

## IFC Lists Rules for Lawn Display

Thirty-five fraternities have registered for competition in the Interfraternity Council Alumni Homecoming Lawn Display contest depicting "Penn State—the year 2000."

The contest will be held from 6 p.m. Friday to 6 p.m. Saturday. Judging will take place between 6 and 9 p.m. Friday.

According to Ronald Resh, IFC vice president, no display may cost more than \$50 and no moving parts will be permitted. The restriction on moving parts was made to stimulate a greater number of entrants in the contest and to enable them to concentrate on lighting and other artistic qualities.

Special precautions are being taken to eliminate the fire hazard which plagued the fraternities during last year's contest. It has been urged that fireproof materials be used wherever possible. Pledges have been asked to stand guard by the displays while the contest is in progress.

The contest will be judged under a 100-point system. Twenty points will be given for clarity of theme, 30 points for originality, 20 points for expression of Penn State spirit and 30 points for craftsmanship.

According to Resh, the ease with which the judges can interpret or understand the meaning and theme of the displays will be an important factor in the judging.

Judges for the contest will be Dr. Dorothy Lipp, dean of women, Ralph Wherry, head of the Department of Commerce, Dr. David Russell, professor of elementary education, and Martha Adams, assistant professor of physical education.

The first place winner will receive the Alumni Association Trophy and the top three displays will be announced at the Penn State-Boston University football game Saturday.

### Delphi Cards Available; Deadline Set for Oct. 16

Tapping cards for Delphi, sophomore men's hat society, are available for second and third semester men.

All applications must be returned by Friday to the dean of men's office.

CLEVELAND BOUND—the desk in the HUB was busy selling bus tickets for the trip to the Illinois game next weekend. Russell Noll is one of many students who bought tickets yesterday.

## Explorer VII Is In Orbit

CAPE CANAVERAL, Fla. (AP)—The United States launched one satellite into orbit around the earth yesterday and, in a dramatic new experiment, fired a missile across the path of another.

Explorer VII, a 91½-pound "gyroscope" satellite equipped to study cosmic radiation and other mysteries of space, was hurled into a low orbit by a Juno II rocket. It was another step in the program to send a man into space within two years.

Earlier, a B47 jet bomber flying over the cape fired a 37-foot Bold Orion missile across the path of the Explorer VI "Paddle Wheel" satellite. The shot could lead to development of air-launched missiles to knock down enemy satellites.

The Paddle Wheel was at the low point of its orbit at an altitude of 146 miles and streaking through the skies at 26,000 miles an hour when the Bold Orion was launched. It was aimed to pass 10 miles in front of the satellite.

A reliable source said the Bold Orion sped 10 miles upward, reaching a point four miles above the satellite, then fell into the Atlantic 1,000 miles northeast of here.

In Washington, the Air Force issued a cautiously worded statement saying "preliminary evaluation indicates the mission was successfully accomplished."

Pentagon officials said it might take several days to study and analyze all the data obtained from the missile itself and to coordinate that information with observations made from ground stations.

The "gyroscope" so named because it looks like the whirling devices used to stabilize planes in flight, was placed in an orbit that carries it as far as 664 miles from the earth and as close as 346 miles. It is expected to remain up 20 years.

The National Aeronautics and Space Administration in Washington said the satellite completed its first circuit of the earth in 101 minutes. It was sending back information on the various hazards man will encounter when he first ventures into space.

Its most important task was to probe the lower levels of the bands of radiation.

An NASA scientist said the orbit is "better than we planned." Dr. Homer Newell Jr. said the satellite was aimed at an orbit ranging from 700 miles at its outermost point to 340 miles at the nearest.

Newell said the more circular orbit attained is an advantage from the standpoint of the number of experiments carried.

### Two Ribbonees Omitted

The following names were omitted from the list of ribbonees published in Saturday's Collegian: Bonnie Poeppel, Alpha Delta Pi; and Annette Prudon, Pi Beta Phi.

## Student Enrollment Hits All-Time High

A record total of 20,377 students enrolled for the fall semester on both the main campus and the commonwealth campuses.

The number of students on campus reached an all-time high of 14,786. Last fall 14,634 students were enrolled here.

### Storm to Cause Rain Over Area

Rain and cool weather will be the order of the day as a storm system moves through the Carolinas. This storm should cause rain over the entire middle Atlantic states from New York to Georgia.

The rain will end late in the day and should be followed by partly cloudy skies tonight.

Temperatures will remain on the cool side today and tonight, but warmer weather is likely tomorrow. The high today should be only 56 degrees with a low tonight of 43 degrees.

Tomorrow is expected to be sunny and pleasant with a high of 65 degrees.

Enrollment on the commonwealth campuses reached 5591 students, 356 more than last fall's enrollment of 5532.

On the main campus 10,487 men and 4299 women students are enrolled, including graduate and special students. The ratio stands at 2.4 men to each woman.

On the Commonwealth campuses 2096 are enrolled in courses leading to baccalaureate degrees, 1553 are heading toward associate degrees, and 1942 are in continuing education classes.

Graduate student enrollment reached a total of 2736, 540 more than last fall.

Total enrollment in the senior class is 2954 students. It will be the largest class to graduate in the University's history.

Enrollment in the junior and sophomore classes numbered 3102 and 4304 students respectively.

The freshman class is the largest ever to enter with a total of 5804 students. Last year the freshman class numbered 3355 students.

### OBOC Forms in HUB

Applications are still available for the Organization Board of Control and can be obtained at the Hetzel Union desk.

A 2.4 average and being president of any organization, except a social fraternity, are qualifications for the board.

## 'Who's in the News' Resumes Publication

By MEG TEICHHOLTZ

The exact who and what of the Penn State extra-curricular scene will be brought to light this winter when "Who's in the News at Penn State" resumes publication

Under the co-editorship of Jeff Pollack, junior in journalism from Laurelton, N.Y., and Phillip Hand, junior in journalism from New Milford, the publication will be available in February to any interested student for \$50.

Although not published last year, "Who's in the News" was published the three previous years. A new feature this year will be the inclusion of "thumbnail" pictures with each listing.

"The idea of redesigning the book was to make it more useful to the general public than it has been in the past," Hand said.

Another new feature to be included in this year's publication

will be the listing of the names only of members of hat societies, SGA Assembly, student councils, senior boards of publications, elections committee and major SGA committees.

Pollack stated that the editors feel "that this will make the book more timely and of greater use to the student who must make contact with a member of a specific activity."

The price of inclusion in the book has been reduced from \$2.50 in the past to \$1.75 this year. This includes the picture and one copy of the book.

## Governor's Budget Nears Approval

HARRISBURG (AP) — An agreement was near last night on Gov. Lawrence's budget for the 1959-61 biennium.

Increased aid to schools and money for Philadelphia were the points remaining to be resolved.

Republican and Democratic legislators agreed in separate caucuses to restore \$2.75 million of the \$51 million cut from the general appropriations bill by the GOP-controlled Senate.

But Republicans balked at

restoring \$2 million in the urban renewal appropriation—most of it for Philadelphia—and at giving Philadelphia General Hospital \$1.5 million.

House Republicans also raised the question of more money for the public schools.

The special, six-member, House-Senate committee, which has been meeting since last week to iron out differences over the budget, planned to go back into session to discuss these problems.

"There were 12 Republican votes for the 4 per cent sales tax bill when it passed the

House," Rep. Albert W. Johnson, House GOP floor leader, told newsmen.

"We supplied those votes with the understanding the tax bill would provide \$28 million more for schools. Now that money seems to have vanished."

Rep. Edwin W. Tompkins, assistant GOP floor leader, said the caucus instructed him not to agree to anything until the \$28 million is restored.

Tompkins represents the House Republican membership on the budget committee.

## Cleveland Bus Tickets Still Remain

Sixteen seats on the second bus in the "Cleveland Special" caravan to the Penn State-Illinois football game Oct. 24 were sold yesterday.

Twenty-one more bus tickets must be sold for the bus to go to the game.

Hat society members will sell tickets from 10 a.m. to 4 p.m. today for \$10.55. Sales may extend another day if there is still a fraction of a bus to fill by 4 p.m.

A block of 700 game tickets will go on sale to students for \$3.50 beginning 8 a.m. today at Recreation Hall. The ticket office already reports an advanced sale of 2000 tickets by mail order.

Buses will leave the Hetzel Union Building at 6:30 a.m. October 24 and will arrive in Cleveland at 1 p.m. including a half-hour rest stop.

After the game the buses will leave the stadium at 6 p.m. and will be back on campus by 12 a.m. October 25.

Reservations for each individual bus must be confirmed 24 hours after the ticket is bought. If a bus is not filled the money will be refunded.

All women buying a ticket will be cleared for the trip through the Dean of Women's office.

## Insurance Benefits Increase for Staff

The present hospital-surgical insurance plan for fulltime faculty and staff members has been changed to provide added benefits.

Included in the benefits under the program's new provisions are an increase in the daily hospital room and board reimbursement from \$10 to \$13; an increase in amounts paid for additional charges; an increase in the length of reimbursable confinement for dependents and maternity cases; and the insuring of children at birth instead of at 14 days of age.

The University is considering a plan of major medical expense insurance which would pay benefits for an expensive illness or injury incurring costs beyond the limits of the hospital-insurance plan.
