

# Lion Cindermen Place 3rd, Michigan 1st at Quantico

By MACK McGAUGHAN

Penn State's cindermen finished third as a well conditioned University of Michigan track team walked away with first place honors in Monday's quadrangular meet at Quantico, Va.

The Lions had to contend with Michigan, Purdue, the Quantico Marines, winds up to thirty miles per hour, a soggy track and a lack of practice due to the prolonged snows.

The Wolverines racked up 94.5 points to 47 for Purdue, 42 for the Lions and 34 for the Marines. The Wolverines took eleven of nineteen first place honors.

Co-captain, Jim Norton tallied the Nittany's only win with a 50.0 second time in the second heat of the quarter-mile run.

Dick Hambright, sophomore flash, ran in the first heat of the 440 and turned in a time of 49.9 seconds. Hambright, however, could only account for a second place.

Hambright was running second as the pack rounded the first turn. He dropped to fourth in the back stretch and started an all out kick on the last turn, but could not catch the front running Jim Etherton of Purdue.

One of the bright spots in the Penn State performance was the running of Bill Schwab. Schwab led the pack from the gun in the

Hambright

half-mile run but was nipped at the tape by Bill Deardorf of Michigan.

The Nittany mile relay team took a third place with Schwab bouncing back after the grueling 880 to turn in a speedy 49.6 in the second leg of the relay.

The cindermen leave for Quantico Friday to participate in the Quantico Relays. They will again have the services of distance ace Ed Moran who didn't make the last trip due to a death in his family.

### Track Summaries:

Mile Run—1. Swartz, M; 2. Gray, M; 3. Kerr, PSU; 4. Murphy, Q; 5. Engelbrink, PSU; 4:24.6  
 440—1. Etherton, P; 2. Hambright, PSU; 3. Mathison, M; 4. MacRae, Q; 5. Poust, PSU; 49.5  
 410 (2nd Heat)—1. Norton, PSU; 2. Simpson, M; 3. Haldreidige, P; 4. Sims, M; 50.9  
 100—1. Parker, M; 2. Christy, M; 3. King, P; 4. Cotton, PSU; 16.6  
 100 (2nd Heat)—1. Watkins, M; 2. Williams, M; 3. O'Connor, PSU; 4. Szeller, PSU; 16.5  
 120 High Hurdles—1. Stenger, M; 2. Stillwagon, P; 3. Farcira, PSU; Walker, Q; 15.4  
 120 High Hurdles (2nd Heat)—1. Huffman, P; 2. Trobridge, M; 3. Norris, P; 4. Fehlen, Q; 16.1  
 220—1. King, P; 2. Christy, M; 3. Szeller, PSU; 4. Watkins, M; 23.9  
 220 (2nd Heat)—1. Mathison, M; 2. Moran, PSU; 3. Sterling, M; 4. Thomas, PSU; 22.9  
 880-Yard Run—1. Deardorf, M, 1:55.5; 2. Schwab, PSU; 3. Barin, M.

# Snead Seeks Greensboro Golf Title

GREENSBORO, N.C. (AP)—The \$15,000 Greater Greensboro Open Golf Tournament, one of the oldest fixtures on the pro circuit, opens here Thursday with ageless Sam Snead seeking to win the event for the seventh time.

Snead won the 1938 inaugural and since then won here five more times. The last Snead victory came two years ago. Over the last nine years the sweet swinger from White Sulphur Springs, W. Va., has won four times, lost once in a playoff and never finished out of the top 10.

Four 18 hole rounds are scheduled daily over the Star Mount Forest Country Club course, a 6700-yarder with 35-36-71 par. The starting field of about 135 will be shaved to about 70 or 80 for the last two rounds Saturday and Sunday.

Arnold Palmer, newly crowned Masters champion, is not here due to other commitments, but the field doesn't lack class.

Ken Venturi, winner of three winter tournaments, Canadian Stan Leonard, who won here a year ago, and such stalwarts as Art Wall, Doug Ford, Mike Souchak, Julius Boros, and Billy Maxwell are among the top Snead challengers.

William T. "Mother" Dunn, a retired medic now living in Hawaii, was Penn State's first all-America football player in 1906.

# LaX Team Loses Opener at Hofstra

Lacrosse coach Earnie Baer is thinking about changing the name of the annual Easter trip to the Disaster trip. It seems his Lion stickmen have had a bad habit of starting their season on Long Island during the vacation lull and losing the openers to Hofstra College, this time 13-2.

"The defense was tough in the second half," commented freshman coach Lou Girard.

Chip Henderson and Barry Price did the scoring for Baer's charges. Both were playing in their first varsity encounter. It was evident that the offense is missing the services of ace scorer Bill Hess.

The Lion senior broke the Penn State scoring record in his sophomore year with 41 goals and re-broke his own record last year with a 49-goal output. But he cracked a pair of ribs while playing another sport and missed the Easter trip. Baer does not plan on using him this weekend at either Loyola or Navy.

One of the players who made the trip had a concise comment on the attack, "Our offense was terrible. Nobody was shooting."

The same athlete did concur with Girard that the team "came along as the trip progressed." He was particularly referring to the defense and teamwork which

Baer himself admits needs more work.

"We just haven't been able to get the team working together enough, with this weather," complained Baer. "But our defense was pretty solid and the guys were in there fighting—they did not tire out, physically."

The second-year mentor particularly praised the work of defenseman Raly Tuleya, Cove Elder and griddler Dick Dill, the latter two playing in their first game for the Blue and White. Baer was also high on the double-duty work of mid-fielder-attackman Johnny Behne.

The stickmen turn south tomorrow and Saturday for games at Loyola and Navy.

Only baseball preceded football as an intercollegiate sport at Penn State. Basketball was the third sport to be added.

R. E. "Bob" Galbraith, still on the staff as professor of English composition, was Penn State's first swimming coach in 1936.

or graduate study

**MS, PhD CANDIDATES**  
Choose direct assignment

## ... As an RCA Engineer

Receive your MS in Electrical Engineering, Mechanical Engineering or Physics at RCA's expense, through the RCA Graduate Study Program. At the same time, you're beginning your RCA career as an engineer on a fully professional level, getting a head start in the field you prefer. RCA pays the full cost of your tuition, fees and approved texts while you take graduate study part time at the University of Pennsylvania or Rutgers University.

Or, you may prefer a different path ahead... RCA Design and Development Specialized Training. Here is another of RCA's programs for careers, in which you begin by working full-time on planned technical assign-

ments. Experienced engineers and interested management guide your progress. You may receive assignments in design and development of radar, airborne electronics, computers, missile electronics, television, radio and other equipment fields, as well as in Electron Tubes, Semiconductors and Components. MS, PhD Candidates are eligible for direct assignments in the above mentioned fields.

There's a lot more that's extremely interesting about an RCA engineering career. You should have these facts to make a wise decision about your future. Get them in person very soon when an RCA engineering management representative arrives on campus—

April 16, 1958

Mr. Robert Haklisch, Manager  
College Relations, Dept. CR-11  
Radio Corporation of America  
Camden 2, New Jersey

Right now, though, see your placement officer. Get squared away on a specific time for your interview. And get your copies of the brochures that also help to fill you in on the RCA picture. If you're tied up when RCA's representative is here, send a resume to:

Open Letter to the  
MECHANICAL AND  
METALLURGICAL ENGINEER

Are you aware of the fact that over 40 per cent of our sales are in the non-chemical field; that we manufacture such products as "Winchester" firearms, "Western" brass, "Western" cartridges, "Ramset" powder actuated tools, "Olin" aluminum, "Frostkraft" packaging materials and "Ecusta" fine papers?

We are completing the construction of a multi-million dollar aluminum fabricating plant near Clarington, Ohio, and are expanding our nuclear fuel program at New Haven, Connecticut. We have recently established a Metallurgical Research Division and are in the process of staffing it.

As you can see, these are the types of operations requiring engineers such as yourself. For more detailed information, you should contact your placement office.
