

YOU SEE, IT DOES WORK!—The crane, a boom lift which has been standing inactive at the Hammond engineering project is finally operating. The crane, which runs on track parallel to the 690 foot building, is being used to lift concrete pouring buckets.

# 24-Hour Limit Set For Vacating Rooms

All students living in residence halls must vacate their rooms within 24 hours after their last final examination, unless the students are graduating seniors.

Graduating seniors may remain in the residence halls until 4 p.m. June 6.

All belongings must be removed from the room by the individual check-out date. Any belongings left in the rooms will be put in storage at the student's risk, and the room deposit will be subject to forfeiture.

Residents of South Halls may turn in their completed check-out record, room key and meal ticket at Redifer post office; residents of Irvin Hall at Waring post office; residents of McAllister, Grange and Graduate Halls at the Graduate Hall reception desk; and residents of Aiherton, McElwain and Simmons halls at their respective reception desks. Women students must be checked out by a Department of Housing employee.

Men's residence hall counselors will check men out of their rooms and collect their room keys. Residents of the Nittany area should turn in their check-out records and meal tickets at the Nittany 20 post office and residents of West Halls at the Waring Hall post office.

Room deposits will be refunded at check-out time.

All students leaving the residence halls before May 22 must have a notice of termination from the home assignment office in Irvin Hall.

# Stolen Caps Present Danger Warns Olver

Dr. Elwood F. Olver, director of security, has issued a warning to students to be careful of the person or persons who stole dynamite caps from the Pollock Circle project.

Approximately 150 caps were stolen from a storage box between 5 and 8 a.m. Tuesday. Olver said they are used to set off dynamite charges. He said a cap could easily mangle a hand if it should explode.

Olver requested that the caps be returned or disposed of in a safe manner.

He also called upon students to be more cautious about tossing matches and emptying ash trays into waste baskets.

The warning was prompted by three fires in residence halls within the last three weeks. Two of the fires, one in Nittany and the other in Cross, were waste basket fires that ignited nearby objects. The other fire was in McElwain and was started by a dripping candle.

## Traffic Survey Report:

# Expansion Increases Traffic Problems

By JIM WHALEN  
First of a Series

As the University expands each year, additional buildings and students cause traffic control and parking problems to become more complicated.

The report of a traffic survey conducted in the Spring of 1957 emphasized that the problem cannot be solved through

## Deadline Set For Submitting Debts Charges

May 15 has been set as the deadline for fraternities to submit applications to the University requesting that disciplinary action be taken against seniors who owe debts to these fraternities.

The applications are to be submitted to the dean of men's office for review.

Under an Interfraternity Council rule passed this semester, the University may withhold the diploma of any senior who still owes his fraternity money at graduation.

Edward Hintz, former IFC president, said that the rule was designed to be used as a last resort for fraternities unable to collect the money any other way.

Hintz said that the burden of proof will be upon the fraternity and not the individual.

The rule was passed after a survey of 42 fraternities by the IFC showed that the problem of collecting debts from graduating seniors did exist in 35 of them.

A total of 32 of the houses said they favored withholding the diplomas. The rule was passed by a 50-3 majority.

sporadic attacks, but must be incorporated into the programs of the long-range planning commissions.

The survey was made upon the recommendation of President Eric A. Walker, and was directed by Calvin G. Reen, professor of civil engineering, with the assistance of students, civil engineering faculty members, and University employees.

The studies centered around vehicular and pedestrian traffic, and the parking situation.

The results of the survey on present traffic conditions were analyzed scientifically and recommendations for improvements were made on sound traffic engineering principles, Reen said. It was emphasized that the study was not based on any financial limitations the University might have during expansion.

In general, the recommendations for improving traffic conditions were of a physical nature, excluding such things as restrictions on student cars.

Improvements were suggested for walks, driveways and the drainage system on campus. The placing of new parking lots and possible new outlets for traffic in the future were also outlined.

As the result of extensive field observations, points of hazardous intersections and pedestrian congestion areas are cited.
