

USSR Seeks Antarctic Ban

WASHINGTON (AP)—The Soviet Union joined free world countries yesterday in calling for a ban on military use of the antarctic and a guarantee for unhampered scientific inquiries there.

The cordial atmosphere at the opening of a U.S.-sponsored, 12-nation conference was warm enough to melt some of the ice at the South Pole.

Hollywood Star Dies in Canada

VANCOUVER, B.C. (AP)—Errol Flynn, whose real-life adventures often outdid his swash-buckling movie roles, died Wednesday night in an apartment where he had stopped in for a drink. He apparently suffered a heart attack.

The graying 50-year-old actor was en route to the airport with Mr. and Mrs. Caldough and his 17-year-old protege Beverly Aadland.

Mrs. Caldough said he complained of a pain in the back and the doctor they were visiting took him into another room for relief. He lost consciousness while the doctor was out of the room for a moment, she said.

An inhalator crew worked over Flynn for 57 minutes and then he was taken by ambulance to a hospital, where he was pronounced dead on arrival.

Miss Aadland, who rode to the hospital in the ambulance, was placed under sedation.

Flynn had come to Canada to negotiate for the sale of his \$100,000 yacht Zaca. Caldough reportedly was interested in the luxury vessel.

The actor was married three times. He was separated from his current wife Patrice Wymore, who is now appearing at a Washington, D.C., night club.

She was to fly to Los Angeles yesterday.

State Raises Operators' License Fee

HARRISBURG (AP) — The senate yesterday endorsed an increase in the state's dollar-a-year driver's license fee to five dollars every two years.

As approved by the senate the increased fee would bring \$15 million each two years into the motor fund. That is \$5 million more than the house-approved version would bring in.

However, it is about \$5 million less than Gov. Lawrence requested. He had asked for a license fee of \$3 a year.

Senate Republicans boosted the figure over the house version in a compromise move to give the governor part of his requested road revenue program.

In addition to the license fee boost, Lawrence has asked a penny a gallon gas tax increase to bring in \$60 million a biennium.

In other legislative action senate Republicans beat down a Democratic move to bring the administration's proposed tax on out-of-state stocks and bonds to a floor vote.

Voting on strictly party lines, the senate decided, 21-28, against a move to bring the \$55 million bill out of the finance committee.

16 People Injured In Trolley Crash

PITTSBURGH (AP)—A crowded trolley slammed into a tractor-trailer truck in Pittsburgh's Lawrenceville section yesterday, injuring 16 persons. None of the injured was believed hurt seriously.

A parked auto also was damaged in the crash at the intersection of 27th St. and Penn Ave. Traffic was snarled.

De Gaulle Backed On Algerian Problem

PARIS (AP)—The French National Assembly early today voted President Charles de Gaulle a free hand in his effort to bring peace to Algeria through self-determination.

The unofficial tally of votes showed 441 approving the government's Algerian policy to 21 opposed, with 90 abstaining or not voting.

The constitution of the Fifth Republic does not require Parliament to pass on the President's actions. The massive endorsement of his policy gave him added strength to end the 5-year nationalist rebellion.

Although De Gaulle has declared for the principle of self-determination by the Algerians he has made clear that he favors local autonomy for the country, not independence.

Opponents of his plan feared, however, that autonomy would only be a stepping stone to independence.

They favor the third choice offered by De Gaulle—complete integration of Algeria with France.

The main drama was played outside the Assembly. Most Frenchmen were more interested in just what might already be in the works to get a ceasefire in Algeria.

Despite repeated reports of secret diplomatic contacts in Tunis, Rabat, Madrid and elsewhere, there was still no official confirmation that the two sides were really getting together. But there was a growing feeling both inside Parliament and out that they were groping for contact.

New Tax Stays In Committee

HARRISBURG (AP) — Senate Democrats tried unsuccessfully yesterday to force the administration's personal property tax out of the Finance Committee.

The Republican-controlled Senate defeated the move 21-28, voting straight party lines. Democrats said the revenue could be used for increasing school aid.

Top Republicans have declared that the tax on stocks and bonds, which would yield some \$55 million during the biennium, is dead. The levy has been in the committee since June 30, when it was approved by the House.

Sen. William J. Lane (D-Washington) asked the Senate to bypass the committee and bring the bill out for action so the money could be used to increase state aid to schools.

"We have taxed the poor people of this commonwealth with a 4 per cent sales tax," Lane declared. "There is no reason why we shouldn't tax stocks and bonds."

Americans Win Nobel Prize

STOCKHOLM, Sweden (AP)—The 1959 Nobel Prize in medicine was awarded yesterday to two American scientists who have synthesized two basic chemicals of life in research on heredity.

Dr. Severo Ochoa, 54, of New York University's College of Medicine, and Dr. Arthur Kornberg, 41, of Stanford University, Stanford, Calif., will share \$42,506 in cash.

In Stanford, Dr. Kornberg received the news with a cheerful "O.K." and said he planned to go to Stockholm in December to accept.

"It's one of those things—it shouldn't change anything," he said.

In New York, Dr. Ochoa, a nat-

uralized American born in Lurca, Spain, smiled happily at congratulations of a host of colleagues, students and friends.

Sipping champagne from a paper cup, he said: "It is a very great honor, something very good to happen to a scientist."

Physicians who chose to work in biochemistry, the two created the nucleic acids DNA and RNA. Nucleic acids derive their name from the cell nucleus, the basic component of living things.

DNA is the scientific nickname for DeoxyriboNucleic Acid, a substance which holds the secrets of such inherited characteristics as race, height, the color of eyes. Dr. Kornberg has specialized in this field.

RNA stands for RiboNucleic Acid, which takes part in the production of protein. That has claimed the attention of Dr Ochoa.

They worked together for a year in 1946; otherwise have pursued their research independently. Their experiments have helped to clarify the workings of heredity. It may in the future become possible to alter the heredity of human beings, animals, plants.

This could mean longer life, freedom from presently inherited diseases, perhaps control over cancer.

The two Americans were selected by the Swedish Royal Caroline Institute of Medicine and Physiology for the professional and monetary honors awarded since 1901 under the will of Alfred Nobel, the Swedish inventor of dynamite.
