Automatic traffic counters, loaned by the Department of Highways, which will operate at 14 stations during the survey, will be installed late this week, according to Reen.

The automatic counters will remain on campus during the survey week.

Pedestrian counts will be taken at 25 stations Friday, May 17, during five periods of approximately 45 minutes each. These counts will record the direction as well as the volume of pedestrian traffic.

Swim Club to Hold Elections

The Swim Club will hold elections at 6:30 p.m. tomorrow in 2 White Hall. Plans for a club picnic will also be discussed.

Ag School Approves Four Test Projects

Four experimental projects—expected to take from three to 10 years to complete—have been approved by the faculty of the College of Agriculture.

One experiment concerns the selection and management of cover crops for sour cherry orchards.

The experiment is expected to last five years and is being conducted by Dr. Frank N. Hewetson, professor of pomology. He will be advised by Carl S. Ritter, professor of pomology extension, and Dr. Donald P. Satchell, assistant professor of soil technology.

Another experiment concerns the influence of forests and forestry practices on the water production of forested watersheds in Pennsylvania.

To Last 10 Years

The experiment, which is expected to last 10 years, is being conducted by David P. Worley, assistant professor of forestry and William R. Byrnes and William E. Sopper, instructors in forestry.

Worley will be advised by Dr. Louis T. Kardos, professor of soil technology; Dr. Richard P. Nickelsen, assistant professor of geology; Edward P. Farrand, instructor in forestry extension; Charles J. Smith, associate professor of civil engineering; and Dr. Charles L. Hosler, associate professor of meteorology.

A third experiment will deal with the effect of marketing changes upon marketing costs and sales of poultry meat with special emphasis on stewing chickens.

3 Years Expected

This project is expected to last three years. Dr. Ralph L. Baker, professor of marketing, will conduct the experiment. He will be advised by A. Kermit Birth, assistant professor of agricultural economics extension; Dr. Glenn O. Bressler, and Paul H. Margolf, professor of poultry husbandry. "Development and Maintenance

The new area will replace the present parking accommodations along the row of engineering buildings facing College Ave. The lot, which contains 65 parking spaces, will be cleared to make room for a new engineering building to be constructed in the near future.

New 600-Foot Building
The new building will extend from the main gate on the Mall for approximately 600 feet west to the south end of the Mechanical Engineering Building.

In addition to removal of the old parking area, the Petroleum Research Laboratory, situated south of Main Engineering Building, will be torn down.

The new building will consist of three floors and a basement and will drop to two floors on the east end of the main gate. The 2-story wing will be connected to a new approximately 100-foot south wing of Main Engineering.

Parking Area Temporary
Trainer said the new parking area will be only temporary. He said that a hard-top surface will not be placed in the lot since another new engineering building is planned for that space in five or six years.

The new area will be composed of a 6-inch stone base which will be stabilized by a bituminous top dressing.

The entrance to the new area will be beside the present hard-top driveway north of the Mechanical Engineering Building. Several yards of hard-top paving will be constructed from the present driveway to the new area.

The exit from the area will be beside the driveway behind Mineral Science Building. This driveway is also paved.

Frosh Breaks Tie For Bus Ad Seat

Walter Lloyd, freshman in business administration from Wayne, has been elected to fill a sophomore seat on the Business Administration Student Council, breaking a tie.

The council Monday night also defeated an earlier proposal that would have allowed business club presidents with lower than 2.2 All-University average to sit on the council. All members, except incoming freshmen, are required to have a 2.2 average.

Science Fiction Film

The Science Fiction Club will present an original film by the Philadelphia Science Fiction Society at 7 tonight in 209 Hetzel Union.

of Pathogen-free Propagative Material of Ornamental Plants" is the title of another project. This project is expected to last five years. It will be conducted by Dr. James Tammen, assistant professor of plant pathology.

Dr. James W. Mastalerz, professor of floriculture; Dr. John S. Boyle, associate professor of plant pathology; and Dr. Ollie D. Burke, professor of plant pathology extension, will advise Dr. Tammen on the experiment.

Biostatistics Prof to Talk On Sampling Techniques

W. G. Cochran, professor of biostatistics in the School of Hygiene and Public Health at Johns Hopkins University, will discuss sampling techniques at 8 tonight in 119 Osmond.

The lecture is sponsored by Sigma Xi, graduate science society, and is open to the public.
