

Supplies Pour Into Quemoy

TAIPEI (AP) — The Nationalists poured a record quantity of supplies into Quemoy yesterday under Communist guns silenced on the first day of a Red cease-fire. But early this morning the Nationalists denounced the cease-fire as only a lull before a new storm.

Burton Will Retire From Supreme Court

WASHINGTON (AP) — Harold H. Burton is retiring as an associate justice of the Supreme Court, effective Oct. 13.

The White House announced yesterday that President Eisenhower had received a request from Burton for retirement and had approved it with great relief.

Burton, 70, wrote Eisenhower he was stepping down from the high tribunal "with regret but in accordance with competent medical advice and with a desire to serve the best interests of all concerned."

Burton, a former U.S. senator from Ohio, is a Republican. He was appointed to the Court by President Truman on Oct. 1, 1945. Burton's retirement came as the court started its fall term yesterday.

With the eight other members of the court, he joined only last week in reaffirming the tribunal's school integration ruling.

The retirement means Eisenhower now will fill the fifth high court vacancy to occur since he took office in 1953.

McGonigle Outlines New Labor Plan

HARRISBURG (AP) — Arthur T. McGonigle, Republican candidate for governor, outlined a seven-point labor program last night, which he said would curb "the dishonest men giving labor a black eye."

But in this major campaign speech he omitted a stand he took in the May primary campaign opposing a "right-to-work" law for Pennsylvania. Such laws prohibit union membership being used as a requirement to obtain or retain a job.

The GOP gubernatorial candidate made the statement in a 15-minute speech televised on film over a 10-station network.

In another development, the Republican state committee said the prospect of President Eisenhower making a personal appearance in Pennsylvania appeared remote.

Democratic gubernatorial candidate David L. Lawrence campaigned through eastern Pennsylvania yesterday praising the record of Gov. Leader, the man he seeks to succeed.

Lawrence, now serving his fourth term as mayor of Pittsburgh, said Leader, who is the Democratic candidate for the U.S. Senate, has an outstanding record as governor.

Nuclear Weapon Fired by Russians

WASHINGTON (AP) — The Russians fired another nuclear weapon Sunday in their current test series—the fifth detected so far—the Atomic Energy Commission announced yesterday.

A brief statement by AEC Chairman John A. McCone said the detonation had taken place north of the Arctic Circle, the same area where the other four were set off.

Students in Clinton Get Vacant School

CLINTON, Tenn. (AP) — Clinton High School's white and Negro students bounced back lustily yesterday from the dynamite blasts which ripped into their school plant before dawn Sunday.

They cheered, whistled and clapped loudly as Supt. James A. Newman and Principal W. D. Human told of plans to move all of them to a vacant grade school building at nearby Oak Ridge, probably by Thursday.

"We've been knocked down, but we're not out," said Human, to the obvious delight of the assembled students, including 10 of the 11 Negroes. About 85 students, including one or two Negro boys, were absent.

The FBI set up shop in a vacant office across the street from the shattered school and began working in typical closed-mouth fashion to find the culprit in the blast.

Rewards totaling \$60,700 have been offered for the arrest and conviction of the dynamiter.

The state of Tennessee posted \$5,000, and officials of 47 southern cities have a standing offer of \$55,700 for solution of any southern bombings relating to integration.

The explosions, three minutes apart in three separate wings of the school, caused \$300,000 damage to the school, built in 1927.

The school was integrated racially in 1956 under federal court orders, and became the first state-supported high school in Tennessee to mix the races.

Sporadic violence, fanned by convicted racial agitator John Kasper, accompanied the first year of race mixing, but last year and this had been quiet.

Red China Invents Sun With High Temperature

TOKYO (AP) — Communist China has produced a small man-made sun that throws off temperatures of "tens of millions degrees centigrade," Radio Peiping reports. The broadcast gave no details and did not say how the sun would be used.

Almost 46 of each 100 coeds who marry pick out one of the men with whom they associated on campus.

Menshikov Protests Television Show

WASHINGTON (AP) — The ordinarily cheerful Soviet ambassador, Mikhail Menshikov, protested bitterly yesterday an American television show entitled "The Plot To Kill Stalin."

This show, carried by Columbia Broadcasting System Sept. 25, depicted Soviet Premier Nikita Khrushchev as preventing an aide from giving medicine to Joseph Stalin as the Soviet dictator lay dying.

Menshikov went to the State Department with his complaint. "This kind of slanderous attack is incompatible with international standards and inadvisable in normal diplomatic relations."

The State Department took Menshikov's protest under advisement.

Glass Workers Strike For Wages, Procedures

PITTSBURGH (AP) — About 5,000 striking glass workers halted production yesterday at plants of Pittsburgh Plate Glass Co. in Creighton and Ford City.

Wages, incentive procedures and reclassification of duties reportedly are the chief issues in the contract dispute.

Lehigh Freight Derailed

BATAVIA, N.Y. (AP) — Ten cars of a 139-car Lehigh Valley freight train were derailed this morning near a highway overpass east of here.

The wreck tore up 500 feet of trackage, knocked down telephone and power lines and blocked both tracks of the main line.

Seawolf Shatters Underwater Record

NEW LONDON, Conn. (AP) — The atomic submarine Seawolf surfaced yesterday after a record two months beneath the sea and came home in glory. Her skipper said she could have stayed down twice as long.

The Nautilus, America's first atomic submarine, was among the first to congratulate the Seawolf on her record of remaining submerged 60 full days.

The previous record of 31 days, 5 1/2 hours was set last May by another atomic sub, the Skate.

The Seawolf broke water on the edge of the deep Atlantic, about 40 miles from New London, her home port. She then moved in on the surface and tied up alongside her pier.

At a news conference, Laning estimated the time which an atomic sub can remain under the surface at half again or once again as long as the 60-day mark set by the Seawolf.

With Laning at the news conference were several officers and members of the crew, including Lt. Cmdr. John Ebersole, the Seawolf's doctor and an expert on atomic medicine.

Ebersole said that during the 60

days there were only about 35 cases of "routine" sickness. The majority of these were common colds. He said that nothing was related in any way to the prolonged endurance test through which the 116 men aboard the ship underwent. Ebersole also said there were no psychological problems among the big company of men who lived for two months in the confines of a submarine.

Laning said that at one point in the long underwater test, the Seawolf was within a few hundred miles of Iceland, high up in the North Atlantic.

He also said the crew was told

before departure that they would attempt the 60-day submergence record.

The Seawolf will remain tied up for a time at the submarine base while the machinery, the reactor and all other equipment are checked over.

Meanwhile, Laning said, the crew will have leave at home. Then the Seawolf will go out again for more operations before she is put into drydock in January.

The sub, at the yards of the Electric Boat Division of General Dynamics Corp., where she was built, will receive a new reactor.
