

Dulles Ok's Missile Talks; Reds Plan Space Station

LONDON, Oct. 8 (AP)—The Soviet Union is working toward creation of a manned space station for launching space ships, a Soviet scientist told the Russian people tonight.

Prof. Yury A. Pobedonostsev described this as the ultimate aim—"the accomplishment of which is not far off"—in a Moscow radio broadcast to home service listeners.

"Apparently the first satellite will be followed by others," Pobedonostsev said, "larger in size and carrying more complex equipment and instruments to study the problems."

"The next stage will apparently be the launching of satellites carrying animals for the purpose of studying their behavior up in the orbit."

"And finally, the last stage would probably be a manned satellite."

Khrushchev Mocks 'Age of Bombers'

MOSCOW, Oct. 8 (AP)—Nikita Khrushchev today said manned warplanes are no match for Russia's intercontinental ballistic missile—"The age of bombers is over."

"They might as well put bombers and fighters in the museum," he commented, citing Soviet scientific achievements.

"Our intercontinental ballistic rocket shows that it is no good sending humanly controlled machines against missiles."

TIM Council to Meet

Town Independent Men Council will meet at 7 tonight in 203 Hetzel Union to orient new council members.

PICKPOCKETS ON CAMPUS

WASHINGTON, Oct. 8 (AP)—Secretary of State John Foster Dulles disclosed tonight after meeting with President Dwight D. Eisenhower that the United States is ready to talk with Russia about international control of space missiles.

However, Dulles held to the U.S. position that any such talks would have to be held within the United Nations.

Dulles told newsmen at the White House the United States is hopeful Russia will accept a Western proposal to study means of making sure objects sent through outer space will be used only for peaceful purposes.

In what appeared to be a major reversal of U.S. policy, Dulles offered to consider space control apart from the highly controversial questions in the West's Aug. 29 disarmament package plan.

Dulles' comments, as well as those from the State Department earlier, were in reaction to a proposal by Soviet party boss Nikita Khrushchev.

Khrushchev said in a Moscow interview that Russia was willing to bring the earth satellite and space missiles under international control as part of a general U.S.-Soviet agreement.

LITTLE ROCK, Ark., Oct. 8 (AP)—Some 50 criminal cases growing out of last month's integration disorders at Central High School were postponed today until late November.

"Stay away from the school," Municipal Judge Harry Robinson cautioned five defendants before him today. All the cases involve such charges as disturbing the peace, unlawful assembly and resisting arrest.

Robinson, an appointee of Gov. Orval Faubus, granted a delay in the five cases at the request of defense lawyers.

The Federal Bureau of Investigation, meanwhile, continued to dig into the background of the Sept. 23 riot by white adults outside Central High. There have been no federal indictments in this probe.

Announcement was made that a defense fund is being set up to "raise money for the legal defense of those who have been arrested and who may be arrested in connection with the Little Rock Central High School situation."

WASHINGTON, Oct. 8 (AP)—The Navy acknowledged today that Russia has a 1500-mile ballistic missile. But it said the United States has counter weapons.

UNITED NATIONS, N.Y., Oct. 8 (AP)—At the urging of both the United States and Russia, the United Nations agreed today to begin immediate detailed debate on disarmament.

The action was taken in the 82-nation Political Committee, where U.S. Ambassador Henry Cabot Lodge declared "we want no time lost" in discussing disarmament, "the most urgent problem of this Assembly."

Soviet Dept. Foreign Minister V. V. Kuznetsov declared: "The most important, the most urgent issue before us is by a solution of the disarmament problem."

The debate will begin Thursday.

Before the committee acted, India's V. K. Krishna Menon urged in the General Assembly that the United States, the Soviet Union and Britain express joint willingness to suspend nuclear tests as a first step toward disarmament in the new "international planetary age."
