

# New Dial Phone Wiring Nears Completion in Halls

Underground wiring for the new dial telephone system has been completed in all the women's residence halls, except McAllister and Graduate Halls.

The conduit (underground piping for telephone wire) will be started soon in the remaining Residence Halls, W. F. Diehl, manager of the telephone service, said.

# Council Pays Tribute to Bell

The Metropolitan College Public Relations Council, composed of 60 colleges and universities in the metropolitan New York area, has paid tribute to the late Louis H. Bell, former director of the University's Department of Public Information.

In its opening meeting of the 1958-59 year, the council adopted the following resolution dedicated to the memory of Mr. Bell:

"Devoted servant of Penn State and of the American College Public Relations Association, he forwarded the cause of higher education through professional accomplishments which earned him respect, admiration and formal honors; moreover, his achievements were characterized by a personal warmth and giving of self which won him countless friends throughout the country. And so we grieve at the passing of Lou Bell, one of our 'nobles'."

# Vets Assistance Offered

A representative of the Veterans Administration will be on campus from 10 a.m. to 3:15 p.m. tomorrow in 6 Sparks to assist veterans and their dependents in applying for current VA benefits.

# Foreign Student Thanksgiving Visits Planned

For the fourth consecutive year, residents of Pine Grove, a small community in Schuylkill county, will open their homes to 13 foreign students from the University over the Thanksgiving vacation.

Each of the students will be a guest at a Pine Grove home for the weekend and will join his hosts in a traditional American Thanksgiving Day family dinner on Thursday.

The group will go to Pine Grove by bus Wednesday and will return to University Park Sunday.

The project was initiated in 1955 by the Rotary Club and the Woman's Club of Pine Grove to foster international good will and understanding.

University students who will take part in this project include: Teresita Blando, of the Philippine Islands; V. Gopala Krishna, Gopal Saksena, Wasinder Mokha and Swarn Singh Kahlon, of India; Ali Mohammad Saidi, of Iran; Nasimuddin Mufti and Kayoon Awan, of Pakistan; Mehmet Alibasoglu, of Turkey; Hisako Matsubara, of Japan; Kaneko Minei, of Okinawa; Mrs. Vincente Chi, of Formosa, and Virginia Latte-Deik, of Chile.

# 25th Anniversary Celebrated by ADS

The Benjamin Franklin chapter of Alpha Delta Sigma, men's national professional advertising fraternity, celebrated its 25th anniversary Sunday at a banquet at the Nittany Lion Inn.

C. James Proud, president and general manager of the Advertising Federation of America, was the main speaker at the dinner.

Highlight of the evening was the initiation of three professional advertising men and nine undergraduate students into the fraternity.

The three professional initiates were: C. P. Richardson, president of W. S. Walker, Inc., Pittsburgh advertising agency; Frank B. Palmer, general manager of WFBG and WFBG-TV in Altoona; and Wesley S. Dodge, retail advertising manager, Grit Publishing Co., Williamsport, and president of the Interstate Advertising Manager Association.

The nine undergraduates included: Wolfgang Alber, Springfield; Karl Bopp, Drexel Hill; Charles Davis, McKeesport; William Harris, Berkeley Heights, N. J.; Richard Paxton, Grove City; William Smith, Clarks Summit; and John Tru-

No change is necessary in West Halls, because the phones are already set up for the new system. The process of changing systems and laying the underground wiring was started before school began this year, and is scheduled for completion Aug. 16, 1959.

In connection with the change over to this new telephone system, a new Telephone Building, due for completion Feb. 15, is being constructed next to Boucke Building.

When the new building is ready, Western Electric will move their crews and equipment onto the campus.

The crews will have to put the elaborate equipment together, connect wires, pull underground wires into the telephone building and install the switchboard.

Although the conduits have been laid, the phones still have to be installed. Bell Telephone crews will assist Western Electric in the various installation phases.

Ground has been dug near the hospital and on the corner of Pollock and Shortlidge Roads near the Jordan fertility plots so the wires could be installed.

Diehl said that the main connections have been made in front of the Boucke Building in the steam tunnel. He said that he estimates that about 30 men have been used so far on the job.

It is hard to estimate the overall costs of the project, he said, because there are so many different phases required in the installing of the telephones.

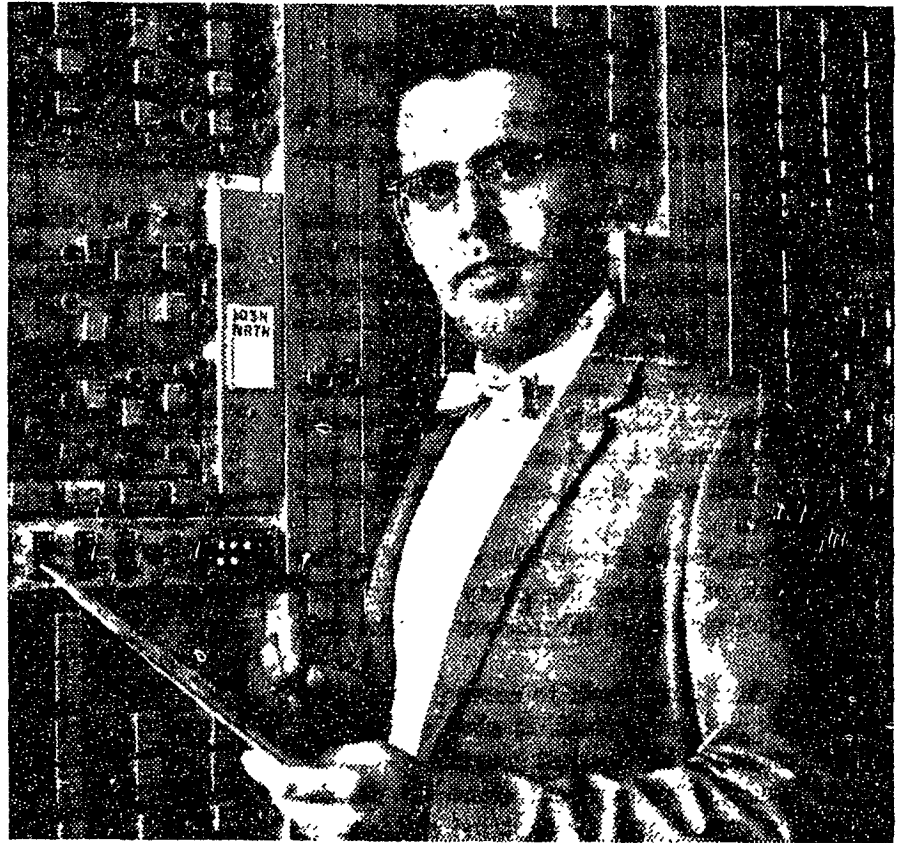

by, State College. Donald Davis, chapter adviser and professor of journalism and head of the department of advertising at the University, gave a brief historical sketch of the fraternity. Chapter president, Charles Reiser of Sewickley, served as toastmaster and awards were presented for the best posters which the initiates wore on campus last week.

# Annual Sale to Be Held By ArtEd Grad Club

The Art Education Graduate Club will hold its third annual sale of art objects Dec. 5 and 6 in the Temporary Classroom Building.

The funds received from the sale will support the club's project of purchasing permanent art objects for the University collection.

## A Campus-to-Career Case History

**"I wanted a job I could grow with —and I've got it"**

H. James Cornelius graduated from Swarthmore College in 1954 with a B.S. in Electrical Engineering. He's been "growing" ever since with the Bell Telephone Company of Pennsylvania.

After an initial 44-week inter-departmental training course, Jim was made Facility Engineer in charge of the fast-growing Norristown-Pottstown area. In that capacity, he engineered over half a million dollars' worth of carrier systems and cable facilities between major switching centers.

Today, he is one of 50 young engineers from the Bell Telephone Companies chosen to attend a special Operating Engineers Training Program at Bell Lab-

oratories. This 19-month course of study—with full pay—deals with advanced techniques and new concepts in electronics which signal a new era in telephony. It involves both classroom theory and practical laboratory applications.

When Jim and his colleagues return to their companies, they'll review major engineering projects. This will assure the best use of equipment for current engineering, as well as for expected new developments in communications.

"I wanted a job I could grow with," says Jim, "and I've got it. I can't think of a better place than the telephone company for an engineering graduate to find a promising future."

Many young men like Jim Cornelius are finding rewarding careers with the Bell Telephone Companies. Look into opportunities for you. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office.

## INTERNATIONAL LADIES' GARMENT WORKERS' UNION

David Dubinsky, President

MEMO TO: The Editor

FROM: Gus Tyler, Director, ILGWU Training Institute

Subject: A DIFFERENT KIND OF JOB OPPORTUNITY

It occurs to me that there are some in your student body who would be actively interested in a job—and a challenge—that others of their generation have accepted and turned into a rewarding way of life.

The International Ladies' Garment Workers' Union conducts its own "West Point," to prepare young men and women for careers in labor leadership. The one-year course combines classroom and field work. Those who complete the course are assigned to a full time job with the union.

With the job comes the challenge—to provide the kind of dedicated and ethical leadership that will make the American labor movement the creative social force it seeks to be.

The Training Institute is now in its ninth year. 125 of its graduates now hold union office in the ILGWU. Virtually all started as organizers—to learn the labor movement at the grass roots. While some continue at this mission as their first and enduring love, others branch out to take on responsibilities as business agents, local union managers, educational and political directors, area supervisors, time study experts, etc.

There is nothing soft or cushy about any of these jobs. But then we are not looking for young people who want the easy plush life. We want those who will enjoy the sting of challenge in the three-dimensional world of flesh and blood people confronted with raw existence.

To these, we open the doors of the Institute. Write before April 15: ILGWU Training Institute, 1710 Broadway, New York 19, N. Y.
