

FOODS SERVICE BUILDING ADDITION—This spacious ultra-modern bakery, operating on a part-time basis, supplies all bread and pastries used in the residence dining halls.

New 'Foods' Addition Features Bakery

An ultra-modern and spacious new bakery, which began part-time operations Sept. 4, is but one of the many new features of the addition to the Foods Service Building.

"It's one of the finest of its kind in the country," Robert C. Proffitt, director of food service, said in describing the 20,000-square-foot bakery. The bakery is located in the new building, and the former bakery in the old portion has been converted into a storage room.

The Foods Service Building construction began in August 1957 and was to be completed by June 1958 but the completion has been delayed. The building is expected to be completed shortly while the old foods building is still undergoing extensive remodeling.

The bakery, which operates seven days a week, can produce 1760 loaves of bread per hour and on the average, makes 1000 to 3000 loaves per day. The amount of bread used in the dining halls depends on the day's menu, Proffitt said.

The University bakery supplies all the baked goods for the residence hall dining rooms. Deliveries to the dining hall kitchens are made four times a day.

Other products made in the bakery in addition to bread are pies, cakes, sweet rolls, donuts and hamburg and hot-dog rolls.

The bread-making process is completely automatic and resembles an automobile assembly line. The loaves are molded, baked, cooled, sliced and automatically wrapped in one operation which begins at one side of the large room and continues around the perimeter of two sides.

Rolls can be produced at a rate of 300 per minute. The gas fired oven holds 18 trays of bread. The bakery is able to make 32 different kinds of bread, Proffitt said.

The bakery's operations begin at 5 a.m. and continue until late afternoon when the maintenance crews begin a spotless cleaning of the area.

The new building contains a receiving dock which can unload three railroad cars and six trailer trucks of food simultaneously. Twelve to 14 carloads of frozen food can be stored in the building's new freezing units.

A huge dry-cold storage room, with an 8-carload capacity, will

Harshbarger To Speak At Chapel
