## Board to Seek SCCA Approval

By CAROL BLAKESLEE

The Freshman Advisory Board will try for the second time to get the Student Government Association Assembly to approve a Student Check Cashing Agency when a completely revised bill is presented to the Assembly at 7:30 tonight in 203 Hetzel Union Building.

Marcus Katzen, freshman in business administration from Sykesville, took the bill before the Assembly for the first time two weeks ago. At that time the Assembly referred the plan back to the committee for further study.

Katzen was to have presented the plan at last week's Assembly meeting, but decided to delay it until tonight to work further on the plan.

An open meeting was held last Sunday by the board, so that students could ask questions on the proposed SCCA.

The revised plan limits the number of personnel to 10—four on the Board of Control and six on the staff.

The staff could be increased by the Board of Control, however, if it is "necessary for efficient operation," according to Katzen.

The old plan had an elaborate system of boards and called for about 20 students. This part of the plan was questioned the most by Assembly members.

The Board of Control would be selected in April of each year by the previous Board of Control. Katzen said the first board would be set up by the Freshman Advisory Board and submitted to the Assembly for approval.

Appointments to the staff must also be approved by the Assembly.

The fees charged for check cashing in the new bill are generally lower than those in the original. Fees would be lowered again, Katzen said, when the income from the SCCA was sufficient to pay all operational costs.

SCCA hours would be from 12:30 to 5:30 p.m. Monday through Friday, 1 to 5 p.m. Saturday and from 1 to 4 p.m. on Sunday.

### Gulf Company Awards Fellowship to Cosgrove

The Gulf Research and Development Company fellowship in petroleum engineering has been awarded to Joseph J. Cosgrove, graduate student in petroleum and natural gas engineering from St. Helens, England.

The \$3,150 fellowship provides a stipend of \$2,000. The remaining money is used to offset University fees and departmental expenses.

## Hot Weather To Continue For 3 Days

The heat wave should continue for at least three more days.

A huge mass of tropical air will hold Pennsylvania in its grip for several days. This will insure a continuation of the hot and humid days and warm, moist nights.

The heat wave, one of the worst ever observed so early in the season, could possibly become the most severe ever recorded during the month of May.

Temperatures soared to an official reading of 89 degrees yesterday afternoon. Some thermometers in the State College area reached an unofficial 91 degrees.

This official reading of 89 degrees is just four degrees below the all-time high temperature for May, which was set back in 1895.

Today should be hot and humid with a chance of afternoon showers or thunderstorms. If these showers occur, they will be of short duration. The high temperature will be 90 degrees.

The warm temperatures and excessive humidity will make for uncomfortable sleeping weather tonight. Temperatures will probably remain above 68 degrees all night.

Partly cloudy skies, hot and humid weather will continue tomorrow, but the possibility of showers and thunderstorms bringing temporary relief is somewhat greater.

## Next Collegian Will Be Last Of Semester

Tomorrow's edition of The Daily Collegian will be the last of the semester. Regular publication will be resumed the first Sunday of Orientation Week, Sept. 13.

Classified and display advertising for tomorrow's paper will be accepted until 11 a.m. today at the Daily Collegian business office.

The first issue of the Summer Collegian will be published June 9. The business office of the Summer Collegian will not be open until June 2, but advertising may be mailed to the Summer Collegian, Box 261, State College, Pa.

Students may phone Jo Chesworth, AD 8-1902 to place ads for the summer paper.

Mail subscriptions for the Summer Collegian are still being taken. They cost 50 cents for 12 issues. The forms may be mailed or brought to the Collegian office.

## Ike Warns Reds On Berlin Deadline

WASHINGTON (P)—President Eisenhower is reported determined to spurn the idea of a summit conference if the Soviet Union fixes a new deadline for turning East Berlin over to the East German Reds.

He also is pictured as ready to refuse to meet with Soviet Premier Nikita Khrushchev if the Kremlin threatens in advance any kind of one-sided action in East Germany.

Secretary of State Christian A. Herter has made this attitude clear to Soviet Foreign Minister Andrei Gromyko during private talks outside the Big Four foreign ministers conference room at Geneva.

Top officials said Wednesday Herter had Eisenhower's full endorsement.

Herter is understood to have cabled a full report of his meeting with Gromyko to the White House as part of his daily summaries on developments.

Eisenhower's backing of Herter's notice to Gromyko was made known because Gromyko's comments were interpreted as threatening a possible new deadline for handing over to the German Reds control of access routes to the divided city of Berlin.

The May 27 deadline originally set by Khrushchev expires in one week with no sign the Soviets intend to carry out their threats to end four-power control on that date.

Authorities familiar with Eisenhower's attitude stressed the President is sticking to his condition that there must be genuine progress at the foreign ministers level in order to make a summit conference worthwhile.

They said mere absence of Soviet threats will not be enough to persuade him to meet with Khrushchev.

Most administration authorities expect the Soviets belatedly to offer enough concessions to make a summit meeting likely in late summer.

French President Charles de Gaulle's balking at San Francisco as a summit site has complicated the backstage maneuvering.

But De Gaulle's views, sent officially to the State Department, do not rule out the possibility of an American site.

### University Gets \$500 For Metal Research

The University has received a \$500 grant to support research in metal cutting and machinability.

The Bausch and Lomb Company which has given the one-year grant to the Department of Industrial Engineering, has also provided the department with a toolmaker's microscope.

## 5 Injured In Crash At Whipples

Harriet Golin, freshman in education from White Plains, N.Y., was listed in good condition in the J. C. Blair Memorial Hospital in Huntingdon last night after being injured in an automobile accident yesterday afternoon near Whipples Dam.

Miss Golin suffered a fractured jaw, bruises of the right leg and multiple cuts of the face.

Four other University students were involved in the accident.

Lewis Herman, junior in business administration from Harrisburg and driver of the automobile, suffered cuts of the chin and bruises of the right hand and chest, according to Dr. Frederick H. Steele, Huntingdon physician, who treated the students.

Also involved in the accident were Lois Young, freshman in counseling from Mt. Vernon, N.Y., who suffered bruises of the lip and mouth, Carol Coss, freshman in education from Baden, and Walter Devereaux, freshman in aeronautical engineering from Sewickley.

All except Miss Golin and Miss Coss were treated in the dispensary and released.

No details of the accident were available at 11 p.m. last night. Rockview State Police barracks said the accident was not reported until 10:30 p.m. and that the Huntingdon barracks were investigating it.

### Prof Named Head Of Rocket Society

James D. Decker, associate professor of mechanical engineering, has been named president of the University Park section of the American Rocket Society.

Other newly-elected officers are Robert D. Moyer, junior in engineering science from Allentown, vice president; Jack M. Brame of State College, secretary; and John A. Fox, instructor in aeronautical engineering, treasurer.

## Seven on Faculty Win in Primaries

Seven faculty members were nominated for State College Borough offices in Monday's primary elections.

Charles J. Rowland (Rep.), professor of accounting, got 11 write-in votes to win a nomination for borough auditor. No one was running for the position on the Republican ballot.

On the Democratic ticket for auditor, R. Hadley Waters, professor of transportation, received three write-in votes to tie with Boyd Hazel and L. D. Fye.

Arnold Addison (Rep.), associate professor of engineering research, was nominated for Borough Council. Other Republicans nominated are Helen T. Albrecht and Edwin D. Frost.

Democratic nominees for council

were all assured of election because there was no one opposing them. Faculty members nominated are Harold P. Zelko, professor of public speaking; Jefferson D. Beard, instructor of engineering drawing; and Lyne S. Hoffman, associate professor of English composition. Robert J. Miller was also nominated.

J. W. Crane Remaley, professor of education, was nominated for Republican school director. Richard W. Hoy and H. Thompson Dale were also named for the post.

Philip S. Skell (Rep.), associate professor of chemistry, was defeated for the nomination.

The Democratic candidates—including A. Witt Hutchison, professor of chemistry—were unopposed for school director. Other nominees are Dr. William L. Welch and Mrs. Jane R. Jenks.

Leonard A. Doggett (Dem.), professor emeritus of electrical engineering, and Carl B. Hoenstine (Rep.), were unopposed for borough assessor.

Less than 40 per cent of the registered voters in State College cast ballots in the election.

Republicans nominated four of five borough council candidates and three of four school board candidates.

No Democratic candidates were opposed for the nominations.

In Centre County elections, Robert D. Scheirer (Dem.), professor of civil engineering, was unopposed for the surveyor nomination.

J. Thompson Henry (Rep.), of Port Matilda, who has been county surveyor for seven terms, again won the nomination.

SGT. MATTHEW SECKINGER of the State College police holds one of three miniature "bombs" which have been found recently in the borough.
