

Ike, Macmillan Will Plan Joint Atom, Rocket Pool

WASHINGTON, Oct. 24 (AP)—President Dwight D. Eisenhower and Britain's Prime Minister Harold Macmillan called on their top aides today to begin immediate moves to pool British-American atomic and rocket resources for "greater service to the free world."

The two Western leaders took this step at the White House

Government Topples In Sweden

STOCKHOLM, Sweden, Oct. 24 (AP)—The Swedish government, a coalition of Socialists and Agrarians, collapsed today in a clash over social, welfare and economic policy. It had ruled for six years.

At the same time the Swedish military headed by Gen. Milis Swedlund, the commander in chief, demanded that the armed forces be provided with costly modern weapons such as atomic bombs and missiles for the national defense.

Although not outwardly connected, the two things were related in a sharpening domestic crisis.

The issue has boiled down to this: higher prices for food obtained by the Agrarians to please the farmers, and higher taxes exacted by the Socialists to pay for their social program have set the man-in-the-street to grumbling.

The Swedish army, navy and air force have concluded that scientific advances in warfare have gone beyond their present equipment. In effect, they demanded that the nation make up its mind between pensions and modern weapons and guided missiles or prepare to defend Stockholm alone.

at the midway point in their three-day strategy conference on how to counter Russia's new diplomatic-scientific offensive.

Lifting slightly the tight secrecy lid imposed since the talks started yesterday, the White House said the two government heads and their foreign affairs chiefs—Secretary of State John Foster Dulles and Britain's Foreign Secretary Lloyd—were in full agreement on finding ways to harness their nations' resources to meet the Soviet challenge.

The joint announcement disclosed that two separate high-level committees were named to make recommendations before the day was over on action in these two critical fields.

- They are:
1. Nuclear relationship and cooperation.
 2. Problems dealing with missiles and rocketry.

Chairman Lewis L. Strauss of the Atomic Energy Commission was picked to head the atomic-hydrogen study group along with Sir Edwin Plowden, chairman of Britain's Atomic Energy Authority.

Recommendations for stepping up cooperation in the missile-rocket field were placed in the hands of Deputy Secretary of Defense Donald Quarles and Sir Richard Powell, permanent secretary of the British defense administration.

The work of both groups was ticketed for further discussion upon reconvening of the White House talks this evening.

The announcement was given out by presidential press secretary James C. Hagerty with Macmillan's press officer, Peter Hope, standing alongside.

Bovet Awarded Nobel Prize For Medicine

STOCKHOLM, Sweden, Oct. 24 (AP)—Dr. Daniel Bovet, an Italian scientist who helped ease the lot of allergy sufferers with antihistamines and of surgical patients with a deadly poison, was awarded the 1957 Nobel Prize for medicine today.

Dr. Bovet is the man who adapted curare, used by South American Indians for centuries to poison their darts, for use synthetically as a relaxing anesthetic in modern surgery.

He was a pioneer in the development of antihistamines to combat such irritants as hay fever, rash, eczema and asthma.

Now he is studying the effect of tranquilizers on human beings. Sweden's Royal Caroline Institute of Medicine made the award, which carries a cash prize of about \$42,000 from the foundation established by Alfred Nobel, the inventor of dynamite.

Dr. Bovet was recovering from Asian flu at his home in Rome when he got the official notification from Sweden's ambassador to Italy, Eric von Post. The lean, slightly built Swiss-born scientist, 50, was happily overwhelmed.

"I'm very happy," he said. "It was a great surprise. I did not even know I was a candidate."

Stocks Stay High After 'Big Day'

NEW YORK, Oct. 24 (AP)—A tug-o-war between bulls and bears after yesterday's historically left the stock market irregularly higher at the close today.

It was a turbulent day with turnover of 4,030,000 shares compared to 4,600,000 yesterday when the market staged its greatest one-day recovery in 28 years.

The Associated Press average of 60 stocks rose 50 cents to \$157.20 with the industrials up 70 cents, the rails down 20 cents and the utilities up 60 cents. The weakening in rail shares was pushed to some extent by a report that carloadings were at a three-year low.

UNITED NATIONS, N.Y., Oct. 24 (AP)—Most delegates to the UN General Assembly abandoned hope tonight of mediation in the Syrian-Turkish crisis. They prepared for a second round of bitter Middle East debate.

Declarations in Damascus and statements by Syrian representatives in the UN made clear that mediation by King Saud of Saudi Arabia is not in the cards at present.

Syria pressed instead a demand that the Assembly appoint a UN inquiry commission as quickly as possible to investigate the situation on the Syrian-Turkish border.

The Assembly, which has been in recess since Wednesday pending possible mediation efforts, is set to reconvene tomorrow afternoon.

Foreign Minister Salah Bitar and Ambassador Farid Zeineddine of Syria met for an hour with UN Secretary General Dag Hammarskjold on the Middle East.

There was talk that Hammarskjold might be asked to make

a personal visit to the troubled area. An Arab source said this possibility was discussed by the Syrians with Hammarskjold.

But Bitar said afterward he did not extend any invitation to Hammarskjold to visit in Syria, and Zeineddine added that he did not think a visit would be useful "in the present circumstances."

Akram Hourani, speaker of Syria's Parliament and a member of Bitar's Arab Socialist Resurrection party, had suggested in Damascus on Tuesday that a Hammarskjold visit might be helpful.

As for mediation, Bitar declared "there is none."

Crosby Marries Grant In Nuptial Ceremony

LAS VEGAS, Nev., Oct. 24 (AP)—Widower Bing Crosby married a bright, brown-eyed beauty from Texas named Kathryn Grant today in a nuptial Mass culminating a romance that began four years ago on a movie lot.

U.S. Missile Hits Target; New Rocket Height Set

WASHINGTON, Oct. 24 (AP)—The United States is hurling aloft a virtual fusillade of mighty missiles and rockets, ranging from a record-shattering shoot of 1,000 miles into outer space to spectacular destruction by a robot weapon of a target plane a hundred miles out over the Atlantic Ocean.

In obvious challenge to Russia's claims of leadership in the race of scientists and weaponeers, this country had chalked up by tonight these new achievements:

1. The launching of two research rockets by the Air Force from balloons. One of these seems to have swooshed straight up to not less than 1,000 miles. This height dwarfs the previous farthest-out record, set by Russia when she put her Sputnik satellite into an orbit at 560 miles.

2. The firing of an Air Force Bomarc long-range antiaircraft-guided missile yesterday from the Cape Canaveral, Fla., Missile Test

Center which ferreted out, collided with and knocked down—without benefit of warhead—a drone bomber a hundred miles out over the Atlantic Ocean.

3. Another successful shoot today of an Air Force Thor intermediate-range ballistic missile—IRBM—from Cape Canaveral. This was the sixth time the USAF has test-fired a Thor and the fourth successful shot. Today's missile "flew its prescribed course and landed in the preselected impact area," said an Air Force announcement. The Thor was understood to have gone more than 1,500 miles and hit its target.
