

Councilmen Can Do Everything Except Fix Parking Tickets

Activities and projects of the nine college student councils have included everything from softball games with faculty members to mixers, career programs, course and faculty evaluations and sponsoring publications.

Each of the nine colleges has its own council. Each council president holds a seat on All-University Cabinet and is a member of Inter-College Council Board, which sets the election dates for all the councils.

A summary of the achievements, projects, and organizational set-up of each council follows:

Agriculture—Council members represent the club from each of the 15 departments in the college, ranging from agronomy to zoology. Other organizations represented are the Ag Hill Breeze, the Penn State Farmer, Forester and Scientist, Grange, and the 4-H Club. The number of council members is determined by the number of students enrolled in each curriculum. Russell Beatty, senior from McKeesport, is this year's council president.

Business Administration—The council includes five freshmen, six sophomores, eight juniors, five seniors, three officers and nine other students chosen by virtue of positions held in college activities. Candidates for election must have a 2.2 All-University average and nominate themselves.

Council activities include Career Day, student-faculty mixers, and the Bus-Ad Bulletin, a monthly publication. The first council meeting will be held at 6:45 p.m. Wednesday in the Hetzel Union Building. Michael Walker, senior from York, is president.

Chemistry - Physics — Carroll McDonnell, senior from St. Rose, La., is president of the 24-member council. Representatives are chosen from certain curricula as specified in the council's constitution. Among the projects are an orientation week program, a fall banquet, the Chem-Phys Newsletter, electing a chemistry professor of the year, and maintaining a bluebook file.

Education—The first council meeting will be held at 7 p.m. Sept. 24, according to Myrna Paynter, president, senior from

Kennett Square. The constitution, which may be revised this year, provides for one council representative for each 50 education students in the sophomore, junior, and senior classes, and two freshman representatives. A 2.4 average is required for membership.

The council sponsors three coffee hours each semester, a spring open house, a \$100 scholarship, awards to outstanding seniors in education, a senior banquet and the Monitor, a news bulletin.

Engineering - Architecture—Nearly 50 members comprise this council, which meets the second and fourth Tuesday of each month in the Hetzel Union Building. A 2.0 average is required for membership. Each department in the college elects one representative from each class. Thirteen societies also have representatives on the council. Projects include the awarding of two scholarships, the Engineering Newsletter, an industrial exposition, faculty and course evaluations, and coffee hours and mixers. Robert Stroup, senior from Muncy, is president.

Home Economics—Council membership is composed of one student for every 50 students in the college and representatives of all Home Economics organizations and clubs. An average of at least 2.3 is required for membership.

The group's yearly activities include a spring weekend designed for high school students, an awards banquet, News and Views, and a student-faculty leadership program. Patricia Moran, senior from Broomall, is president.

Liberal Arts—Thirty-two students hold council seats: six freshmen, eight sophomores, eleven juniors and seven seniors. A 2.5 average is required. Robert

Nurock, senior from Elkins Park, is president. Council meetings are held on alternate Tuesdays in the HUB.

The council is a sponsor of the Lantern, literary magazine; an evaluation committee, and an intensive orientation program for freshmen.

Mineral Industries—Headed by James Stratton, senior from Philadelphia, the council includes two freshmen, four sophomores, six juniors and eight seniors. After their election the representatives serve each year until their graduation. Two new members are elected yearly from each class.

Council projects include an open house, freshman coffee hours, a council-faculty dinner, and the College Prospecter, a monthly newsletter.

Physical Education—Council-sponsored activities are mixers, coffee hours, instruction in sports, presentation of the Paul Smith Memorial Trophy, and publication of Discobolus. Charles Ruslavage, senior from Coaldale, is president.

Council membership is limited to 19, including two representatives from each class, two faculty members and representatives from several college organizations. Physical education students may nominate themselves for seats by submitting a petition signed by 15 physical education majors.

•Mark Twain is the most popular of all American authors, according to a national survey by Columbia University.

Area Planned For 92 Cars

A new parking area that will accommodate 92 cars will be constructed in the area bounded on the west by the General Extension Building, on the north by the Mineral Sciences Building, and on the east by the Electrical Engineering Building.

The area will help alleviate a shortage of parking space that will result when construction begins on the proposed engineering building along W. College Ave.

The building will be located on Parking Area number 6, south of Engineering "D" and "E" and the Thermal Laboratory. University officials said much

of area number 5, east of the Mechanical Engineering Building, will be used by the contractors for storage and other purposes while construction is in progress.
