## IFCPA Will Begin Supplying Produce; Swift to Be Dropped

The Interfraternity Council Purchasing Association, stepping into a new line of services, will begin supplying fraternities with fresh produce Friday.

The vendor chosen to handle the new produce contract is Patt's Wholesale in Altoona. Fruits and vegetables will be delivered on Tuesdays and Fridays.

## Ag Council For ROTC Compulsion

The Agriculture Student Council last night, amid a spontaneous debate, voted 23 to 3 to favor retaining compulsory ROTC, but opposed placing it in the College of the Liberal Arts.

James Uhl, junior in agriculture education from Newfoundland, moved that a committee be set up to study the possibility of placing a survival course as an elective in the College of Physical Education.

President Russell Beatty appointed Lawrence Hutchinson, junior in animal husbandry from Thornton, head of the committee.

Richard Craig, junior in horticulture from Clairton, speaking against the motion, said the U.S. needs "professional soldiers." He said there seems to be no gain from the current ROTC program, because of the poor attitude due to the compulsory plan.

Speaking in favor of the motion Larry Ridenour, senior in landscape architecture, said, "In a democracy people always want to disarm after a war. The main purpose of ROTC is to keep a reserve for the time of war. However, liberal arts and ROTC do not go together. The quality of instruction in the ROTC is far superior to any other course I have taken at the University."

Walter North, senior in agronomy from Havertown, said, "When a freshman enters the University, he does not know whether he wants to be an officer or not. The present program gives that freshman a chance to decide what he wants to do."

## Chem-Physics Council To Discuss Open House

The Chemistry-Physics Student Council will meet at 7 tonight in 209 Hetzel Union.

Plans for improvements on the open house which is held each spring by the college will be discussed.

IFCPA Chairman James Burns said the association has decided to drop its meat vendor, Swift and Co., because of unsatisfactory meat-cutting services.

The vendor to replace Swift's has not yet been chosen, Burns said, but the association has sent out requests for bids on the contract to nine companies and replies are expected shortly.

The decision to drop Swift's as meat vendor, Burns said, was caused by a dissatisfaction with their fabricating which had been felt for some time, and Swift's failure to correct the situation despite attempts by IFCPA to improve the service.

"Fraternities would order something and get something else," Burns said. "We tried two or three times to get it straightened out and even sent a committee to the plant in Maryland, but had no luck."

The Board of Trustees of the Association sent a notice to Swift's that they would be dropped as vendor on Nov. 25.

The new meat vendor, Burns said, will begin service on Dec. 2. The nine companies contacted by the board must have their bids on the contract returned by Monday, and the board will choose the new vendor immediately.

## Book Includes Prexy's Speech

President Eric A. Walker is one of 36 contributors to "Brainpower Quest," a book published yesterday by the Macmillan Co.

Walker's contribution to the book is based on a talk he gave last year in New York City on "Professionalism and Social Responsibility."

"Brainpower Quest" covers the proceedings of a convocation called last year by the Cooper Union to discuss how America can assure itself of having enough scientists and engineers to meet the challenge of today's world.

## Oil Research Discussed

Representatives from the State Grade Crude Oil Association visited the University last week to discuss and review recent developments in oil production research being carried out in the department of petroleum and natural gas engineering.

George Sharp

## Thanksgiving Set as Opening Of Skating Rink

The University's ice skating rink will open on Thanksgiving day, weather permitting.

Registration for group or individual instruction in ice skating will be held from 9 to 12 a.m. and from 2 to 4 p.m. Nov. 23 and 30.

Mrs. Marilyn Tammen, former figure skating champion in her home state of California, will give the lessons, as she did last year.

Instructions will be given on Monday evenings for adults and Saturday mornings for youngsters. Group classes will be held for beginning, intermediate and advanced skaters.

An exhibition of figure skating will be held from 2 to 3 p.m. Dec. 7. It will be sponsored by the ice skating sections of the Outing Club. The Hershey Figure Skating Club already has accepted an invitation to present an exhibition.

## 17 Students Fined By Traffic Court

Seventeen students were fined a total of \$40 this week by Traffic Court.

A breakdown of the fines shows \$27 is for parking violations, \$10 for not registering and displaying a registration sticker and \$3 for failure to report to the Campus Patrol within the next complete school day.

Ten fines totalling \$34 were suspended and 26 cases were dismissed. Seven students who failed to appear, automatically were fined a total of \$38.

## AIM Judicial Will Meet

The Association of Independent Men Judicial Board of Review will meet at 7 tonight in 218 Hetzel Union.

## Fund Campaign Planned for Sharp

Plans are underway to establish a fund for George "Larry" Sharp, freshman who broke his neck and was paralyzed as a result of a trampoline accident October 11.

Sharp has not made much recovery since the fall from the trampoline or since his operation Oct. 13, according to Dr. Alfred H. Griess of the University Health Service.

Details of the campaign, to raise funds to cover some of Sharp's hospital expenses, will be discussed Thursday night immediately following the All-University Cabinet meeting.

All-University President Robert Steele, chairman of the fund drive has appointed five vice-chairmen: Edward Dubbs, Daily Collegian editor; James Hart, Interfraternity Council president; Grace Antes, Panhellenic Council president; John Morgan, Association of Independent Men president; and Lorraine Jablonski, Leonides president.

Sharp will be moved to the New York University hospital Monday from the Geisinger Memorial Hospital in Danville where he has been since the accident. The NYU Hospital, a rehabilitation center, is better equipped to take care of Sharp, Griess said.

Sharp's expenses at the NYU hospital are expected to total approximately \$50 a day. The University carries no insurance covering a student injured in an accident. Griess said Sharp's expenses "could run into considerable money."

Sharp has no use of his right hand and little use of the left one. Griess said it is too early to say anything definite about his recovery.

"We will begin to despair if he makes no signs of recovery by Jan. 13," three months from the accident, Griess said.

He said, "Sharp came awfully close to the brink; those cases usually die instantly."

## 377 Students Exempt Basic English Comp

A total of 377 students have been exempted from the basic course in English composition.

Included in the exemptions are freshmen and advanced standing transfer students enrolled on the main campus or at one of the centers.

## Eng Council Hits ROTC Compulsion

The Engineering and Architecture Student Council last night voted 25-7 in favor of the abolishment of compulsory ROTC, but voted against the acceptance in whole of the Liberal Arts Council's resolution presented before All-University Cabinet Thursday night.

No copy of the LA council's resolution was presented at the meeting but Robert Stroup, president of the council, read the resolution of Senate Committee on Educational Policies.

Alton Kendall, junior in engineering science from Reading, presented both motions. Kendall represented the council on Cabinet Thursday night. He said he broke down the LA council's resolution into three main points: 1. the acceptance of the report, 2. the establishment of a civil defense course in the College of Physical Education and Athletics, and 3. the abolishment of compulsory ROTC.

Reasons advanced for the abolishment of ROTC only because they would be created, only persons interested would join and money would not be wasted on students who take only ROTC because they are forced to.

Reasons advanced for keeping compulsory ROTC included that basic ROTC convinced many students to go into advanced ROTC and that the Senate committee had spent two years on making their recommendation while little time had been spent on making the LA Council's resolution.

Before the vote was taken Stroup reminded the council how long the Senate committee took to make their recommendation, (Continued on page five)

## Dulles Unfolds American Plan For New Atomic Rocket Bases

WASHINGTON, Nov. 19 (AP)—Secretary of State John Foster Dulles today unfolded an American plan for strengthening the Atlantic Alliance by creating a European network of rocket bases with stockpiles of atomic warheads.

This concept emerged at Dulles' news conference as a key proposal which he and President Dwight D. Eisenhower will lay before the Dec. 16 meeting at Paris of the North Atlantic Treaty heads of government.

Dulles told his news conference he and Eisenhower would

try at Paris also to reinforce the Allies' confidence that America would fight if necessary but only if necessary.

The secretary said America's NATO commitment to treat any attack on one NATO member as an attack on all "is as strong as it could be made."

But he said the Allies are concerned on two counts—that America might be trigger-happy or, conversely, might fail to retaliate against any Soviet attack in Europe not directly involving U.S. troops there.

He ruled out giving any veto to Allied nations on U.S. policy, but he said a way must be found to convince them America would use nuclear weapons if necessary but

would not misuse them.

In discussing his rocket-atomic bases proposals, Dulles said prototype arrangements of this kind are already being made with Britain and Canada. He said a similar series of intermediate-range missile bases, with nearby nuclear-warhead stockpiles, could be worked out with European countries in a continental defense system against a potential assault by Russia.

The first step—providing the 14 other NATO nations go along with the idea next month—would be a blanket NATO agreement, Dulles said. He added that executive agreements could follow with individual member countries.

—Daily Collegian photo by Harry Farminger. "WHAT WE NEED is the large economy size," and that's what Ron Field (left), senior in journalism from Pittsburgh, probably is saying. On the short end of the umbrella is Richard King, senior in business administration from York, who came prepared for the damp weather that invaded the Nittany Valley yesterday morning.
