A homecoming tea for alumni will be held by the Association of Independent Men and Leonides from 4:30 to 6 p.m. tomorrow in the main lounge of the HUB.

"A Market Square" will be the theme of the annual Hort Show which will be held tomorrow and Sunday in the Stock Judging Pavilion.

A cider party will start off the festivities in the HUB at 8 p.m. tomorrow. A Homecoming Dance will follow the party from 9:30 until midnight.

The fraternity lawn displays, using the theme, "Penn State—the Year of 2000," will be on view for the alumni during the entire weekend.

Tribunal Warns One Student

A student was given a Tribunal warning Tuesday night at a meeting of Off-Campus Tribunal.

The student and a friend appeared before Tribunal last week for the same offense. They removed a stop sign from the alley between Pugh and Allen Sts. about 4 a.m. on Sept. 9. They were caught with it climbing over a wall near the Weis Market by a borough patrolman, were taken to the borough office and were held overnight. Each was fined \$61.50.

The student received a warning because his fraternity had refused him social privileges for the remainder of the semester.

His friend received a stiffer penalty (suspended suspension) because he was on disciplinary probation last year.

DESIGNERS MEET PLANNERS to talk about the proposed Allen St. mall. William A. Hajjar, professor of architecture, explains some of the reasons for building the mall at last night's meeting at Borough Hall.

Designers Studying Idea of Town Mall

By JEFF POLLACK

A pedestrian overpass over College Ave.? No. Well, how about one for cars?

That's the problem facing the fifth-year architecture students studying the possibility of an Allen St. shopper's mall.

Should there be an exhibition pavilion at the Beaver Ave. end of the mall or would it destroy the desired effect? This is another problem.

The results of the 3-day survey taken two weeks ago have been completely tabulated and the class is now preparing preliminary sketches.

The class is studying many possibilities of laying out and designing the mall. One suggestion was an elevated glass building for the Chamber of Commerce. Another student suggested a covered area so shoppers could wait for cars picking them up.

Should there be an underground tea room at the south end of the street or should it be a plaza? The class discusses the relative advantages of each idea and the disadvantages. When they have decided on what to have, detailed and final drawings will be made.

William A. Hajjar, professor of architecture, in charge of the project, is not making the decisions. He has left them up to the class, but he keeps constant watch to point out various points.

One of the major problems the mall poses for the class is what to do with the north or campus end of the street. The idea is to make the mall extend from Beaver Ave. on the south to the University Library on the north.

In order to accomplish this the traffic problem on College Ave. must be solved. Should an elevated roadway be built over Allen St. or a pedestrian walk over College Ave.

These and many more problems will be solved by the class in coming weeks as designs for the project are accepted.
