

# Indonesian Rebel Forces Retake Vital Oil Center

SINGAPORE (AP)—Indonesian rebels announced last night they had retaken the vital oil center of Pekanbaru and that an advance guard of a Achinese Moslem warriors had reopened the fight for Medan in North Sumatra.

Some 250 U.S. businessmen, teachers and missionaries in Medan were ordered by the U.S. consular office there to evacuate the key port city.

# Havana Awaits Batista's Move In Cuban Revolt

HAVANA (AP) — Streets and stores were almost deserted yesterday as Havana awaited the next move in President Fulgencio Batista's struggle to retain control of Cuba.

Batista showed no signs of yielding to an ultimatum from rebel leader Fidel Castro or to demands by civic organizations that he resign. He continued to direct his top army and police chiefs in an intensified campaign to crush the spreading rebellion.

It seemed clear Batista is determined to keep the presidency until elections June 1.

Castro's ultimatum said unless Batista resigns by early April the rebels will wage "a fight to the finish."

Within hours after Castro's threat 42 religious, professional, fraternal and other organizations demanded that Congress be dissolved and all major factions be allowed to form a provisional government.

In the tense hours following the civic leaders' manifesto and Castro's ultimatum Havana's business was crippled. Merchants complained that no one was on the streets and no one was buying.

# Gaillard Receives Vote of Confidence

PARIS (AP)—French deputies yesterday voted a constitutional reform few of them liked rather than throw out Premier Felix Gaillard at a time of crisis with the Paris police.

They voted 282-196 for the general principle of Gaillard's plan to strengthen the executive at Parliament's expense. But there were many abstentions.

If the legislation goes through all its later stages, together with an electoral reform bill also planned, it will be harder for French governments to be toppled from office, easier for the National Assembly to be dissolved.

The confidence vote, which Gaillard demanded to win passage of the reforms, was the 11th he had won in little more than four months as premier.

The vote was taken as thousands of gendarmes and riot police—one Paris newspaper put its estimate as high as 35,000—were in the city to keep order after Thursday's police demonstrations for higher pay.

Security forces also were out to avert any disorder from two political meetings, one called by the Communists and the other by extreme rightist groups. Both broke up quietly.

At one point in the rightist rally a group of men in parachute troop berets booed the United States and shouted "Algeria is French." This outburst came when the chairman read a news dispatch from Tunis reporting increased U.S. action to keep North Africa aligned with the West.

# Charge Made Of Perjury In TV Case

WASHINGTON (AP)—A question of possible perjury was raised yesterday after four witnesses cast doubt on at least some statements attributed to them during the House investigation of the Federal Communications Commission.

Rep. Charles Wolverton (R-NJ), senior Republican on the investigating subcommittee, said the Justice Department should get a hearing record "to ascertain by whom perjury may have been committed."

He said the four witnesses denied, at least in part, statements attributed to them by A. Frank Katzentine, who lost a Miami TV license fight to a subsidiary of National Airlines.

Chairman Oren Harris (D-Ark) told reporters after the session that the Justice Department already is getting a transcript. However, he said the committee would decide later what to do about Wolverton's suggestion.

Wolverton said an affidavit by Katzentine had been more or less a basis for the investigation. In it, and in subsequent testimony, Katzentine charged that the Miami Channel 10 contest was "fixed" in favor of the airline.

Publisher John S. Knight testified that a National executive acted "extremely confident" the airline would win the license more than a year before the FCC rendered its decision.

# Russia Tops U.S. in Doctors

By THE ASSOCIATED PRESS  
The Soviet Union has about 50 per cent more doctors than the United States.

According to the latest Moscow statistics, Soviet medical schools are graduating more than twice as many doctors as from U.S. medical schools.

Reflecting in part this Soviet effort on the health front is the fact that the death rate in the Soviet Union is more than 20 per cent lower than in the United States.

The low Soviet death rate—lowest in the world—reflects not only efficiency of the Soviet health system but also the fact that, due to heavy World War II losses, the proportion of older people in the Soviet population is lower than in the United States and other Western countries.

# Unknown Object Spotted

SAN FRANCISCO (AP) — An underwater contact with an unidentified object off the northern California coast was reported by a Western Sea Frontier spokesman yesterday.

# Stock Market Still Down

NEW YORK (AP)—The stock market tried to come back late Tuesday but finished in the minus column for the third straight session.

# Dulles Kills Russian Proposal

WASHINGTON (AP)—Secretary of State John Foster Dulles turned down yesterday Russia's demand that international control of outer space be linked with elimination of American overseas bomber bases.

"They are mixing up two things that are quite unrelated," he told newsmen on his return by plane from a 10-day trip to the Philippines and Formosa.

In discussing the Russian plan for space control, Dulles in effect accused the Soviets of stealing an American idea and attaching impossible conditions to it as a device for killing it.

He recalled that President Eisenhower already has formally proposed an international agreement to limit use of outer space to peaceful purposes.

Dulles' words appeared clearly directed at two purposes:  
• Offsetting propaganda gains Moscow has registered since unveiling its proposal Saturday.

# Storm Blows in Senate Over Kohler Co. Strike

WASHINGTON (AP)—A storm blew up in the Senate yesterday over the motives and methods of the special Senate committee investigating the bitter, four-year-old Kohler Co. strike.

Sen. Wayne Morse (D-Ore) accused the committee of using the inquiry as a springboard for an attack on the United Auto Workers and other unions.

# Year Cited as Best In UN by Lodge

WASHINGTON (AP) — This has been one of the United States' best years in the United Nations General Assembly, Ambassador Henry Cabot Lodge told Republican women Tuesday.

Despite the Sputniks, the U.S. delegate to the U.N. said in an address to some 1700 persons at the Republican Women's National Conference, U.S. prestige has not been lost in that world forum.

The Soviet Union, he said, has been "resoundingly defeated on several important matters," notably attempts to get Red China into the U.N.

Lodge told the women that U.N. diplomats are wise about power politics and "at heart they want us to be successful."

Ireland has an area of 32,600 square miles.

Their invention of the wheel was in about 3,000 B.C.
