

Johnson To Be Head Of Ed Council

Ruth Johnson, junior from Mt. Jewett, has been elected president of the Education Student Council for the spring and fall semesters, 1958.

Miss Johnson was opposed by Gary Young, junior in psychology from Clarion.

Completing the slate of new officers, the council on Tuesday elected Dorothy Newman, sophomore in psychology from Philadelphia, vice president; and Ellen Butterworth, sophomore from Allentown, secretary-treasurer.

Miss Newman was opposed by Miss Butterworth, who then dropped down to defeat Sandra Grotzky, junior from Glen Lyon.

Council also approved a "big sister" program being set up by Women's Student Government Association, thus automatically agreeing to take part in the program. Under present plans, each new female student at the University would be given an upper-classwoman to act as a close friend.

The council also will investigate the possibility of setting up a separate "big brother" program for men in the College of Education. If established, such a program would be similar to the WSGA idea, but would be run independently by the council.

Kay Kegel, junior from Mechanicsburg, and Joyce Levinson, sophomore from Philadelphia were appointed co-chairmen of the program.

The council also vetoed a possible College of Education career day. The action was taken after reports were given from the College of Mineral Industries and Robert G. Bernreuter, assistant to the President in charge of student affairs, indicating that such a project does not accomplish enough for the amount of money and time spent on it.

Pixton Receives Ogontz Position

Dr. John E. Pixton, assistant professor of history, has been appointed assistant administrative head of Ogontz Center.

Pixton earned his bachelor of science degree in mechanical engineering from Swarthmore College in 1946. He was a research engineer with Pratt and Whitney Aircraft from 1946 to 1947, and for the next two years was sales engineer for Newton Company of Manchester, Conn.

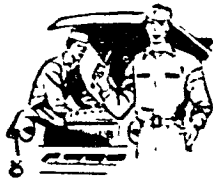

In 1949, Pixton received a master of arts degree in history at the University of Connecticut, and in 1952 a doctor's degree in history at the University of Chicago.

Prior to coming to the University, Pixton was a research associate in the Graduate School of Business Administration at Northwestern University.

Braun to Give Speech At Chemistry Seminar

Dr. Walter G. Braun, associate research professor of chemical engineering, will speak on "Analytical Applications of Raman Spectroscopy" at a meeting of the Analytical Chemistry seminar at 1:10 p.m. today in 104 Osmond.

JACK WIMMER says

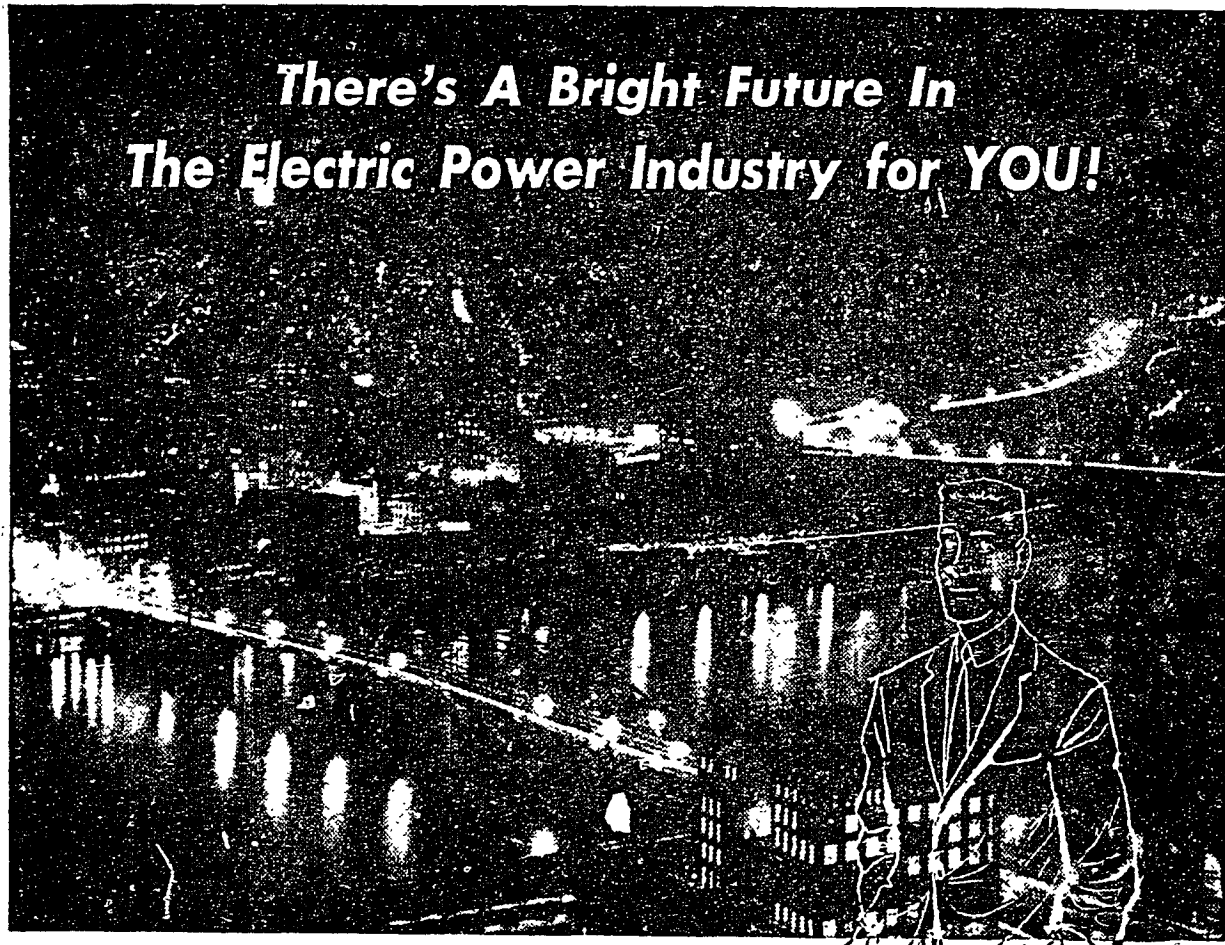

January 31st is the last day for State inspection, so stop TODAY to have that defective muffler replaced, brakes relined, wiper blades replaced, etc., before inspection.

There's A Bright Future In The Electric Power Industry for YOU!

THE electric power industry is unique because the product it manufactures is indispensable to the growth and prosperity of our nation and its people. Everywhere you look, lights are burning, machinery and equipment is running, all because of electricity. And this great need for electricity is constantly growing—in fact, will be doubled in the next ten years.

The Pennsylvania electric power companies are preparing to supply the additional power which will be needed in the coming years, but they need qualified young men to help them NOW. Young engineers schooled in thermodynamics, electronics and fundamental engineering, are needed to advance the art of power generation, distribution utilization, system planning and area development. This wide range of interests plus a solid, promising future is waiting for the men who can qualify.

Plan now to talk to your placement counselor or to the personnel director of one of Pennsylvania's electric power companies. Or, write to Pennsylvania Electric Association, State Street Building, Harrisburg, Pa., stating where you would like to live and work.
