## Behind Food Service

# 21 Deadlines Biggest Problem, Food Service Director Says

By RALPH MANNA  
First of Two Articles

"The biggest job we have is meeting 21 deadlines a week," according to Robert C. Proffitt, director of Food Service.

"Feeding students well is a full-time job—24 hours a day, seven days a week," he said. Food Service is probably the least understood department at the University. Yet it probably comes into contact with the students more than anything else.

From the time food is brought to the time leftovers are discarded as garbage, there is a continuous complex operation—utilizing many man- and machine-hours—of which most students are unaware.

The cost of food, dishes, utensils, machinery, furniture, office expenses and Food Service employee salaries all come out of student fees. Food Service is not subsidized by either state or federal governments.

A semi-centralized system is now used by Food Service. Food is prepared in each individual dining hall but the Food Stores Building, on North Atherton Street next to the golf course, is the central unit of operation. Here the menus for weeks in advance are prepared and the dining halls order their food stuffs from its storerooms. Now, every dining hall has the same menu; in the past, the individual dining halls acted independently.

Food Service orders food supplies direct from commercial firms. The department strives to buy the best food possible from the best firms at the least expense. Requisitions are sent to firms as far as Alaska for salmon and Oregon for beans or as close as Peach Glen for apples and Altoona for fresh vegetables.

An attempt to prepare food more to the students' liking is displayed in the workings of the experimental kitchen in the Food Stores Building. Here new recipes are tried out by the dining hall supervisors. They are perfected and then sent out to a "test" dining hall. The new recipe is measured according to many criteria, the most important of which is the number of second helpings.

The experimental kitchen also tests "cuttings" or samples of canned foods. Here the supervisors taste, test and score many brand-name foods—but, to insure impartiality, the supervisors have no knowledge of the brand name of the food they are testing. The food is scored according to color, consistency, workmanship and flavor.

The menus are prepared by a committee composed of all the dining hall supervisors. All the committee members have an opportunity to plan menus; all menus are planned four weeks in advance. Louise Schermerhorn is food production manager in the Food Stores Building.

The Food Stores Building has its own bakery and butcher shop. The bakery, a maze of machinery, produces bread, cakes, pies, cookies and doughnuts. The bakery is

in operation from 3 a.m. to 9 p.m. daily.

Approximately 3000 loaves of bread are baked a day. The bread dough is put through a variety of processes including steam proofing. The bread is baked in huge ovens, each containing six shelves. About 60,000 pounds of flour is used a month.

The butcher shop takes the U.S. choice meats, bought from leading meat vendors, and prepares it for roasts, Swiss steaks and other meat dinners. A giant meat freezer, fish cooler and smoked meat room hold the meats from the time they are bought until they are used. The meat freezer holds about 6000 pounds of meat, enough for two campus meals.

Other compartments throughout the building hold eggs, butter, cheese, fruit and nuts. Eggs are kept at a temperature of 29 degrees with 90 per cent humidity. A minimum of 80 per cent of eggs must be "grade A" before a shipment can be accepted at the

# 'Sit' Meals Voted Down By Leonides

Leonides Council last night voted against re-establishing "waiter served" or "sit down" meals for the women's residence halls dining rooms.

The members of the council felt it would be "impractical" with the present overcrowding in the dining rooms. Some members felt it would be feasible to have "served, sit down" meals for special holiday dinners only. Other members said they disliked the idea of having to be in the dining room at a certain time or else missing the meal.

The council decided to Christmas-carol next Monday instead of holding the regular meeting. The group will sing before the dormitories and pick up carolers as they go along. The singing group will end its tour by singing in front of the University Health Center.

Leonides decided to continue its program of getting orders for food from students in the University Hospital, but adopted a new system. Each women's residence hall unit will be responsible for the service each week.

The representative from each unit will be in charge of making sure the program is carried out.

A tea for housemothers, sponsored by Leonides, will be held at 7 p.m. on Dec. 18 in Simmons lounge.

# Council to Hear ROTC Question

The Education Student Council will discuss the ROTC question at 7 tonight in 204 Burrows.

The council has not taken any formal stand on the question of whether or not the University should abolish compulsory ROTC.

Also scheduled for discussion at the meeting will be a proposal that the council donate money to the George "Larry" Sharp fund. Sharp was paralyzed from the neck down when he fell on a trampoline in Recreation Hall in October. He had been hospitalized in Geisinger Memorial Hospital at Danville until last week, when he was moved to a hospital in New York City.

## Players Ad Workshop

A technical workshop will be held for persons interested in working on the Penn State Players advertising crews at 7 tonight in the loft of Schwab Auditorium.

## Metals Group to Meet

The University chapter of the American Society for Metals will meet at 7:30 tonight in the Mineral Sciences Auditorium to hear Theodore P. Pajak speak on, "Metal Sandwich Materials and Structures."

## Seriographs Shown At HUB Exhibit

Seriographs by Sister Mary Corita are the subject of an exhibition in the Hetzel Union gallery which will continue until Dec. 21.

Sister Corita, a leading liturgical artist whose books have been illustrated in Time and Life magazines, is professor of art at Immaculate Heart College in Los Angeles, Calif.
