

# U.S. Will Evacuate Families From Cuba

WASHINGTON (AP)—The U.S. Navy has been ordered to evacuate 55 American women and children from an area held by rebels in northeast Cuba.

The State Department, in announcing this last night, said the evacuation will be carried out as soon as possible.

The women and children are dependents of about 25 Americans who work at the U.S. government-owned Nicaro Nickel plant in the north coastal area of Oriente Province.

A State Department spokesman said they will be evacuated by ship "with the knowledge and consent of the Cuban government."

Cuban rebels moved into the vicinity of the plant within the past few days after Cuban government troops pulled out of the region.

The evacuation decision came about six hours after the State Department denounced as an outrage the kidnaping of two Americans and seven Cubans in the area.

The Americans were freed by the rebels Thursday. State Department authorities said they are determined to prevent future such kidnapings by rebel forces.

The department press officer, Lincoln White, said ships carrying out the evacuation operation might come from the U.S. Naval Base at Guantanamo on the southern end of Cuba.

# Balloon Failure Puzzling To Missile Experts

CAPE CANAVERAL, Fla. (AP)—Disappointed missile scientists were at a loss yesterday to explain what happened to the Army's latest space venture—an attempt to blast a Beacon balloon satellite into orbit.

"The thing did not work properly and we don't know just yet what caused the trouble," said Dr. Jack Froehlich, one of the chief scientists in the project.

Froehlich, who heads the satellite program for the California Institute of Technology's Jet Propulsion Laboratory, said no conclusions could be made until data available on the flight had been analyzed.

Froehlich said the balloon rocket's course was tracked for seven or eight minutes. The Army lost contact with its huge five-stage missile at an altitude of about 150 miles.

The third failure in six Army satellite attempts climaxed a dismal month at the Cape during which four ballistic weapons exploded and two satellites—Vanguard and Beacon—were unsuccessful.

# De Gaulle Requests Rebels Come to France for Talks

PARIS (AP)—Premier Charles de Gaulle, in a bid to end the exhausting Algerian war, yesterday appealed to the rebels to come to France for cease-fire negotiations.

He gave his personal guarantee of safe conduct to the representatives of the Algerian National Liberation Front.

De Gaulle issued his dramatic end-of-the-hostilities invitation at his first press conference since becoming premier of a tired, embittered and divided France last June.

Besides calling for face-to-face talks with the rebels, the general asked them to lay down their arms under a flag of truce. Prefacing this with a soldier's praise for his adversaries, he said that those who gave themselves up would be treated honorably.

## Parking Lot a River

KIDDERMINSTER, England (AP)—Geoffrey Waines said he thought he was heading into a tavern parking lot when he drove his car into the River Severn. He was fined 50 pounds—\$140—yesterday for drunken driving.

# Rickover Promoted To Vice Admiral

WASHINGTON (AP)—Rear Adm. Hyman Rickover, the controversial developer of the nuclear-powered submarine, was promoted to vice admiral by President Eisenhower yesterday.

The appointment is to be effective while Rickover serves as head of the naval reactors branch of the Atomic Energy Commission. The promotion is subject to Senate approval after Congress returns.

The 58-year-old admiral has been something of a bone of contention between the White House and Democrats on Capitol Hill.
