

# Honor Code Signers May Get Privileges

The Women's Student Government Association Senate has given a vote of confidence to a recommendation that women who have signed the WSGA Honor Code be given additional privileges, or "responsibilities."

As to what might be included no specific suggestions were made, although freedom from signing in and out of the dormitories was suggested.

## Political Parties Set 2 Meetings

Two political parties will open their spring political seasons tomorrow.

University party will hold its first mass meeting at 8 p.m. in 10 Sparks to elect officers.

The Lion party Steering Committee will meet at 2 p.m. in 203 Willard to begin organization for the spring campaign and to discuss potential candidates.

Following election of party officers, members of the University party will elect party class officers and organize committees. The party's steering committee met Wednesday.

## Lab Personnel Director Writes Journal Article

Arnold Addison, personnel director of the Ordnance Research Laboratory, is the author of an article published in the College and University Personnel Association Journal for January.

The article is entitled "An Evaluation of the Effectiveness of a University Personnel Committee."

During discussion, Mrs. R. Mae Shultz, assistant to the dean of women, gave several incidents where the only way of locating coeds involved in accidents was through the sign out sheet, and Senate members supported the opinion that signing in and out is primarily a safety measure.

The matter was referred to the Implementations Committee, for new ideas.

Susan Whittington, junior in arts and letters from Arlington, Va., was appointed co-chairman of the Implementations Committee to replace Sybil Kersh, who resigned.

It was announced that nominations have been held for dormitory officers in all women's dorms and final elections will be held Wednesday night.

Candidates are required to have a 2.5 all-University average and no major judicial record.

Mary Lytle, junior in education from Clairton, was appointed chairman of the big-little sister program.

Hannah More, famous woman author of the latter part of the 18th Century, always insisted on being called "Mrs. More". However, she never married.

# Let's discuss CAREERS

(not jobs)

in Guided Missiles

FEBRUARY 10, 11, 12

If you're interested in guided missiles (and you should be because it's the fastest growing engineering field today), you'll be wise to talk to Bendix. As prime contractor for the vital Talos Missile, Bendix is big league. If you work for Bendix Guided Missiles, you work with the top men in the field, using facilities and equipment that are virtually unmatched. The future of Talos is one of ever-increasing research, development and test programs. That means you'll grow, too, just as fast as your talent and ambition will let you. Interested? Then, we'd like to talk to you. Make your appointment now.
