

# BusAd Council Refers Honor System to Faculty

The Business Administration Student Council has referred the possibility of starting an honor system in the college's "400" courses to the faculty for discussion at their meeting March 11.

Ossian R. MacKenzie, dean of the college, made the suggestion to refer the subject to the faculty after hearing the report of the council's committee on academic honesty Wednesday. The committee's report was based on the findings of the Subcommittee on Academic Honesty of the Senate Committee on Student Affairs. The senate committee's report showed department heads believed cheating was one-third of the way toward occasional from rare.

Council members felt by trying the program out on the "400" courses the success or failure of the plan could be seen. If successful the plan could then be extended to lower undergraduate courses.

Some members of council said they believed some "400" courses now are under some form of honor system. The Senate subcommittee's report also states that graduate students are often given take-home closed-book examinations.

The council's committee report will now be duplicated for dis-

tribution to the faculty. The final decision on the matter of an honor system, however, lies in the hands of the individual instructor.

MacKenzie also announced that a committee has been formed to look into the possibility of founding a scholarship fund in honor of the late George L. Leffler. He said it was Mrs. Leffler's idea that any memorial be in the form of either a donation to the heart fund or a memorial scholarship.

The council sent the idea to committee to study the amount that is available for donation to the fund.

## Gymnasts--

(Continued from page seven) part of the list of new additions of this week's "Gymnastic Top Tunes of the Week": "Fascination," "Around the World in 80 Days," "Melodie D'Amour," and "Catch A Falling Star" (for the flying ringmen).

# Traffic Court Imposes Fines Totaling \$20

Six students have been fined a total of \$20 by traffic court. Sixteen students appeared before the court Monday. Fines included \$9 for parking violations, \$10 for not registering vehicles or not displaying sticker and \$1 for failing to report to the campus patrol after receiving a ticket.

Eight students who failed to appear were automatically fined a total of \$61. The fines were \$26 for parking violations, \$30 for not registering and displaying window sticker and \$5 for failing to report a ticket.

Three students had fines suspended, seven had cases dismissed and two had part of their fines suspended.

One student was found guilty of his fifth violation and will have his car sent home for the semester. Another was found guilty of his fourth offense and will have his campus driving privileges suspended for 60 days.

## Prof to Speak in N. J.

Dr. Robert W. Taft Jr., professor of chemistry, will address the American Cyanide Company Wednesday at Bound Brook, N.J.

European eels have more backbone than American eels.

# Borough Authority Buys Lot For Proposed Parking Site

The State College Parking Authority has purchased the property of Morris I. Fromm at 118 W. Beaver Ave. for a proposed off-street municipal parking lot.

The total price agreed on was \$46,513 determined on the same basis, per front-footage, as that of the adjoining property purchased earlier from M. S. McDowell.

The sale brings the total front-footage purchased on Beaver Avenue, just west of Allen Street, to 100 feet. Still under consideration is the Centre County Film Lab property, on the other side of the Fromm site. It has a front-footage of 50 feet but tapers to about 24 feet in the rear.

The Authority reported that negotiations are still continuing for additional sites in the borough. Borough Manager Robert Y. Edwards yesterday said, "I do not anticipate completion of any parking facilities before September 1958."

## Geology Summer Camp Forms Are Available

Registration statement forms for geology summer camp courses may be obtained in 110 Mineral Sciences.

They must be returned to the geology secretary by March 3. The courses will be held at the Mineral Industries camp during June and July.

## Rotation--

(Continued from page one) look, Miss Jablonsky expressed the pro-rotation sentiment heard several times around the Cabinet table: "It's here for a reason."

Joseph Boehret, All-University Secretary-Treasurer, advised Cabinet members that they themselves voted in the present rotation system—revising the older one—last spring and that they "must have had a reason for it."

Patricia Moran, Home Economics Student Council president, answered that the former rotation system "did not fit the needs of the problem at all."

## Automation Laboratory Receives Punch Press

The Wiedemann Machinery Co. of Philadelphia, manufacturers of heavy duty sheet metal press equipment, and the Resch Machinery Co. of Pittsburgh, have donated a new punch press to the Automation Laboratory for use on development operations.

### PERSONAL

EVERYTHING IS reversed at Phi Kappa Sigma on Sat. Girls get your dates early.

## ESSO RESEARCH works wonders with oil

Laces and leathers and dozens of things

Ski boots lace easier and faster, stay comfortably tight. They do so because the rawhide leather has been made more pliant with a special treatment perfected by Esso Research. The leather in the skier's boots, the wool in his socks—even the lacquer on his skis—were also made better with the help of other products derived from oil. **ESSO RESEARCH works wonders with oil.**
