

AIM Will Consider CE to Give Giving Dorm Trophy Report On Parking

The Association of Independent Men Board of Governors will consider a plan to authorize the awarding of an annual "outstanding living unit" trophy at a meeting at 7 p.m. to-night in 203 Hetzel Union Building.

Senate Unit Will Hear ZBT Appeal

The Senate Subcommittee on Student Affairs will meet today to hear an appeal by Zeta Beta Tau on the 16-week social probation penalty recommended for the fraternity by the Interfraternity Council Board of Control.

The subcommittee will meet at 11 a.m. to make a final decision on the probation.

The Board of Control's decision will receive a "thorough review" by the subcommittee, Dean of Men Frank J. Simes said yesterday.

The board recommended probation for Zeta Beta Tau, effective immediately until the middle of next semester, because the fraternity had women guests in the house Saturday night when the house was not approved by the office of the dean of men.

A house on social probation is not permitted to entertain women guests at any social function for the duration of the probation.

Zeta Beta Tau appealed the decision on the grounds that the penalty was "far too severe under the circumstances."

The decision of the board was in the form of a recommendation to the subcommittee, and the actual invoking of the probation will depend on today's decision.

Simes said since an appeal has been made, all of the facts of the case will be thoroughly reviewed by the subcommittee.

Companies Support Fertilizer Research

Three commercial companies, engaged in the manufacture of urea-form compounds used in fertilizer mixes for lawns are supporting research on these compounds in the College of Agriculture.

The companies, du Pont de Nemours, Borden and Nitro-Form Agriculture Chemical, each have given \$1000 for the work.

Dr. H. B. Musser, professor of agronomy, is in charge of the research.

3 Vacancies Reported On MI Student Council

The Mineral Industries Council has reported one sophomore and two senior vacancies.

Persons interested in applying for the positions may contact George Mater at AD 7-7881.

The Department of Civil Engineering report on campus parking conditions will be completed "soon" and will be submitted to the administration near the middle of December.

The department is currently conducting a study of parking conditions under the direction of Calvin G. Reen, professor of civil engineering.

The report, similar to that which was recently done on the condition of campus walks, will consist of recommendations that would, in the opinion of the department, alleviate many of the parking and traffic conditions on campus.

The Hetzel Union Building parking lot is one of the areas under consideration. Last year, both students and faculty felt there should be a Pollack Road entrance into the parking lot. This area currently has only one entrance—on Shortlidge Road. It serves as both entrance and exit.

Reen said he thinks every parking area should have both an entrance and an exit but made no comment on the proposed Pollack Road entrance. Students have made their own recommendations as to what would best ease present campus parking conditions. These recommendations were given to Robert G. Bernreuter, special assistant to the president for student affairs, who in turn gave them to the civil engineering personnel conducting the survey.

"I can't say that any of the recommendations by the students are unreasonable," he said.

Pitt Ticket Sale Begins Today

Tickets for the Lion-University of Pittsburgh football game will go on sale at 8:15 a.m. today at the ticket office in Recreation Hall.

Edward M. Czekaj, ticket manager, said the office has received 1000 sideline tickets priced at \$4 each and another 1000 end-zone tickets priced at \$2.50 each. The office will be open from 8:15 a.m. until noon and from 1:00 to 4:30 p.m. weekdays.

A large number of tickets for the Lion-Holy Cross game still remain on sale at the ticket office, Czekaj said. Sales will close at 4:30 p.m. Thursday.

Prof Joins Committee

George M. Dusenberre, professor of mechanical engineering, has been appointed to the Heat Transfer Conference Planning Committee, a joint policy making committee of the American Society of Mechanical Engineers and the American Institute of Chemical Engineers.

250 'Dance' Tickets Go on Sale Today

A total of 250 tickets will go on sale to non-students at 9 a.m. today for the Dancers of India program, scheduled for 8:30 p.m. Saturday in Schwab Auditorium. Tickets will be sold from 9 a.m. to noon and from 1 to 5 p.m. today and tomorrow. The cost is \$1.25 each.

The 1000 tickets made available to students at 1 p.m. Monday were gone by 4 p.m. yesterday. If any tickets remain from the sale, they will be available to students from 9 a.m. to noon and from 1 to 5 p.m. Friday.

Seminar to Hear Prof

Erwin R. Schmerling, assistant professor of electrical engineering, will speak to the computer applications seminar at 4:10 today in 209 Willard on "Reduction of Ionospheric Data by Matrix Inversion."

Perkins Says U.S. Must Build Defense

By DAVE FINEMAN

Dr. Dexter Perkins, chairman of the Harvard Foundation for Advanced Study and Research, said last night Americans must tighten their belts to build up national defense and wait for either a Russian attack or a weakening from the inside in the Soviet Union.

Perkins said Americans must be prepared to make the great sacrifices needed to build up our national defense and put us in the best bargaining position in the cold war.

President Dwight D. Eisenhower told the nation of the measures which must be taken to make us strong, but, Perkins maintained, "did not say it would cost money." Perkins predicted, with some reservations, that Russia will suffer more and more from internal tensions.

The intelligentsia and the managerial classes within Russia and the peoples in the satellite, he said, have been alienated to some degree, thus creating tensions and instability in the regime.

The result of this, he said, would probably be Soviet internal weakness coupled with a stronger foreign policy—including military adventures—to distract attention at home.

Perkins stressed above all else the "maintenance of our physical power," for we "cannot be sure Russia will not invoke" its powerful new weapons.

The Russians have the advantage here, Perkins held. "They can sweat it out of their people," he said, but Americans will fight infringements on their rights in this matter.

He paralleled our position to that of Britain in the 1930s. While the British refused to make sacrifices and began to cut their defense in the 1930s, Perkins recalled, Hitler began his march through Europe.

Then, in desperation, Britain committed herself to the defense of Poland, he said, and got herself into a war at a very inopportune time.

The Soviets, like Hitler, Perkins said, can spread the net of communism until we, like Britain in the 1930s, may be forced into a position where we "will lose our heads."

Perkins named two further disadvantages we face in a contest with Russia: our decentralized educational set-up and the slowness of decision inherent in the democratic system.

While we cannot centralize and dictate to education as Russia has, he said, we can produce a "greater interest" in science, "particularly basic science."

Other barriers to American victory in the cold war which Perkins named are:

• Our association with the colonial powers in our dealings in the Middle East.

• The "color question," which, he said, is "the Achilles heel of

American society." We must "cleanse ourselves of our white-man arrogance," he said.

• The success of the communistic experiment in the Orient. Perkins noted that our freedoms mean much "less in the Orient" besides the industrial development offered by communism.
