NEBUMASA NISHIGAWA, Editor of the Chubu Nippon-Press, of Nagoya, Japan, talks with Dennis Malick, Collegian editor, during his visit on the campus yesterday. The Japanese editor marveled at the fact that the university students were able to publish a daily newspaper.

Japanese Editor Judges U.S. Press

The biggest difference between American and Japanese newspapers is the size of their circulation, Nebumasa Nishigawa, editor of the Chubu Nippon-Press of Nagoya, Japan said during a visit here yesterday.

The Chubu Nippon-Press, which publishes afternoon, evening and Sunday editions, has a circulation of 1,300,000, he said. The largest circulation of a Japanese newspaper is 3 million.

Nishigawa talked with members of the School of Journalism and also discussed the responsibilities of journalists with editors of The Daily Collegian.

A participant in the State Department sponsored cultural exchange, Nishigawa is employed by the Allentown Call-Chronicle during his 3-month trip to the United States.

Commenting on his observations of the United States, Nishigawa said that American journalists are generally older than their Japanese counterparts. Our active journalists are between 20 and 35 years old, he said.

Although the style of the newspapers is the same, he said, Japanese stories are usually shorter because newspapers have a fewer number of pages.

Nishigawa said "the students look very happy" here and he said he never saw a campus as large as the University's. "You are very fortunate to have such well-equipped dormitories," he added.

He also discussed scientific journalism with several science professors during his 1-day visit.

Nishigawa was the guest of Dr. Eugene McDonald, professor of speech and director of the speech and hearing clinic.
