

# DOC Library Gives Data on 1000 Jobs

Do you want to know what the job opportunities are in Bali?

Or do you think you could earn a living prospecting for uranium?

One place on campus where you might be able to find

out is the extensive library of occupational information maintained by the Division of Counseling.

Directed by Dr. George R. Hudson, associate professor of education, the library contains information not only about conventional occupations but also about many out-of-the-way fields.

But few students find their way to the library in 401 Old Main to consult its files, according to Hudson and his assistant, Mrs. Maureen Moon.

The information covers job descriptions, training requirements, future prospects and current salary ranges for vocations from an able seaman to a zoologist—about 1000 occupations in all.

The information has been accumulated since the founding of the Student Advisory Service shortly after World War II and, according to Hudson, has cost the University \$10,000.

The sources for obtaining this wealth of information include government bureaus and departments, commercial publishers and professional and trade associations.

Hudson said that his office works in conjunction with the colleges of the University and has suggested, in some instances, that faculty members write pamphlets on occupations not sufficiently covered by other sources.

Hudson points out to students visiting the library many useful books to aid them in choosing a vocation. There are volumes on professional occupations, industrial and government jobs, military careers, work in foreign countries and many others.

The library also includes data on junior colleges, technical and business schools, other universities and graduate schools.

MODERN INTERIOR DECORATING is a little "up in the air" in the Department of Home Arts display, "Background for Living," in the Hetzel Union Building. Susan Rosenbach, freshman in home economics from Pittsburgh, and Eva Katz, freshman in education from Pittsburgh, view the display.

# Popp, Huber Will Retire First of July

Dr. Henry W. Popp, professor and head of the department of botany and plant pathology, and Dr. Lawrence L. Huber, who is in charge of hybrid corn breeding, will retire July 1.

Popp has served on the faculty almost 40 years. He received his master of science and doctor of philosophy degrees from the University in 1922 and 1926. He was an associate of the National Research Council and has also been active in the Botanical Society of America.

Huber, who has served on the faculty for 15 years, completed his undergraduate work and advanced study at Ohio State University. When he came to the University, there were no corn hybrids grown in Pennsylvania that were certified as Pennsylvania hybrids. Now 16 of the 24 hybrids certified by the State Department of Agriculture are of Pennsylvania origin.

Huber has served as chairman of the Northeast Corn Improvement Conference.

Both Huber and Popp have received the title of professor emeritus from the Board of Trustees.

# Enrollment Represents 35 States

In analyzing current undergraduate enrollment, C. O. Williams, dean of admissions, noted the cosmopolitan nature of the student body as shown by a representation of 35 of the 48 states, 34 foreign countries, the Canal Zone, Hawaii, Puerto Rico and the District of Columbia.

"Even before the war, but more especially since the war, Penn State has endeavored to promote international understanding by welcoming foreign students to its campus," Williams said.

Rounding out the undergraduate enrollment of more than 12,000 students are the traditional 90 per cent or 10,800 students from Pennsylvania's 67 counties.

Allegheny County, with 1143 enrollees, Centre County with 918 and Philadelphia County with 711 annually, lead.

Others in the higher brackets are Montgomery, 494; Delaware, 489; Luzerne, 432, and Westmoreland, 371.

Neighboring New Jersey, with 355, and New York, with 339, furnish one-half of the approximately 1200 out-of-state students.

Foreign students number 43, led by Canada with eight, Indonesia with six and Iran with five.

# Five to Discuss Mining Careers

A five-man panel will discuss the opportunities that exist within the various branches of the mining industry at 7:30 a.m. Wednesday in the Mineral Sciences Auditorium.

The panel members will represent the fields of coal and metal mining, mining research, government and mining equipment sales. This forum is sponsored by the American Institute of Mining Engineers.

The speakers will include: Harold J. Rose, vice president of the Bituminous Coal Research, Inc.; Robert H. Milligan, director of Personnel Development at the Joy Manufacturing Co.; and John Todhunter, superintendent of the Barnes and Tucker Coal Co.

## AIM Applications Available

Applications for AIM committee work are available at the Hetzel Union desk.

# Coal, Steel Papers Placed in Library

The Pattee Library has been designated a depository for documents and publications of the European Coal and Steel Community.

The European Coal and Steel Community, established in 1952, is made up of six countries: Luxembourg, France, Italy, Belgium, The Netherlands and West Germany. The publications will be placed in a reference department of the main library, except for those of a technical nature which will be available in the Mineral Industries Library.
