

# Work Progresses On New Buildings

By JIM WHALEN

Increased humming and grinding of construction machinery under the hot spring sky means some campus buildings are nearing completion and others are taking form.

Two agricultural buildings are expected to be finished this summer.

A mushroom house on the eastern end of campus for research in the commercial field has been completed and inspected. Site work is expected to be pushed to an early conclusion.

Under the General State Authority program, the turkey breeding houses are about 75 per cent complete and the meat laboratory and swine facilities are about 50 per cent complete. This work is expected to be finished by July 1.

Meanwhile other buildings are beginning to take form.

Concrete is being moved by a crane high over the site of the Hammond Engineering Building on West College Avenue as foundations continued to be poured for floors and pillars. Work on the building has been centered around the first floor slab on the main and north wings during past months.

Brick work is proceeding on the south side and interior portions of the Petroleum Refining Laboratory building located south of the Forestry Building. This project is scheduled for completion by April 1960.

During the past month all structural steel and concrete was completed on the addition to the Home Economics Building. Masonry stone is proceeding on the southwest side, and the third floor columns and roof deck are completed.

The third and last floor deck of the Military Science Building has been poured with concrete and brick work is proceeding on the laboratory section. This project, located north of the Nittany Dormitories, is scheduled for completion a year from now.

## Workshops--

(Continued from page one)

University expansion problems including parking, traffic regulations, closure of Pollock Road, bicycle regulations, construction, dormitory living units and the "impersonality" of a large school.

The Academic Affairs and Curricula Revisions workshop will discuss academic honesty, honors courses, reference libraries in new dormitories, a common freshman year program, scholarship and culture--artist and lecture series--programs.

The Functions and Responsibilities of the New SGA workshop will discuss the new student government body--the legislative, judicial and executive branches--and its implementation during the coming year.

The Student Conduct workshop will attempt to formalize a student code and a set of disciplinary penalty definitions, will discuss disciplinary actions for both men and women students, its effects upon the townspeople and the implementation of the student courts.

The Motivation of School Spirit workshop will discuss ways to increase school spirit, form a pep club, develop spirit in individual dormitory units, increase participation in alumni fund drives and membership, support senior class gift projects and develop ways to raise money for senior class gifts and charity drives.

## 6 Students Initiated Into Radio Society

Six students were initiated into Theta chapter of Rho Tau Sigma, national radio and television honorary society, at its annual Initiation Banquet last week.

The new initiates include Elizabeth Braithwaite, James Brown, Sara Dietrick, William Mather III, William Pohts and Donald Thompson.

Following the banquet at the Hotel State College, James H. Coogan, Director of Public Information, spoke on the use of radio and television to familiarize the public with the University.

## Dauids Receives Fulbright Grant

Norman Dauids, professor of engineering mechanics, has been awarded a Fulbright grant for the next academic year. He plans to continue his work at the Technion, Israel Institute of Technology, Haifa, Israel.

His research involves the stress-wave propagation in materials and penetration mechanics. He has been working on a project on scabbing and stress waves since 1955, supported by U.S. Army Office of Ordnance Research.

Dauids also is conducting research on mechanics of penetration of materials under a grant from the National Space Administration Agency.

A native of New York City, Dauids received his bachelor of science degree from the City College of New York and his master of science and doctor of philosophy degrees from New York University. He has served on the University faculty since 1947.

He plans to leave for Haifa in September, accompanied by his wife and three children.

## Biggest Boost Brings Bonus

It can be done!

Suzanne Wytenbach received the President Sparks Medal for achieving a 4.00 Fall semester average--she received a 2.43 average the previous semester.

The President Sparks Medal is awarded "to the student, selected from those making the highest semester average, who has made the greatest improvement over the preceding semester."

Miss Wytenbach is enrolled in the College of Education and plans to teach in elementary school. During the fall semester she spent 8 weeks student teaching.

## Williams Presides At Officials' Clinic

C. O. Williams, assistant to the president for special services, presided over the luncheon and a clinic at the annual meeting of the American Association of Collegiate Registrars and Admission Officers in Pittsburgh last week.

Other administration officials attending the meeting were Robert G. Bernreuter, dean of admissions and registrar; T. Sherman Stanford and Ruth I. Kapp, assistant deans of admissions; Robert M. Koser, Jr., Helen V. Kline and Warren R. Haffner, assistants to the registrar; and Martin L. Ziegler, assistant director of the Division of Counseling.

## Cornell Prof to Speak at 8

Robin M. Williams of Cornell will speak on "Attitudes and Values in the College Student's Sub-Culture" at 8 tonight in 121 Sparks.

## Traffic Survey--

(Continued from page two) in the survey. Past surveys on parking conditions were used, plus data from the Campus Patrol.

The survey was conducted with the aid of the Physical Plant and Planning Commission to see how expansion would influence the study.

The results and recommendations of the survey are now in the hands of the president's office and the University's long-range planning commissions.

The Daily Collegian in four articles will publish the results of this report.

## Walker Says--

(Continued from page one)

of the site, construction of the physical plant and major repairs.

Walker said the operational expenses will be met with University funds on the basis of a policy that applies to all off-campus units.

He also said an attempt will be made to "regularize" the composition, basic responsibilities and authorities of the advisory boards. The channels of communication will also undergo change in order to allow each unit to make a maximum contribution to the growth and development of the campus system.

## SCHULTZ IS

### A MANY SPLENDORED THING

Beppo Schultz, boulevardier, raconteur, connoisseur, sportsman, bon vivant, hail fellow well met--in short, typical American college man--smokes today's new Marlboros.

"Why do you smoke today's new Marlboros, hey?" a friend recently asked Beppo Schultz.

"I smoke today's new Marlboros," replied Beppo, looking up from his 2.9 litre L-head Hotchkiss drive double overhead camshaft British sports car, "because they are new."

"New?" said the friend. "What do you mean--new?"

"I mean the flavor's great, the filter's improved, the cigarette is designed for today's easier, breezier living," said Beppo.

"Like this 2.9 litre L-head Hotchkiss drive double overhead camshaft British sports car?" asked the friend.

"Exactly," said Beppo.

"She's a beauty," said the friend, looking admiringly at the car. "How long have you had her?"

"It's a male," said Beppo.

"Sorry," said the friend. "How long have you had him?"

"About a year," said Beppo.

"Have you done a lot of work on him?" asked the friend.

"Oh, have I not!" cried Beppo. "I have replaced the pushrods with a Roots type supercharger. I have replaced the torque with a synchromesh. I have replaced the tachometer with a double side draft carburetor."

"Gracious!" exclaimed the friend.

"I have replaced the hood with a bonnet," said Beppo.

"Land o' Goshen!" exclaimed the friend.

"And I have put gloves in the glove compartment," said Beppo.

"My, you have been the busy one," said the friend. "You must be exhausted."

"Maybe a trifle," said Beppo, with a brave little smile.

"Know what I do when I'm tired?" said the friend.

"Light a Marlboro?" ventured Beppo.

"Oh, pshaw, you guessed!" said the friend, pouting.

"But it was easy," said Beppo, chuckling kindly. "When the eyelids droop and the musculature sags and the psyche is depleted, what is more natural than to perk up with today's new Marlboro?"

"A great new smoke with better 'makin's' and a great new filter!" proclaimed the friend, his young eyes glistening.

"Changed to keep pace with today's changing world!" declared Beppo, whirling his arms in concentric circles. "A cigarette for a sunnier age, an age of greater leisure and more beckoning horizons!"

Now, tired but happy, Beppo and his friend lit Marlboros and smoked for a time in deep, silent contentment. At length the friend spoke. "He certainly is a beauty," he said.

"You mean my 2.9 litre L-head Hotchkiss drive double overhead camshaft British sports car?" asked Beppo.

"Yes," said the friend. "How fast will he go?"

"Well, I don't rightly know," said Beppo. "I can't find the starter."
