

Gov. Knight to Campaign For Position in Senate

Shefferman Pleads Fifth In Probe

WASHINGTON, Nov. 5 (AP)—Senate rackets probers said today Nathan Shefferman, adviser to firms with labor troubles, did favors for a former member of the National Labor Relations Board. Shefferman refused to answer any questions.

The Senate Rackets Investigating Committee produced evidence that Shefferman bought \$2,700.18 worth of merchandise at wholesale for Paul L. Styles when Styles was an NLRB member.

Shefferman, accused by the committee of coast-to-coast union-busting, refused to testify "on the grounds that it might tend to incriminate me."

The 70-year-old witness and his son, Shelton, brushed aside all questions on advice from their lawyer. The attorney said any testimony might jeopardize their fight against federal indictments charging them with helping Dave Beck, retiring Teamsters Union president, evade income taxes.

Chairman McClellan (D.-Ark.), winding up the current phase of the committee's investigation, said Shefferman and his firm, Labor Relations Associates, and some Shefferman clients "should be strongly condemned."

Court to Rule Pinball Legality

UNIONTOWN, Pa., Nov. 5 (AP)—A court en banc will sit in Fayette County Nov. 25 to determine if pinball machines can be seized by police and destroyed.

State police confiscated 41 pinball machines last June 20 in a series of raids in Fayette County. The Commonwealth has asked the court for permission to destroy the machines.

A hearing on the state's petition was begun last July 17 and recessed. At that time attorney Louis P. Glasso of Pittsburgh argued the machines were for amusement and required skill to play.

A state trooper testified that while gathering evidence before the raids he saw a number of winning players received cash payoffs.

The raids were made in Uniontown, Connellsville and Brownsville.

Geologist Sees Oil Rigs In Atlantic in 10 Years

ATLANTIC CITY, N.J., Nov. 4 (AP)—A geologist speculated today that within 10 to 20 years the Atlantic Seaboard may see the erection of offshore oil rigs similar to those along the Pacific and Gulf Coasts.

Meredith E. Johnson said the idea still needs much investigation but added definite indications of the presence of oil have already been found along the coast.

West Hits Reds For Boycotts In Disarmament

UNITED NATIONS, N.Y., Nov. 5 (AP)—The Soviet Union was accused today of trying to intimidate the United Nations by announcing a boycott of any more talks in the UN Disarmament Commission or its subcommittee as presently organized.

Representatives of Western nations and others made the charge in the 82-nation UN Political Committee, which will vote tomorrow on recommendations to the General Assembly on how to achieve progress in disarmament negotiations.

Despite the Soviet announcement, the Western nations were standing firmly behind a 24-nation resolution to have the five-nation UN subcommittee resume its deadlocked negotiations.

The resolution would give priority to the Western proposals rejected by the Soviet Union at the subcommittee's sessions in London last August.

Efforts were still being made by India in talks with both sides to reach some sort of compromise which would enable the Soviet Union to change its mind. India apparently felt that agreement to expand the 12-nation Disarmament Commission and the subcommittee to include another Soviet-bloc member and a neutral power might resolve the issue.

WASHINGTON (AP)—GOP Gov. Goodwin J. Knight of California abandoned his campaign for re-election to bid for a Senate seat today.

Vice President Richard M. Nixon promptly wheeled out a glowing endorsement of a Knowland-Knight tickets for governor and senator.

After conferences with President Dwight D. Eisenhower and Nixon, Knight said he is yielding the field to Sen. Knowland (R-Calif) in race for the 1958 Republican nomination for governor.

Knight said he will bid for the seat which Knowland will vacate in January 1959 in what is generally regarded as a possible preliminary move for Knowland to seek the GOP presidential nomination in 1960 or later.

Knight said Eisenhower was "pleased to know we wouldn't have a bitter struggle" in the governorship primary which might split the Republican party in California and possibly pave the way to election of a Democrat as governor next year.

Knight also told a news conference he had the "unqualified endorsement and approval" of Nixon. Nixon backed this up with a statement pledging "My full support" to the nomination and election of Knowland as governor and Knight as senator.

Knight's decision apparently cleared the way for Knowland to get the nomination for governor.

American Teams Plan To Observe Sputnik II

WASHINGTON, Nov. 5 (AP)—More than 100 American Moonwatch teams were alerted today to man their telescopes for a predawn appearance of Sputnik II tomorrow.

The 1,120-pound Soviet satellite, carrying along a little dog called Laika on its orbit of the earth, may be visible during three swift passes overhead beginning at 5 a.m. EST.

The signal to begin optical tracking was sent out from the Smithsonian Astrophysical Observatory at Cambridge, Mass. At the same time the observatory predicted that Sputnik I, launched into space by the Russians Oct. 4, will make a fiery plunge to earth Dec. 11.

Sputnik II, a much heavier satellite loaded with instruments, has been up since Saturday night.

President A. N. Bakulev of the Academy of Medical Sciences reported from Moscow that reports from the satellite indicate Laika is still "in good shape." But other Soviet scientists

indicated the dog eventually will die in its sealed sphere, a martyr to science. Earlier reports that Laika might be brought back alive to earth were discounted.

Also from Moscow came another report that the Russians developed a new superfuel to get their second satellite into orbit at a speed approaching 18,000 miles an hour.

Writing in a Transport Ministry newspaper, T. Khachaturov, a Soviet scientist, said, "In order to reach the enormous speed of 8 kilometers per second it was necessary to produce new fuels for rockets." The speed he mentioned would be about 5 miles per second.

U.S. May Launch Satellite

NEW YORK, Nov. 5 (AP)—The Mutual Broadcasting System said today it had been reliably informed that the United States would launch its first satellite next week.

The network pointed out that American rocket experts recently indicated America's first satellite may have insect passengers.

Gaillard Approved As French Premier

PARIS, Nov. 5 (AP)—Felix Gaillard tonight won approval as France's twenty-fourth postwar premier. The victory came on Gaillard's 38th birthday and gives him the distinction of being the youngest premier in French Republican history.

The unofficial tally of the National Assembly's vote on Gaillard was 330-176.

Assembly acceptance of Gaillard has been virtually certain since Sunday when the Socialists and right-wing independent Republicans decided to give him their votes and to join his government.

All parties of the Assembly had become weary of the Cabinet crisis. It had dragged on for 36 days because of bitter political squabbling among the deputies.

The 36-day life of the crisis equalled the post-war record for intervals between governments. The record was set originally in 1953 after the fall of Premier Rene Mayer's Cabinet. Mayer was eventually succeeded by Joseph Laniel.

Gaillard is a member of the Radical Socialist party. It sits just about in the center of the Assembly and has supplied a good share of the post-war premiers because of its strategic political location.

\$5 Hourly Wage Predicted Near

WASHINGTON, Nov. 5 (AP)—Remember the ruckus years back when Henry Ford adopted a \$5-a-day wage?

Well, a \$5 hourly wage may not be too far off in some trades.

A survey published by the Labor Department today on union pay scales in the building trades shows boilermakers in some cities now are up to \$4.46 an hour. That does not include overtime.

These other building trades workmen enjoy top rates at better than \$4 an hour in some places:

Bricklayers, cement finishers, electrical installers, elevator constructors, lathers, machinists, painters, pipefitters, plasterers, plumbers, rodmen, tile roofers, stone masons and structural ironworkers.

Collegian Photo Staff

The photography staff of The Daily Collegian will meet at 7 tonight in 9 Carnegie.

Staff members and candidates are required to attend.

NADA Against New Dealership

WASHINGTON, Nov. 5 (AP)—The president of the National Automobile Dealers Assn. today charged that auto manufacturers are granting new car dealerships to "fast operators" and shady sellers.

The auto distribution industry is in danger of becoming a "racket" requiring unwelcome federal controls to police it, said Frederick M. Sutter of Columbus, Ind.

Sutter's speech was prepared for the annual meeting of the American Finance Conference here. Because of his illness it was delivered by Carl E. Fibley, former president of NADA.

Sutter asked the 800 finance company officials attending to assist NADA's effort to "clean up" the auto sales industry.
