

## Shulman To Sign Books At Store

Max Shulman, guest speaker at the Sigma Delta Chi, men's professional journalism fraternity dinner tomorrow will be at the Pennsylvania Book Store from 3 to 5 p.m. Monday to give autographs and answer questions.

Shulman, well known for his campus humor column, has been in the joke business since his student days as editor of the campus humor magazine at the University of Minnesota.

His first novel, "Barefoot Boy with Cheek," was written in 1942 after a publishing firm's editor "discovered" his work and invited him to attempt a book.

Since then he has written five others. They include "The Many Loves of Dobie Gillis," "Sleep Til Noon," "Max Shulman's Guided Tour of Campus Humor," "Max Shulman's Large Economy Size" and "Rally Round the Flag, Boys!" All of these books are available at the Pennsylvania Book Store.

Shulman also has published stories in Good Housekeeping, Cosmopolitan and the Saturday Evening Post. He is the author of a weekly syndicated humor column for campus newspapers—run as a cigarette advertisement in The Daily Collegian—several movies, a stage musical version of his first novel and a second Broadway production, "The Tender Trap."

The Sigma Delta Chi dinner is scheduled for 6 p.m. tomorrow at the State College Hotel. Dinner is by reservation.

## Concert Ticket Distribution Set

Tickets will be available to students at 1 p.m. Monday for the program by the Dancers of India, scheduled for 8:30 p.m. next Saturday in Schwab Auditorium.

The program is the fifth in the student sponsored Artists' Series.

Tickets will be available to students without charge from 1 to 5 p.m. Monday and from 9 a.m. to noon and from 1 to 5 p.m. Tuesday at the Hetzel Union desk.

Tickets will be on sale to non-students from 9 a.m. to noon and from 1 to 5 p.m. Wednesday and Thursday. These tickets cost \$1.25 each.

## WH Council to Hear Talk on Phone System

Wilbur F. Diehl, manager of the telephone division of the Physical Plant, will discuss the University-residence halls telephone system at the West Halls Council meeting at 7 p.m. Monday in 127 Waring.

## State YMCA Group To Convene Here

The State Extension Service Committee of the Young Men's Christian Association will hold an annual policy planning meeting tomorrow and Monday at the Nittany Lion Inn.

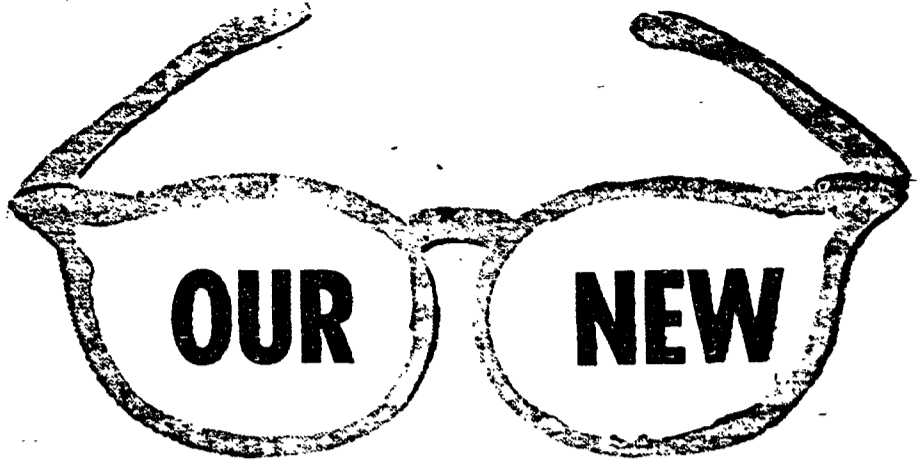

Forty educators, secretaries and officers of the state YMCA will hear Richard E. Hamlin, research associate of the YMCA National Board speak on "Hi-Y Today," in conjunction with the theme of the conference, "Hi-Y Today—How Can We Reach More Boys?"

## "I'm in a business nobody dreamed of three years ago"

"In a company that develops new ideas by the thousands," says 30-year-old William K. Cordier, manager of General Electric's Man-Made Diamond pilot plant, "a young man's career progress need not be limited by his particular field. In my five years with General Electric, I've gained valuable experience in several different fields, and each assignment has helped me to move ahead. Right now, I have an exciting job. I run the world's first diamond-making plant—a business nobody dreamed of three years ago."

### Diamond Making a Reality

The job Bill Cordier holds is an important one, created because General Electric has the scientific and technical resources needed to seek out new knowledge and swiftly translate it into products that people want and need. In 1955, the company announced a major scientific breakthrough—the production of real diamonds in the laboratory. Today, little more than two years later, General Electric is making and selling quantities of these diamonds for civilian and defense use.

### Achieving Three-Way Progress

General Electric's ability to take on and solve big problems—in research and development as well as every phase of production—is constantly creating challenging new opportunities for the 29,000 college graduates at the company. As we see it, by providing a healthy climate for a young man's self-development in whatever area he may choose, we encourage not only his own progress, but that of the company and the nation as well.

WILLIAM K. CORDIER received his B.S. in Mechanical Engineering from Purdue University (1949). He joined General Electric's Metallurgical Products Department in 1952.

## Smith's barber shop

DID YOU EVER SEE .7 OF A PERSON?

According to the latest statistics, there are 2.7 fellows at Penn State for every girl. Do you have a date this weekend? . . . or do you need a haircut?

A COCKER SPANIEL HAIRDO IS FINE. (on a cocker spaniel). What you need is a haircut. A haircut by Smith's, that is. The Howard T. Smith Barber Shop gives haircuts the way you like them.
