

Danish Orchestra To Appear Sunday

By BOBBI LEVINE

Returning alums will get a chance this weekend to experience something they never had when they were here (unless they were here last year)—the University Artists Series.

Those who stay through tomorrow evening will be able to hear the Danish National Orchestra concert which is scheduled for 8 p.m. tomorrow in Recreation Hall.

Tickets for non-students are available at the Hetzel Union desk for \$1.25 each. Students may pick up tickets by presenting their matriculation cards. Tickets will be available until 5 p.m. tomorrow or until the supply is exhausted.

The Danish National Orchestra is appearing here under a program set up by the Artists Series committee, which also arranges University appearances of other artists. This is the second school year that the program has been in effect.

Appearing on the podium to share directing honors will be John Frandsen and Thomas Jensen. Jensen is making his second tour of the United States with the orchestra. The first took place in 1952.

Frandsen, who is making his American debut on this tour, was the conductor of the Royal Opera in Copenhagen for many years. He was born in Copenhagen in

1918 and was graduated from the Danish Royal Conservatory in 1938. He became known to Americans chiefly through his work with the symphonies of Carl Nielsen, Denmark's foremost composer. One of Nielsen's symphonies will be presented at tomorrow's concert.

In addition to his work with the Danish National Orchestra and the Royal Opera, Frandsen held the organist's post at the cathedral in Copenhagen, worked at the State Radio and conducted the Royal Opera Orchestra. He was also head of the University Glee Club, the oldest male choir in Scandinavia and chief conductor of the Danish Choir.

The program which he and Jensen will conduct tomorrow is: Symphony No. 40 in G minor by Mozart, The Swan of Tuonela by Jean Sibelius and Nielsen's Symphony No. 2.

Seniors to Vote On Gift Plan

Seniors in the College of Agriculture who have already had their portraits taken may pick up ballots at the Penn State Photo Shop on which they may vote for a plan to pay for the senior class gift.

The Senior Class Advisory Board is conducting the survey to determine interest in the class gift on the part of all seniors.

The two choices are a campaign on campus to obtain cash donations or a pledge to be paid off in a specified number of years.

Students may write in any other suggestions or indicate that

Pi Kappa Alpha Initiates Engineering Firm Owner

Pi Kappa Alpha initiated Michael Baker Jr., owner of Michael Baker Jr., Inc., world's largest firm of consulting engineers, at 8:30 last night at the Helen Eakin Eisenhower Memorial Chapel.

Baker was chosen as one of six outstanding district University alumni last spring. He spoke at the Interfraternity Council banquet.

they are not interested at all.

Charles Welsh, advisory board president, said at a meeting Thursday that the Alumni Association seems to be in favor of a pledge system. The association will help board members work out the advantages and disadvantages of this proposal.

Pope Pius XII Lies in State U.S. Ready to Suspend Nuclear Weapons Tests

VATICAN CITY (AP)—The body of Pope Pius XII, clad in funeral robes, was brought last night to St. Peter's Basilica where it will be placed to rest tomorrow or Monday.

President Eisenhower is sending Secretary of State Dulles to the funeral of Pope Pius XII.

Nearly a million persons lined the 18-mile route from Castel Gandolfo to Rome, standing in the hushed tribute as the cortege passed by. A procession two miles long accompanied the pontiff's body.

Darkness was falling as the coffin was taken from the hearse and carried slowly into the church. Doors were closed, and outside the great crowd began to slowly and quietly to disperse.

Inside the basilica all the cardinals now in Vatican City waited for the body to be placed on a catafalque in the middle of the church, between the Chapels of the Chorus and the sacrament, midway between the doors and the spot where the papal throne usually is placed.

Nuns and priests of the Vatican staff began a vigil of prayer to continue through the night.

UNITED NATIONS, N.Y. (AP) — Ambassador Henry Cabot Lodge declared yesterday the United States is ready to suspend nuclear weapons tests indefinitely provided there is reasonable year-to-year progress in other fields of disarmament.

But Soviet Deputy Foreign Minister Valerian Zorin replied Moscow would agree to halt tests only if the United States and Britain accept an immediate ban "for all time." He accused the Western Powers of doing all in their power to "barricade and block the way" toward agreement.

Western sources said the sharp U.S.-Soviet exchange in the UN's 81-nation Political Committee foreshadowed possible failure of the U.S.-British-Soviet talks to begin in Geneva Oct. 31 on negotiating a test ban.

The United States warned that President Eisenhower's proposed one-year moratorium on nuclear tests will be nullified if the Soviets continue test explosions after Oct. 31.

At the same time, Ambassador Henry Cabot Lodge declared the United States cannot agree to a complete and permanent cessation of tests until progress is

made on other phases of disarmament.

A General Motors Representative will be on campus to answer questions about job opportunities with GM on

October 14, 15, 16, 17

No matter where your interests lie in the vast field of engineering, there's a better-than-good chance you'll find your place in the sun with one of the 35 Divisions of General Motors.

For these GM Divisions run the gamut of virtually every field of engineering and science—from engineering, designing and producing automobiles, trucks and hundreds of important industrial products to helping to solve the unknown challenges of the Space Age.

Choosing an engineering career with GM means teaming up with some of the world's finest engineering and scientific brains. It means working in pleasant, modern surroundings such as GM's fabulous Technical Center

near Detroit, equipped with every conceivable research facility.

Best of all, it means a future as big as you want to make it at GM's 35 Divisions and 126 plants in 71 cities and 19 states. A future in which your training, your inventive ability, your inquiring mind, your desire to get ahead will receive quick recognition and unlimited opportunities.

You owe it to yourself to investigate the kind of future General Motors is offering young engineers. Make an appointment with the GM Representative next time he visits your campus or write: General Motors Corporation, Personnel Staff, Detroit 2, Michigan.

GENERAL MOTORS Personnel Staff, Detroit 2, Michigan

GM positions now available in these fields for men holding Bachelors', Masters' and Doctors' degrees: Chemical Engineering • Mechanical Engineering • Electrical Engineering • Industrial Engineering • Metallurgical Engineering • Aeronautical Engineering • Ceramic Engineering • Mathematics • Industrial Design • Physics • Chemistry
