

Screening Student Insurance

Proposed Plan Would Include 3 Options, \$10-16 Cost Range

By **CHUCK Di ROCCO**
Last of a Series

A proposed voluntary-insurance policy that has been defined as "adequate coverage" would range in cost from about \$10 to \$16 a year, according to two of the nation's largest insurance companies.

The proposed program includes three optional plans, each having a graduated cost.

The basic plan which would cost about \$10 a year includes the following coverages and benefits:

Injury due to accidents would be reimbursed up to \$1000 for each accident, regardless of where the accident occurs. Expenses include X-rays, hospital bills, nurses', physicians' and surgeons' fees, laboratory costs, medication and other medical expenses incurred as the result of an accident.

Reimbursements for sickness would be made for actual medical expense, not to exceed \$500 for each accident, according to the following schedule:

A limit of \$12 a day for hospital room and board, with a \$500 maximum.

A limit of \$100 for miscellaneous hospital expenses, to include X-ray, laboratory tests, anesthetics, use of operating room, medications, plaster casts, or temporary surgical appliances.

A limit of \$3 a visit for physicians' fees while the student would be confined as a bed patient in a hospital with a \$90 maximum. A limit of \$225 for surgical fees. A limit of \$15 for ambulance expenses.

The second optional plan would include the basic plan described above, plus a major medical provision to cover accident and sickness up to \$10,000.

The third optional plan would be a major medical provision by itself to cover accident and sickness up to \$10,000.

The proposed voluntary insurance program would be handled through a proposed All-University Cabinet committee which would send out letters of explanations to students and parents.

Students interested in subscribing to any of the three policy-plans would be able to do so through the Cabinet committees which would also handle the collection of the premiums.

Cabinet will hear a subcommittee report on the proposed voluntary-insurance program Thursday.

Engineering Council Will Study Architecture Building Hours

The Engineering and Architecture Student Council has set up a committee to study the possibility of keeping the architecture building, Sackett, open after 10 p.m. on week-nights and during weekends.

Council members felt there was a definite need for opening the building, but said it was necessary for a staff member to make the request and be responsible for the rooms. The committee will investigate the situation.

Eighteen Initiated Into Eng Honorary

Alpha Pi Mu, industrial engineering honorary society, has initiated 12 active members and six alumni members.

Active members initiated are Barry Ashway, Jack Dundore, Robert Esh, Daniel Ferry, Don Garee, Ronald Glenn, James Jucker, Falk Kantor, Alfred Richards, Walter Thrush, Richard Wilson and John Yeosock.

The alumni included Gilbert D. Thomas, associate professor of industrial engineering.

A committee also was set up Tuesday to study the possibility of amending the constitution to change the manner by which freshmen and sophomores will be elected to council next year. The incoming freshmen will not be enrolled in specific curriculums and hence cannot be elected in the traditional manner.

It was announced that third semester sophomores may apply for two \$175 scholarships for next semester. Applications may be obtained in 203 Sackett.

Chanukah Will Begin Today With Sermon on Festival

Chanukah, the Jewish Festival of Lights, will begin today. At a special Chanukah service at 4:30 p.m. Thursday in the Helen Eakin Eisenhower Chapel, Rabbi Benjamin Kahn will speak about the festival and its significance. The service is open to the public.

For Jewish people throughout the world, Chanukah is a joyous occasion. On this day the Maccabees freed the Temple in Jerusalem from the Syrian conquerors. At its rededication, only enough pure oil was found to light the Holy Lamp for one day. Miraculously, it burned for eight days. The next year an 8-day festival was declared, to be celebrated with song of praise and thanksgiving for all times.

On the first day of Chanukah, Jews light one candle on the Menorah, adding another each day. Other customs have developed through the years in different countries. One universal custom is the merry-making and giving of gifts by the children. Chanukah is known as a time of happiness, retrospection and hope.

Dickson to Discuss 'Christmas in Art'

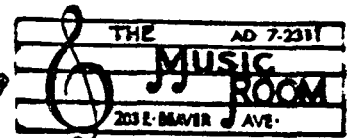

Harold Dickson, professor of art and art history, will speak "Christmas in Art" at 7:30 tonight at a meeting of the Belles Lettres Club in Simmons lounge. Slides will be shown demonstrating the different concepts and techniques of artists through the centuries. The meeting is open to the public.
