

Summer Playhouse To Offer Hit Shows

"Cat on a Hot Tin Roof" and "Diary of Anne Frank" will be the feature productions at Standing Stone Playhouse this summer.

Both the famous plays will have 2 week runs during the summer season, which will last from June 22 to Aug. 24.

This will be the second season for Standing Stone under University auspices. It was formerly Ma-teer Playhouse. The playhouse is located at Neffs Mills, about 18 miles southwest of campus.

According to a tentative scheduled announcement by Dr. Walter H. Walters, head of the Department of Theatre Arts, the season will open with Eugene O'Neill's "Desire Under the Elms." "Three Men on a Horse" by John Cecil Holm and George Abbott will play the week of June 29.

One play, "House by the Lake," will be produced for the first time in this country. The English mystery, written by Hugh Mills, will open July 6.

"I Remember Mama" by John Van Druten will be presented the week of July 13. Tennessee Williams' "Cat on a Hot Tin Roof" will run for two weeks beginning July 20 and "The Diary of Anne Frank" by Frances Goodrich and Albert Hackett will play two weeks starting Aug. 3.

The season will close with

Anton Chekov's "The Cherry Orchard" beginning Aug. 17 and Noel Coward's "Nude with Violin" starting Aug. 24.

Walters said there will be a company of about six professional actors working the summer plays. The remaining parts will be filled by students taking summer school work in acting and production.

Contracts for the professional troupe have not been completed, he said.

As during last summer, the plays will be directed by Max Fischer.

The tentative schedule:
June 22 Desire Under the Elms
June 29 Three Men on a Horse
July 6 House by the Lake
July 13 I Remember Mama
July 20 Cat on a Hot Tin Roof
July 27 Cat on a Hot Tin Roof
Aug. 3 Diary of Anne Frank
Aug. 10 Diary of Anne Frank
Aug. 17 The Cherry Orchard
Aug. 24 Nude with Violin

Test Drilling--

(Continued from page one) started to melt, making excavation easier.

Buildings now under construction include Hammond Engineering Building, North Residence Halls, two new wings to the Home Economics Building, the Petroleum Refining Laboratory, the north wing of Sackett Building, the first unit of the Research Center, the Wagner Military Science Building, and the new Telephone Building.

Also under construction are the new Pollock area residence halls where workmen are now pouring foundations for some of the buildings.

Books Aid Finch--

(Continued from page five) the University's program.

He is chairman of the committee that directs Humanities 1 and 2 and a member of both the Senate Subcommittee on Methods for Improving Instruction and the Faculty Committee on Religious Studies.

He is working on a book which will be titled "Experimental Science and Human Wisdom."

As a final word of advice Finch said, "Students should continue to think as hard as they can—and on that basis be as generous as possible."

Weightlifters Lose To Maryland

The Penn State Weightlifting Club moved a little closer to varsity status last week, even though it lost to Maryland, 32-26, at Rec Hall Saturday.

Acting coach Fred Bellas said that he was very pleased with his team's performance especially after just four weeks of practice. Maryland, meanwhile, had been in dual competition since September.

Bellas feels that with a little more practice and depth, his team can compete with the best weightlifting squads in the country.

Penn State's athletic director, Ernest B. McCoy, has expressed interest in the club and is giving some thought to making it a varsity sport because of the Olympic interest in weightlifting.

There are seven divisions in intercollegiate weightlifting—123.5, 132, 148, 165, 181, 198 and heavyweight.

Points are awarded for first (5), second (3) and third (1) places. Each entrant is allowed three attempts at each of the three Olympic lifts—the press, snatch and the clean jerk.

A total composed of the high-

est weights in each event determines the winner in the individual classes.

Freshman Paul Dietzel took a first place for Penn State in the 132-pound class with a 415 total.

CLASSIFIED

FOR SALE

3-PIECE SOFA BED living room set, one sofa bed, antique folding book-case, baby carriage. AD 8-1078 before 7 p.m.

GERALD A. PARSONS received his B.A. in 1950 and his M.B.A. one year later, both from Cornell University. He joined General Electric in 1954 and is presently Specialist—Marketing Administration in the company's Large Steam Turbine-Generator Department.

"The biggest challenge a man has to face is himself"

"Men and businesses are alike in one respect," says Gerald A. Parsons, 30-year-old marketing and personnel development specialist. "Their success depends to a great extent on how well they respond to challenge. And I've found that the biggest challenge a man has to face on his job is not the competition of others—but the far more important one of developing himself to his fullest capabilities.

"During my four years with General Electric, I've had plenty of opportunity for self-development. Challenging training assignments at five different locations within the company have given me a broader understanding of my career area. In my present job I have the benefit of working with experts, both in establishing long-range goals and in helping to achieve them. I've found that working toward future potential is vital in the development of successful businesses—and successful men."

Young men such as Gerry Parsons are important to the future of companies like General Electric and to the growth of America's dynamic, competitive-enterprise economy. Our nation's progress will depend more and more upon those forward-looking individuals who continue to develop to their fullest capabilities during their lifetime.

That is why General Electric provides a climate for individual progress—with opportunity for increasing knowledge and skills—for all of its employees, including 30,000 college graduates. For it is only as individuals meet the challenge of self-development that there continues to be progress for a business, an industry, or a nation.

Progress Is Our Most Important Product
