

IE Prof to Further European Automation

Chester Linsky, associate professor of industrial engineering, will organize automation programs throughout Europe next year.

Linsky will be working with the European Productivity Agency, a division of the Organization for European Productive Cooperation. His work will be conducted primarily with groups of small manufacturers, technical organizations and colleges and universities.

Ed Groups Display Art In Library

School work done by primary and elementary education groups from special schools in Pennsylvania is on display on the second floor of the Pattee Library.

The exhibit was set up by the Department of Special Education.

One of the displays includes pictures of retarded students in the Wilson School, Carlisle, Pa. Along with the pictures are class study charts which give the chronological age, mental age, IQ and academic achievements of the children. Another chart shows their physical status, emotional status, home life and ability to get along in a group.

School work by the children includes an arithmetic worksheet, pictures illustrating safety rules and a story about Abraham Lincoln. Cards are attached to most of the items giving the chronological age, mental age and IQ of the student who did the work.

Another display shows work done by handicapped and gifted students from schools in Pittsburgh, Lock Haven and Philadelphia. The display includes samples of finger painting, sponge and string painting and turpentine painting. Pictures from the Widener Memorial School, a school for handicapped children in Philadelphia, show some of the children in their classrooms.

Ed Group Elects Head

William Adair has been elected president of the Industrial Education Society.

Other new officers are Charles Lamb, vice president, and Robert Jones, secretary-treasurer.

In Europe his assignment will be similar to the work he has done at the University in helping the small manufacturer determine how he can benefit from automation.

Linsky organized the automation program at the University which has attracted international attention and also has conducted the annual seminar on automation.

While his headquarters will be in Paris, he will travel through many of the European Productivity Agency countries which include Portugal, England, France, Italy, Yugoslavia, Greece, Austria, Germany, the Scandinavian countries and the Benelux countries.

In each country he will be assisted by a resident engineer and technician.

His assignment also includes a study of European manufacturing processes and automation techniques and the use of European products as well as American devices in building automation models.

Linsky served under the sponsoring of the international Cooperation Administration as a consultant for the U.S. Delegation to the International Automation Conference in Paris, France, in April, 1957.

Deposit Due Today For Canoe Trip

Today is the deadline for handing in a deposit of \$15 to insure a place in the Outing Club's co-educational canoe trip to Canada.

Anyone interested in going on the trip, which will take place the first week in September, may call Janice Sidehammer, ext. 1115.

All those who sign up for the trip will meet at 7 tonight in 243 Recreation Hall.

8 on Faculty Announce Resignations

Dr. Guilford G. Quarles, director of the Ordnance Research Laboratory since 1952, has resigned from his position, effective April 20.

He has been on leave of absence since Nov. 1, 1956, serving as scientific and technical advisor to the commanding general, Army Ballistic Missile Agency, Redstone Arsenal, Huntsville, Ala. Dr. Benjamin L. Snively has been serving as acting director of the laboratory and visiting professor of engineering research.

Dr. William C. Bramble, professor of forestry, head of the Department of Forest Management, and in charge of the School of Forestry, has resigned, effective June 30. He will accept a position as head of the Department of Forestry and Conservation at Purdue University.

Dr. Henry G. Lew, professor of aeronautical engineering, has resigned to accept a position with General Electric Co., Missiles Ordnance and Systems Department. He had been on leave since Sept. 1.

Dr. Roger R. Yoerger, associate professor of agricultural engineering, has resigned, effective July 15, to accept a position at the University of Illinois.

Resignations in agricultural and home economics extension included Vivian P. Moon, extension home economist, effective June 15; Ruth K. Kreibich, extension home economist, effective June 30; Jane E. Barber, associate extension home economist, effective June 13; and Darcie Lane Rhoda, associate extension home economist, effective May 8.

Engineering Group Elects President

Monte Montgomery, junior from Kane, has been elected president of the American Institute of Industrial Engineers.

Other officers are Robert Wendell, senior from Mt. Holy Springs, vice president in charge of programming; Marshall Slotterback, junior from Warren, vice president in charge of membership; Williams Shields, junior from Indiana, secretary; and Ronald Glenn, junior from State College, treasurer.

'Isolation Chamber' Traps Politicians

"Once we have them in our isolation chambers, they never escape without first committing themselves on many issues they didn't wish to discuss," said George Drout, editor of the editorial page of the Harrisburg Patriot-News, Saturday.

Drout's "isolation chamber" is a press conference room in the newspaper's office and he was referring to politicians when he said they never escape without talking into a tape recording machine.

The use of a tape recording machine to develop news stories on a national, state and local level was explained in a demonstration by the Patriot-News at the 1958 Pennsylvania press conference held over the weekend at the Nittany Lion Inn.

A 3-man team of editorial writers from the Patriot-News presented the demonstration on the use of tape recorders. They explained the use of the machines, the transcription techniques and the editing process which is required after an hour-long interview.

Delegates to the conference heard play-backs from interviews with Harold E. Stassen on his Pennsylvania gubernatorial aspirations, Gov. George M. Leader on the effectiveness of press conferences, Lt. Gov. Roy E. Furman on his campaign plans and President Eric A. Walker on the need for greater educational facilities in Pennsylvania.

"The Search for Tomorrow's Newsmen" was the topic of a presentation moderated by Eugene Goodwin, director of the School of Journalism.

John Vairo, instructor in journalism, told the newspapermen what high school students think of newspaper careers. He said he visited more than 100 high schools in the state and talked with 2500 students interested in high school publications in the past year.

As a second part of the presentation, a panel of graduating seniors in journalism—Edward Dubbs, William Kling, Ralph Manna, Lawrence Jacobson, Marion Beatty and Judith Harkinson—told why they were or were not entering the newspaper business as a career.

Miss Rebecca Gross, editor of the Lock Haven Express, was

-elected president of the Pennsylvania Society of Newspaper Editors Friday. She succeeds George Scott, editor of the Clearfield Progress.

John Quigley, general manager of the Lewisburg Union County Standard-Journal, was elected vice president, and Stanley Thompson, city editor of the Philadelphia Evening Bulletin, was elected secretary-treasurer.

Refugee Tells of Russian Propaganda

By BILL JAFFE
"There is one basic difference between Russian and American textbooks — the facts," Michael Simon, a Hungarian refugee now attending the University, said yesterday.

Simon, a junior in electrical engineering from Budapest, said the viewpoints are widely different and the Russians claim credit for the invention of the radio and the steam engine, to name a few items. These stories are built up by Russian propaganda and go unchallenged by the Russian people, he said.

"Russians have not read a Western version of world history since 1917 and American propaganda is so weak that the real truth is seldom known," Simon said. "It is easy for them to change the facts, as there is no outside communication for the Russian people," he added.

Simon resisted the Russian propaganda as much as possible while attending the Budapest Technical University and while in high school. Students at that

university are forced to take four semesters of Marxism, he said.

Referring to the Hungarian revolution in 1956, Simon said the Hungarians wanted a centralized government, free of communistic control,—but not a true Western form of democracy. They preferred a system similar to the English form of socialized government and control, he said.

Simon, who was recently pledged to Sigma Alpha Mu fraternity, came to the United States on Jan. 4, 1957, and after spending a week at Camp Kilmner, N.J., a refugee center, he was chosen as one of 15 students to come to the campus.

During his first semester he lived with Dr. Charles Hosler, associate professor of meteorology.

When he returned to campus for the fall semester, 1957, he was invited to live at the SAM fraternity house as a guest of the chapter.

"I was just happy being there and couldn't ask for anything else," Simon said. "The pledging ceremony came as a complete surprise.

"The fraternity is the best surrounding I can ever have and I

really feel at home," he said. Simon said the fraternity members and especially his roommate, David Faust, a senior in education from Harrisburg, have helped him with his studies.

"I help when I can in the fraternity," Simon said. "I want to show them how I feel." Simon will go through a special pledge training program which will consist mainly of learning the fraternity's history and symbolism.

Simon tells an ironic story about his mother's flight to freedom. His mother left Hungary for Austria on the last free train on the morning of Oct. 22 and at that time she had no knowledge of the revolution which broke out that same evening.

She was going to Vienna to visit relatives, Simon said, and just waited there until he found her two months later. His mother came to the United States as a refugee and is now living in New York City.

The Department of Theatre Arts presents
2 one-acts by Eugene Ionesco
THE LESSON and VICTIMS OF DUTY
