Application Deadline Set for Readmission

By BOBBI LEVINE

The Academic Standards Committee has set up an application deadline for students who have been dropped from the University and wish to be reinstated, Arthur D. Brickman, professor of mechanical engineering and chairman of the committee, said.

The deadline will be 30 days before registration begins.

This move, according to Brickman, is not designed to make it more difficult for students to gain readmittance to the University, but to streamline procedural operations for reinstatement.

"As far as I can see," Brickman said, "there has been no change in policy with regard to reinstatement. It may be that the deans' offices are becoming more rigorous on whom they recommend, but our committee is just putting into writing, procedures which have been in operation for years."

Brickman said the committee hopes to have the deadline in effect with each dean's office before the end of the present semester. He said the largest number of requests for reinstatement usually come about three weeks from the end of the semester, and the committee, by instituting the deadline for sub-

mitting these requests, was hoping to lessen the work load for the deans' staffs.

"Often a student waits until a few days before registration to come to the dean of his college. We hope to set up a reasonable sort of time limit which would make our work a little easier and take a little of the work from the deans," he said.

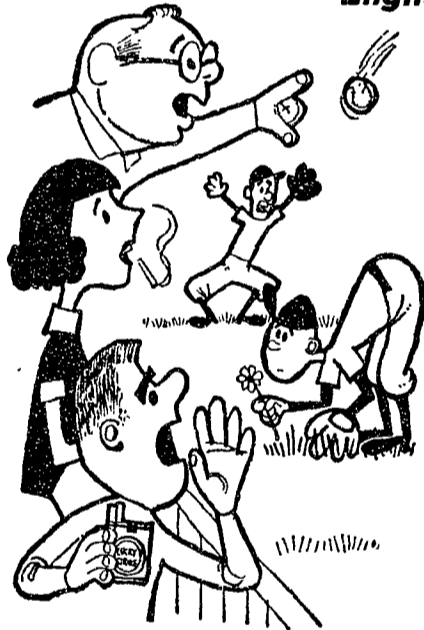

"I don't think it will work any particular hardship on a student," he continued, "because any deadline we institute won't be an absolute deadline. Special cases will be given special consideration."

He said as far as basic policy went, he could see no upswing in the number of reinstatement applications that had been turned down.
