

# Downtrodden Syracuse Hosts Booters Tomorrow

What usually happens to a coach when his team fails to win happened to Syracuse's 1955 and 1956 soccer foreman, Joe Weber. He lost his job.

Thus when the Lion soccer eleven visits Syracuse tomorrow afternoon in their third test of the season, they will face a new Orange tutor. Pete Cataldi, a 1952 graduate of Syracuse,

took over the Orange soccer reins, this fall and Orange partisans are hoping that he escapes the fate that befell Weber.

Weber lived through 18 debacles with the Big Orange booters and was not once able to enjoy the fruits of victory. He did guide Syracuse to a 1-1 tie with Union College in the late stages of the 1955 season but, outside of that, he spent most of his tenure in mourning.

In 1955 his team had an 0-8-1 record and last year they had an 0-9 mark. The Orange were skidding on a 10 game losing streak at the time of Weber's "retirement."

But the Syracuse winless streak goes back even further than Weber. The late Andy Cocari was the Orange boss when its last victory was recorded. That was a 4-2 decision over the same Union college in 1954. Since then, the Orange have lost 19 of their last 20 encounters.

Included in the 19 setbacks are

two lopsided defeats to the Lions. Coach Ken Hosterman's crew blanked the Orange 10-0 last fall and walloped them 14-1 the previous year.

Those were the 25th and 26th victories for the Nittanians in the 32-game series between the schools. Syracuse has copped only one tilt in the series, a 2-1 conquest in 1932. Five other skirmishes have ended in stalemates.

## Frosh Soccermen Open Season Today

Penn State's freshman booters open their short two-game season this afternoon against Frostburg Teachers at Beaver Field. Game time is 2:30.

Coach Dave Weiland, who replaced Dave Bishoff at the helm of the frosh, expects Vernon Bounds, goalie; Fran Monley, inside; Gene Rayford, center half; and Pete Bremanis, center forward, to be his top performers.

# Romps Highlight IM Grid Card

By BILL JAFFE

Four fraternity intramural football teams romped to victories while two other fraternities scored one-point triumphs to highlight a 12-game card of intramural action last night.

Delta Upsilon scored a lopsided 40-0 victory over Alpha Chi Rho while Phi Delta Theta racked up Kappa Delta Rho, 41-0. Alpha Sigma Phi downed Alpha Zeta, 21-0, and Phi Kappa Sigma blanked Alpha Gamma Rho, 20-0.

A four-yard pass from Gene Capriotti to Bill Sekaras gave Alpha Chi Sigma a first down with 1:45 left to play and that was enough to defeat Delta Chi, 1-0. Sigma Phi Epsilon also used a 4-2 first down advantage to top Alpha Phi Delta, 1-0.

In other action, Beta Theta Pi defeated Theta Xi, 8-0; Alpha Tau

Omega edged Phi Gamma Delta, 6-0; and Sigma Alpha Epsilon

dropped Theta Kappa Phi, 7-0.

Phi Kappa Psi tripped Beta Sigma Rho, 14-0; Triangle downed Zeta Beta Tau, 13-0; and Pollock 12 defeated the Warriors, 13-6.

Delta Upsilon was led by the brilliant passing of Cy Dubinsky and the fine play of its end corps in defeating AChiRho. Dubinsky passed for all six touchdowns, the first one being a 60-yard play.

The accurate passing of Bill Schwab and the general all-round team play of Phi Delta Theta gave the Phi Delt's a 34-0 halftime lead over KDR.

Schwab connected with Tom Hancock from two yards out for the first score and then connected with Earl Poust twice, Ron Fiegles and Bill Wallace for first half scores. Tom Burns converted three times and Paul Richardson once during the initial half.

Another outstanding passer was Alpha Sigma Phi's Dick Ferrari who completed two touchdown passes in the first half and added an insurance score in the second half to down Alpha Zeta, 21-0.

Ferrari started the initial touchdown drive by completing a 32-yard pass to Jim Norton. An 11-yard pass to Harry Brown recorded the score and Ralph Brower converted.

On the first play of a series of downs, Ferrari spotted Norton in the end zone for a touchdown from 40 yards out. Brower again converted. Ferrari passed for the final six-pointer to Brower from 35-yards out. Brower converted.

Although Alpha Tau Omega scored a touchdown in the first nine minutes of play on a long pass play from Mel Royer to Dick Bohner, ATO had its hands full downing Phi Gamma Delta, 6-0.

**SUSPENSION STORY**—Chuck Steger, M.E. '52, probing dynamic properties of new Air Spring developed by Von Polhemus (L.). A nationally recognized authority on suspension systems, Mr. Polhemus directs Structure and Suspension Development Group of GM's Engineering Staff, helps guide Chuck in his professional career.

## HOW MUCH WOULD YOU CHARGE

TO WASH THESE CLOTHES...?

TO BEAT THESE RUGS...?

TO WASH THESE DISHES...?

Electricity does it for only a few cents!

Electricity is the biggest bargain in your budget—and even more of a bargain today than it was years ago. Your electric bill may be higher, but that's because you're using so much more.

The price of electricity will stay low, too—in spite of the high cost of living.

## Because engineering is a profession at GM, we offer you a career—not a job

ONE REASON engineering standards at General Motors are so high is that GM recognizes engineering as a profession. And the men who engineer the many different products made by General Motors are respected for the profession they practice.

That is why, when you are invited to join General Motors as an engineer, you don't simply take a job—you start a career.

It is a career that is rewarding both professionally and financially—starting on your first day of association with General Motors at any one of its 35 divisions and 126 plants in 70 cities and 19 states.

During your early days at GM, for example, you work with a senior engineer who guides your career along professional lines.

You are also actively encouraged to pursue your education towards an advanced degree. For we at General Motors recognize that, in doing so, you will become more valuable to us and the engineering profession.

You are given the opportunity to obtain professional recognition through participation in engineering society forums, presentation of technical papers, winning of patents and other recognition of your accomplishments.

And you are also encouraged to take an active role in your community's affairs—because a truly professional man is a good citizen as well as a good engineer.

All this is for a reason—and a good one.

Many of the men who will fill the key positions at GM in the future are the young engineers joining GM today. This is not theory, it is fact. For 14 of our 33 Vice-Presidents are engineers, 23 of our 42 Division General Managers are engineers, too.

Today we are looking for young engineers—such as you—who may fill these positions tomorrow. The rewards—both professional and financial—are substantial. If you feel you have the ability, write us. It could be the most important letter of your life.

### June graduates!

A General Motors Representative will be on hand to answer questions about job opportunities with GM.

**October 15, 16 and 17**

- GM positions now available in these fields:
- MECHANICAL ENGINEERING • ELECTRICAL ENGINEERING
- INDUSTRIAL ENGINEERING • METALLURGICAL ENGINEERING
- AERONAUTICAL ENGINEERING • CHEMICAL ENGINEERING
- CERAMIC ENGINEERING • MATHEMATICS
- INDUSTRIAL DESIGN • PHYSICS • CHEMISTRY
