

New Curriculum Planned For Freshman Engineers

The College of Engineering will institute a new curriculum program next fall designating all incoming freshmen as students in "engineering" without any departmental majors.

The new system has been worked out by Dr. O. E. Lancaster, George Westinghouse professor, as part of his research in better methods of engineering education.

Baker Wins Architectural Design Contest

Mark Baker, senior in horticulture from Lima, won first prize in an architectural design competition which was presented as a live site planning problem to Landscape Architectural Site Planning 462.

Baker received a first place cash award of \$25. The second prize winner, Daniel Pasquarelli, senior in horticulture from Pittsburgh, received \$15 and Larry Ridenour, senior in horticulture from Chambersburg, received a \$10 third-prize award. The three \$5 honorable mentions were awarded to Larry Reader, Delbert Ellis and Richard Wilkinson.

The site planning problem, was suggested by the Clifton E. Rodgers Assn., a city planning firm in Harrisburg. Rodgers, as planning consultant to Springettsbury Township, near York, was considering the problem of laying out a civic center. The site planning class surveyed the 44 acres of land and each prepared a plan locating civic buildings such as a library, art center, parking lot, and recreation center.

The township will start building on the planned sites this year.

AROTC Sees Air Exhibition

Army ROTC cadets yesterday witnessed a demonstration of Army Aviation at the University air strip given by Second Army Aviation Personnel from Ft. George G. Meade, Md.

The team demonstrated the use of helicopter in medical evacuation and wire laying jobs and the use of small fixed-wing planes in resupply, using both paratroop and free drop; in message drop and pick-up; and in laying smoke.

The demonstration was concluded with familiarization rides for 40 cadets.

Fresh Customs Board Forms Due Saturday

Applications for the Freshman Customs Board must be filed by Saturday at the Hetzel Union desk.

Second semester students with a minimum 2.0 All-University average may apply. Students will be notified of appointments for interviews for the board.

AIM Board OK's Indie Encampment

The Association of Independent Men Board of Governors voted unanimously Wednesday night to hold a 1-day Indie Encampment Sept. 13.

The board also approved four amendments to the AIM constitution and by-laws in the second of two required votes. The amendments make it possible for fraternity pledges living in residence halls to vote in their hall elections, hold offices in their hall units and sit on residence hall councils. However, they may not hold offices in the residence councils nor be representatives to the AIM board.

The Indie Encampment, which will include members of Leonides and guests, will be patterned after the annual Student Encampment held each fall at Mont Alto by the Student Government Association.

The board voted to appropriate \$200 in next year's budget to cover the expenses of the encampment. A final vote at the next meeting will be necessary to approve the appropriation. No definite decision has been made as to location of the encampment.

A motion to donate \$50 from the AIM budget to the World University Service drive was defeated when the board voted to postpone consideration of the motion until the budget could be studied to see if it could afford the donation. However, the board went on record as supporting WUS.

Louis Wonderly, past secretary of the AIM Board of Governors, Carl Smith, AIM vice president and past president of the West Halls Council, and Alexander Kraner, president of the West Halls Council and past council vice president, were nominated for the AIM Outstanding Independent Award to be presented at the annual AIM-Leonides banquet at 6:30 p.m. Sunday in the State College Hotel.

25 Fresh Women Tapped for Cwens

Twenty-five freshman women have been tapped for membership in Cwens, sophomore women's hat society.

They are: Elizabeth Barlow, Louise Bederka, Joyce Carson, Linda Harmon, Henrietta Harris, Elizabeth Ingley, Jane Ingley, Joan Kemp, Jacqueline Leavitt, Margaret McPherson, Linda Miller, Barbara Moore, Nancy Navikas, Nancy Nicholson, Barbara Polansky, Roberta Engelbrink, Susan First, Sheila Gallagher, Nancy Gilliland, Jane Lambert, Bonnie MacLean, Kathryn Moyer, Sue Smithson, Jane Taylor and Lucille Thiessen.

University Releases Conflict Schedule

The conflict final examination schedule has been released by the University.

Students taking conflict examinations will be notified by their instructors.

Only students whose names appear on the instructors list will be permitted to take these examinations.

Freshmen must take a 2-hour orientation course to acquaint them with every aspect of the engineering field. Under the present system, orientation is centered around the functions of the student's major department.

Many times, said Dr. Lancaster, freshmen apply for a certain curriculum without really knowing about opportunities in other fields.

Since basic courses such as mathematics and physics are the same for all first year students, they now receive the same instruction they are to get under the new plan. The basic difference will be more emphasis on engineering as a whole and the relations between its various fields.

Another phase of the new program has been in effect this year. Groups of students were given similar schedules so that they remained together throughout the day.

According to Dr. Lancaster, this offers a remedy for one of the disadvantages of a large university — the difficulty freshmen have in getting to know each other and their instructors.

A new quota system in the engineering college will also go into effect in September. After the freshman year of orientation, students will indicate three preferences for a major field.

Each of the six departments will have a quota based on how many students their facilities can accommodate. If too many students apply, those with the highest averages will be accepted, and the others given their second or third choice.

Formerly, students were eliminated by an initial admittance quota instead of by their record here.

BusAd to Seek Fall Function

The Business Administration Student Council voted Thursday to make every effort to hold next year's Career Day during the fall semester.

The motion was made by Theodore Wexler, senior representative, at the council meeting Wednesday. The first part of the motion was that the council again sponsor the annual career day program.

Wexler said the council would be able to obtain better speakers if the program is held in the fall.

The tie for the last junior seat on the council between Wayne Mason and William O'Neill will not be broken until the next council meeting.

The council also voted to extend the annual challenge to the business faculty for a softball game.

Chem Prof to Give Paper in England

Dr. Arthur E. Woodward, assistant professor of chemistry, will present a paper entitled "Dynamic Mechanical Behavior of Partially Crystalline Polymers" before the plastics and polymers group of the Society of Chemical Industry in London, England, next week.

Woodward also will visit industrial and university research laboratories in Belgium, France, England, Germany and Holland and will lecture at various institutions on the continent.
