

Ice Skating Rink To Have Roof

The University is planning to put a roof over the ice skating rink and make other alterations to provide for year-round recreation activities.

The rink will open "sometime around Thanksgiving, depending on the weather," Dean Ernest B. McCoy of the College of Physical Education and Athletics said yesterday.

Hassle Results From Defiance Of Authority

A hassle on the floor of the Campus party meeting Sunday night between the vice chairman and some non-members who came to "observe" almost resulted in the party sending a letter of protest to All-University Cabinet.

The argument came about when Glorio Patsy, vice chairman, called for order following the nominations for freshman class secretary-treasurer.

Daniel Thalimer, Cabinet parliamentarian; John DeAngelo, executive assistant to All-University President Jay Feldstein; and Riley Johnson, chairman of Cabinet public relations committee, refused to come to order and sit down after being asked to do so four times by Patsy.

Patsy then accused the three of "soliciting for Cabinet" and asked Elections Committee members to show them to the door.

Thalimer addressed Patsy saying that he had "come to observe what was going on and was not trying to solicit votes." He also said he had come to observe as a matter of interest and advise the party's parliamentarian, Marlin (Continued on page four)

In addition to the roof, a concrete floor will be installed. The metal fence that now surrounds the rink will serve as walls.

The Board of Trustees has approved the proposed alterations and detailed plans will soon be prepared by an architectural firm.

The rink will be flooded from around Thanksgiving until sometime in March and during the rest of the year its 20,000 square feet of space will be used for the other indoor activities.

McCoy said shading of the rink from the sun is expected to provide a longer skating season. Warm days have previously interrupted the skating and shortened the season, he said.

The concrete floor will replace a base which is now sand. The surface will be specially treated to remain smooth.

McCoy said the area will provide space for pingpong tables, volleyball, golf driving nets, badminton and other indoor activities.

In addition, he said, summer session activities, such as band concerts, movies and other events usually held outdoors, will be moved to the rink during rainy weather.

Marine Corps Program

The Marine Corps officer selection team will continue its officer training program presentation today and tomorrow in the Hetzel Union game room.

Interviews will be held from 10 a.m. to 5:30 p.m. both days.

Top scientists in the International Geophysical Year program.

International Geophysical Year

Meteorology Cooperation Requested

International cooperation in meteorology is the only way to improve weather forecasts, Dr. Marcel Nicolet of Belgium, secretary-general of the International Geophysical Year, said Sunday.

Prior to the IGY, which began July 1, 1957, scientists had probed only 200 miles from the earth, he said, but since then this distance has been increased to 60,000 miles.

Accurate weather forecasting is becoming increasingly important in the age of jet travel, he said.

Nicolet was one of four members of the IGY executive committee which took part in a panel television show from campus. President Eric A. Walker was moderator.

Other members of the panel were Dr. Sydney Chapman, of the United Kingdom, president of the committee; Dr. Vladimir V. Belousov, of the Soviet Union; and Dr. Jean Coulomb, of France.

The IGY has been a "miraculous success," Chapman said. "The number of participating nations, the scope of the studies

undertaken and the success of the satellites in gathering information have made it a year that will long be remembered in the scientific world," he said.

Sixty-six nations are cooperating in the IGY, which will end Dec. 31. Each of the nations have centers from which information is disseminated to its scientists and to those throughout the

world. In closing the panel discussion, Walker predicted that the IGY will gradually grow and probably will include all forms of science.

He said scientists participating in the world-wide IGY investigations have learned they speak the same language in their quest for the truth.

Leave It to the Irish

There once was a lecturer named Green
Whose ideas about love were quite keen
It was impossible to disparage
What he said about marriage
And the best way to issue a collection.

P.A. Request Ignored By Athletic Board

The University's Athletic Advisory Board took no action last Friday on All-University Cabinet's request that a play-by-play public address system be instituted at Beaver Field.

Ernest B. McCoy, dean of the College of Physical Education and Athletics and Director of Athletics, said the group recommended to All-University President Jay Feldstein that more concrete information be gathered.

The information would be presented at the group's next meeting, around the first of the year, McCoy said.

The board didn't feel the request was logical at the present time, McCoy said, and general discussion was held on the past history of the problem. Criticism on the use of play-by-play systems was general, McCoy said.

Some of the problems involved in a play-by-play description of the game include interference with other spectators who do not wish to be disturbed, interference with the radio broadcasts of the game, and discrepancies between the public address system announcer and the radio broadcast announcers.

Senior Class President Charles Welsh recommended to Cabinet on Oct. 9 that the public address system be further utilized to include descriptions of penalties, scoring sequences and possibly a play-by-play description.

Your HONEYMOON Must Be PERFECT!

First of all, privacy in a secluded cottage deep in wooded hills; then the happy companionship of others starting life together, jolly mealtimes at an old-time guest house, with easy-going leisure or vigorous outdoor life. Open all year for newlyweds only. Rates include meals (breakfast until 11). Mention dates if you wish our Three Honeymoon Plans or other folders.

THE FARM ON THE HILL
Swiftwater, R. F. D., Pennsylvania

Since the Marquette homecoming game descriptions of the penalties and scoring sequences have been announced over the public address system, McCoy said the same system would be followed for the final home game with Holy Cross, Nov. 15.

The Athletic Advisory Board is made up of 13 members, with H. L. Stuart as chairman. McCoy serves as the group's secretary and is an ex-officio member of the board.

Interviews will be held from 10 a.m. to 5:30 p.m. both days.

PRESSURED?

So busy that you can't bother with career planning until graduation day?

A career in life insurance selling may be right in your line. It offers many benefits—among them:

- No limit on earnings
- A business of your own

Take the time now, to talk with the head of our college unit about an absorbing future in the life insurance business.

"Ten to one he forgot the Camels!"

If he did, the odds are he'll be hoofing it right back for America's most popular cigarette. Nothing else gives you the rich tobacco flavor and easygoing mildness of Camel's costly blend. It stands to reason: the best tobacco makes the best smoke.

Instead of fads and fancy stuff ...

Have a real cigarette—have a CAMEL
