

# Tito Recognizes East Germany

BELGRADE, Yugoslavia, Oct. 15 (AP)—Yugoslavia tonight formally recognized Communist East Germany, which the Western powers have sought to keep diplomatically isolated.

There was jubilation within Premier Otto Grotewohl's regime in East Berlin, which rules 18-million Germans. The

## New Tito Policy Disturbs U.S.

WASHINGTON, Oct. 15 (AP)—The United States expressed regret today at Yugoslavia's decision to recognize Communist-ruled East Germany.

The State Department disclosed this government had objected in advance to President Josep B. Tito's action.

The American failure to persuade Tito to stick with the Western nations which have no diplomatic contact with East Germany immediately raised some question about the future of U.S. aid for Yugoslavia. It is a Communist country, but is officially considered independent of Kremlin control.

State Department press officer Lincoln White, when asked what effect the recognition move would have on the aid program, said "I have no way of forecasting."

East German government radio declared the Yugoslav move will contribute to European security and "decrease the danger of another war."

It was a reverse for West Germany, home to 52 million, and for her NATO allies. They consider pro-Western Chancellor Konrad Adenauer's government is the Germans' only legal government.

A Yugoslav Foreign Ministry announcement said President Josep B. Tito's government extended the recognition "to make possible the establishment and development of relations between the two German states." The reasoning followed closely the Moscow line for German unity.

Some Western diplomats expressed fear that Tito's move may set off a chain reaction with other nations, especially in the Middle East, following suit.

## Nixon Stresses Military Value

SAN FRANCISCO, Oct. 15 (AP)—Vice President Richard M. Nixon said tonight America's reaction to the Russian satellite should be to resolve that military strength takes priority over tax cuts.

The satellite launching may serve the cause of freedom, Nixon said, "if only we react strongly and intelligently to its implications."

"Let us resolve once and for all that the absolute necessity of maintaining our superiority in military strength must always take priority over the understandable desire to reduce our taxes," he said.

This word from the No. 2 man in the Eisenhower administration added strength to the views of many Congress members that prospects for a tax cut in the 1958 session are rapidly dimming in the wake of Sputnik.

## U.S. Seeks Agreement On Future Sputniks

UNITED NATIONS, N.Y., Oct. 15 (AP)—The United States remained hopeful today of persuading the Soviet Union to take part in negotiations aimed at insuring that objects sent into outer space are used for peace.

This was the U.S. attitude in the face of a gloomy outlook for overall disarmament progress in the United Nations.

## Russia Warns Socialists

LONDON, Oct. 15 (AP)—Nikita Khrushchev shot a barrage of Middle East propaganda

missiles at Western Europe's Socialist parties today, warning they are in serious danger

of being dragged into war over Syria.

First indications were that the various Socialist parties would reject the Soviet Communist party boss' charges that the United States is trying to push Turkey into war with leftist Syria, and would turn down his invitation to work with Soviet Communists for Middle East peace.

The British Labor party fired

off a rejection to Khrushchev on the grounds that the United Nations was the proper forum for his allegations of threats to peace.

The Norwegian Socialist party also announced it had rejected Khrushchev's letter on the grounds that it did not want to conduct a foreign policy independently of the government.

The first reaction of Danish Socialists also was cool.

The Danes, who published the contents of their letter, said similar communications had gone to most other Socialist parties in Western Europe.

Khrushchev appeared to be trying to ride hard the crest of a "position of strength" based on Soviet successes.

## Spy Relates Espionage

NEW YORK (AP)—Reino Hayhanen testified today that he received his salary for espionage work in the United States from Col. Rudolf Ivanovich Abel, alleged Russian spy chief.

Hayhanen, under questioning by the prosecution, said he first met Abel in an RKO theater in Flushing, Queens, in July or August, 1954.

He referred to Abel as Mark, the code name by which he

said he knew the Russian secret service agent.

Abel is being tried in U.S. District Court on charges of transmitting information about American national security to the Soviet Union.

Hayhanen, who defected to the West last spring, testified yesterday that he was sent to this country by the U.S.R.R. in 1952 as an assistant to Abel in espionage work here.

He identified Abel as the chief resident officer of the Soviet espionage network in the United States.
