

Two Cloverleafs Considered For Eastern End of Campus

The State Department of Highways is studying two plans for the College Avenue-University Drive cloverleaf to be constructed east of McClellan's garage in State College.

Neither of the two plans would allow eastbound traffic on College Avenue to make a left turn onto the campus.

The first plan would require north-bound University Drive traffic attempting to turn left, to turn to move across south-bound traffic.

The second plan, by a system of ramps and access roads, would allow all traffic movements except the left turn from the eastbound lane of College Avenue.

Highway officials drew up the two proposed plans when State College public officials objected to the lack of turning movements which might have resulted from the original plans.

The proposed University Drive would extend from the campus to the residential areas to the south along the eastern edge of town to help move traffic from the

campus more quickly.

These plans are the second phase of the project. The first phase—the rebuilding of 4.7 miles from Centre Furnace to Rt. 64 near Dale Summit—is already underway.

Highway officials said the project was split into two phases so that the first part could be started and not be held up by the cloverleaf's more complex design.

When the highway department decides which plan it prefers it will be submitted to the Bureau of Roads. If it is approved, construction will begin.

One of two University Drive-College Avenue plans will speed traffic in and out of the borough, including to and from the campus. The plan on the left would require left turns by northbound University Drive traffic to be made around loop on campus, while the plan to the right would enable the turn to be made with all right turns.

Lawrence Sees New Pa. Taxes

PITTSBURGH (AP)—Pennsylvania can't escape new taxes, Gov.-elect David L. Lawrence yesterday told his Tax Advisory Committee.

Lawrence made no recommendations on the type of taxes he said need to be enacted, but he did remind the 12-man committee:

"During the campaign, there were many times when I pointed out that the widespread use of the earned income tax (wage tax) in more than 500 Pennsylvania communities made it impractical for the commonwealth to consider a tax on earned income."

The Pittsburgh mayor, who will be inaugurated as the state's second successive Democratic governor Jan. 20, said more revenue must be raised to finance government operations. He added:

"Those taxes should be imposed fairly. No one should expect a free ride at the expense of his fellow Pennsylvanians. Business must bear its fair share, just as the consumer must bear his."

"The money will be used to pay for services we all admit we need; a self-governing society must accept the duty of imposing taxes on itself if it is to remain self-governing."

The Tax Advisory Committee was appointed by Lawrence Dec. 6 to study the state's fiscal needs and make recommendations on taxes to finance the budget.

It is composed of labor, industry and civic leaders—six Democrats and six Republicans.

'Hot Spell' Ends, Cold Will Return

Comparatively warm weather returned to campus yesterday as the temperature rose above freezing for the first time in 12 days and reached a high of 37.

However, winter was only taking a vacation

as today will be windy and partly cloudy with a high of 30. Tonight's low will be 24 degrees. Though temperatures are expected to remain colder than normal for the next three days, going-home traffic will be hampered by light snow only in northwestern Pennsylvania, with a heavier fall predicted for Erie.

Friday's temperatures will be in the lower 30's with cloudiness, and clearing in the afternoon. Saturday will be partly cloudy and continued cold.

6 Houses Fined \$250 For IFC Violations

Six fraternities have been fined a total of \$250 by the Interfraternity Council Board of Control for failure to register pledges with the IFC.

All fraternities must register their pledges with the IFC within two weeks after they begin pledging. A \$2 fee is charged for registration.

Another 11 cases will be heard by the Board Jan. 11, Ronald Siders, board chairman, said. Eight cases were heard Tuesday night and two fraternities were found not guilty by the judicial body of the IFC.

Lambda Chi Alpha was fined \$105 for failure to register 12 pledges. The first violation results in a \$25 fine and each additional pledge not registered constitutes another \$5 fine.

Other fraternities fined include Phi Gamma Delta, \$35; Sigma Alpha Epsilon, \$35; Delta Chi, \$25; Chi Phi, \$25; and Phi Epsilon Pi, \$25. Fraternities found not guilty were Phi Mu Delta and Sigma Pi.

The fines are payable by Feb. 1 to Charles Hughes, IFC secretary-treasurer, Siders said.

This is the first instance of fines levied under the new pledge registration system which began in September 1957. An individual card must be filled out for each pledge.

The Board of Control has sent a letter to the IFC pointing out the loop-hole in the registration process. Under the present system, no receipts are given by the IFC showing who is registered.

The only receipt many of the fraternities have is a cancelled check, but this doesn't tell them the names of whom are registered, Siders said.

National Teachers Exam

Students planning to take the National Teachers Examinations on Feb. 7 must file applications with the Educational Testing Service not later than Jan. 9.

UCA European Seminars

Trips Stress 3 Areas

By CAROL BLAKESLEE

The University Christian Association will sponsor three European seminars this summer.

Each seminar will focus on a different aspect of European customs and traditions and is designed to give students a broader knowledge of European life.

The first, "Europe 1959," will give emphasis to the social, economic and religious patterns. A total of 49 days will be spent in England, France, Austria, Italy, Switzerland, Berlin, West Germany and Poland.

Highlighting this seminar will be talks with Communist youths behind the "iron curtain" in Poland and a talk with the mayor of Berlin.

This trip is scheduled for June 17 to Aug. 5.

NATO to Boost Missiles Defense

PARIS (AP)—The North Atlantic Treaty Organization voted formally yesterday to strengthen its defenses with more missiles, planes and divisions.

NATO took the decision in a formal resolution to do its best to bring the defense forces up to the minimum figure declared necessary by Gen. Lauris Nomsad, supreme Allied commander in Europe.

But the goals for increased defensive might were listed in the resolution only as objectives.

The annual military review estimated there was no reduction in the extent of the Soviet war machine nor any reduction in its threat. The Soviets were pictured as able to pour a million troops quickly into central Europe in any showdown.

The threat itself was brought home to the Allies by the Soviet warning last month that by June, West Berlin would be declared a free city and its supply channels surrendered to Communist East German control.

An answer to this threat was being drafted by France, Britain, West Germany and the United States. There was no expectation that a completed draft will be ready for discussion by the NATO meeting.

The note, a short one, will reject the Soviet demand, but will express a willingness to negotiate on East-West tensions, informed sources said.

But the four powers will say they refuse to negotiate under an ultimatum. They will ask if the June date set by the Soviets is an ultimatum.

Student's Car Injures Woman In State College

An elderly State College woman suffered a broken leg last night when she was struck by an auto driven by a University student.

The woman, Mrs. Mildred Fowler, 78, of 223 S. Garner St., was crossing South Pugh Street at East Foster Avenue when she was struck by a 1956 convertible driven by James Houser, freshman in chemical engineering from State College.

Houser's car was faced in a northerly direction on South Pugh Street and witnesses said he had been heading in that direction when the accident occurred.

Mrs. Fowler was taken to Philipsburg State Hospital by the Alpha Fire Co. ambulance which was called to the scene at about 7 p.m. or shortly thereafter by a witness.

First aid was administered to the victim by the Alpha attendant, who placed a temporary splint on her leg.

"Perspective on the Arts," the second seminar, will be held from July 8 to Aug. 26. It will center around an interpretation of the art, music, drama and architecture of England, Scotland, France, Italy, Switzerland, West Germany and the Netherlands.

Fifty days will be spent in these countries observing the arts in their historical settings.

As a new addition of the seminar program, the UCA has planned a trip to the countries of Western Europe, which will focus on an examination of Western European customs in a search for meaning in their lives and society.

This group of students will attend a 10-day work camp in the Alps of Northern Italy and will participate in a week-long conference with the British Student Christian Movement.

They will visit England, France, Italy, West Germany, Switzerland and the Netherlands in their 51-day stay in Europe. The trip is scheduled from July 8 to Aug. 27. The costs for each seminar includes transportation by airline to Europe, transportation while in Europe, rooms, meals and the prices for scheduled sightseeing events, including tickets to concerts or theaters.

For the first seminar, "Europe 1959," the cost is about \$1150; for "Perspective on the Arts," about \$1095; and for "Western Europe," about \$930.

For a more detailed information interested students may contact Samuel N. Gibson, executive director of the UCA, at Adams 8-8441, extension 541.
