

Returning Steelmen Riled Cranberry Growers Fear Loss Seek Peak Output

PITTSBURGH (AP) — Major steel firms counted between 50 and 75 per cent of the normal work force on the job yesterday in a race to hit peak production.

By the end of the week virtually all of the 500,000 steelworkers will be back on the job. More than 20,000 of 335,000

Hagerty Blasts Labor Leader

WASHINGTON (AP) — White House press secretary James C. Hagerty called labor union leader Emil Mazey a demagogue yesterday for saying President Eisenhower paid off a political debt by getting a court order that halted the steel strike.

Mazey, secretary-treasurer of the United Auto Workers Union, shot back that Hagerty is "a stooge of the steel companies, a lackey of big business."

David J. McDonald, whose United Stelworker Union is at the core of the dispute, kept well clear of the row.

"I've never had a fight with a president in my life and I'm a little too old to begin to fight presidents now," McDonald told newsmen.

The Mazey-Hagerty exchange at long distance grew out of Mazey's speech Monday to the AFL-CIO Industrial Union Department.

The UAW leader said he charged President Eisenhower with a political payoff to steel companies in invoking the Taft-Hartley law to end the 116-day steel shutdown at least for 80 days. Mazey said the alleged payoff was in return for \$214,500 he said was contributed by steel company officials to Eisenhower's 1956 reelection campaign.

French Santa Claus

PARIS (AP) — The first Santa Claus of the year has appeared in Paris. He stands outside a big downtown department store reminding people it's 39 French shopping days to Christmas.

workers idled in allied industries also have been called back.

Railroads, hardest hit, expect to recall additional help dependent on the needs of the mills. Steel-owned coal mines also showed a pickup in production.

Some steel firms already have found output exceeding expectations, three days after the Supreme Court ruling to uphold the Taft-Hartley injunction in the 116-day strike.

Quick-heating electric furnaces yielded the first new steel. But despite industry's fast recovery, normal production is expected to take from four to six weeks.

An auto industry spokesman reported that steel production resumed in time to prevent any serious disruption of car output by three automakers—Ford, American Motors and Studebaker-Packard.

However, the pinch of steel shortages may continue to affect General Motors and Chrysler.

GM will halt the last of its assembly lines today for lack of steel. Steel shortages have idled more than 210,000 auto workers, most of them at GM.

Soo Canal Locks

SAULT STE. MARIE, Ont. (AP) — The U.S. Coast Guard says there is a good possibility the U.S. locks of the Soo Canal will remain open past the Dec. 15 winter deadline to allow iron ore boats from Lake Superior to restock supplies at U.S. steel plants. Unloading has been idled by the steel strike.

Lobster House

116 ATHLETION ST. STATE COLLEGE PA. OPEN 7 DAYS 5 TO 9 P.M. SUNDAYS 12 TO 9 P.M. RESERVATIONS AD 8-0082

WASHINGTON (AP)—Cranberry producers, angry and dismayed, demanded yesterday that the government move quickly to locate and get off the market the cranberries it says are risky to eat.

The producers want to make sure housewives have no qualms about buying cranberries, traditional fare for Thanksgiving and Christmas. Otherwise, the growers and processors face heavy financial losses at the peak of their

season, with the holidays just around the corner.

There were sharp words for Secretary of Welfare Arthur S. Flemming, including a demand that he be fired. Flemming told about the offending berries at a news conference Monday.

Flemming said parts of the 1959 cranberry crop from Oregon and Washington were found to be contaminated by a weed-killer—aminotriazole—that can produce cancer in rats.

He did not say how much of the crop might be affected, or where it may be on sale. Flemming added that there was no reason to suspect the current crops

from Wisconsin, New Jersey and Massachusetts.

Then Flemming went on to advise that housewives be on the safe side by not buying cranberries unless they can determine that the berries are not contaminated. That especially made the cranberry producers angry.

Flemming mentioned one 1959 lot from the Oregon-Washington area as having been distributed before it was identified. Another lot, he said, was caught before it was distributed. He added that the 1958 crop from the same area also is being tested.

Atomic Sub 'Triton' Joins Naval Fleet

GROTON, Conn. (AP) — The atomic-powered Triton, the mightiest submarine known, joined Uncle Sam's Navy yesterday. She will operate as the eyes and ears of the fleet.

The giant sub was commissioned with an expression of "congratulations and good luck" from President Eisenhower. She is the latest addition to the Navy's ever-increasing nuclear underseas force.

The Triton was an imposing sight as she sat in the sunlit Thames River, the crew of 173 officers and men on the aft deck during the 45-minute exercises.

The superlatives spoken at the noonday ceremonies only matched those of the 100-million-dollar 5900-ton ship, itself. The Triton is 447 feet long, the length of an early one and one-half football fields, and 58 feet from the bottom of her keel to the top of her superstructure—about the height of a five-story building.
