

Krogman Talks On Evolution

By KATIE DAVIS

The immense journey from the single-celled organism to man took about 2.5 billions years, Wilton M. Krogman, professor of physical anthropology at the Graduate School of Medicine of the University of Pennsylvania, said Sunday night.

Krogman's speech "The Origin and Physical Development of Man" was the second in the Darwinian Series sponsored by the University Lecture Series.

The first step of the journey was the change from unicellular to multi-cellular life, he said. In the many-celled forms of life differentiations in tissues appeared along with primitive nervous systems.

Then came the development of vertebrae patterns of life, he said. Backbones were important to increased motility and voluntary locomotion.

The appearance of mammals with placental births, warm bloodedness and specialized teeth was another important development in pre-human evolution.

Seventy million years ago primates appeared which possibly arose from other placental mammals. Krogman said there early primates were in danger of being driven out by rodents and thus left the ground for the trees. Prehensibility, motility and good vision became extremely necessary for their survival.

The common ancestor to primates and man probably existed about 50 million years ago, Krogman said. At that time apes began to specialize in one direction and man in another.

"The diversification of forms took place in East Africa and thus we have here the cradle of mankind," Krogman said.

Campus Party--

(Continued from page five) of that given by Garlock was advanced by Marilyn West, candidate for junior assemblyman.

Miss West said she "thinks it ought to be on a selective basis, whereby those people who want to go on to be officers can enroll in the ROTC program."

Miss West also said she favored the vice president chairing the Assembly. Garlock and Alexander both agreed on the matter.

Garlock said "the president has lost a little bit of his power . . . changes should be made to eliminate this loss."

"The vice president, secretary and treasurer of the class should be elected," Garlock said. "It's an awful big job to appoint someone to the position."

Alexander said he thought that might be the situation in the freshman class but in the upper classes appointment would be all right because the president would know who was capable of handling the job.

Miss West said she thought it is "silly to complicate the elections by placing the other positions on the ballot."

Armory, Carnegie Site of Ticket Sale

Students wishing to obtain tickets to the Mil Ball may purchase them at the ROTC detachments in either Carnegie or the Armory.

Previously it was announced that tickets for non-cadets were available at the Helzel Union desk but the HUB has not yet received the printed tickets and has been referring students to the detachments.

Yesterday over 300 tickets were sold of the 1000 which are available.

Mil Ball will be held from 9 p.m. to 1 a.m., Dec. 4 in Recreation Hall. The cost is \$5 per couple and the dress is military formal.

The ball will feature the Tommy Dorsey Orchestra starring Warren Covington.

English Tutoring Offered

Sigma Tau Delta, national professional English honorary, will provide a free tutoring service for all courses in English literature and composition.

Interested students should contact Barbara Barrow UN 8-5988 for information.

University Analysis

Prexy Predicts Changes in Education

By JEFF POLLACK

Last of a Series

The whole pattern in education is going to change in the next 25 years, according to President Eric A. Walker.

Walker said the changes will especially affect the top level kind of people who will be the thinkers and doers in large scale affairs.

"Because the body of knowledge is growing," Walker said, "no student can expect to cover the body of knowledge in his own field while he is in college."

The President said the University is "not going to turn out educated men." It will only be

able to introduce him to the body of knowledge in his chosen field and let him study after graduation to fill in the remainder.

He said it would be the job of the University to "show the student where the knowledge is, rather than give it to him. About all we can do for the really bright boys is open windows and charge batteries."

Walker said the University was going to put more emphasis on the top flight students and graduate work in the future. For the remainder of the students the program will not be changed drastically.

"We will have to develop curriculum through a wide spectrum to take care of the doers."

Walker referred to the people, other than the very top flight who he termed the "thinkers, philosophers and innovators."

He said he thought many of the walls within the University will go down. "People will talk more about physical science than electrical and the human sciences rather than biological," Walker said.

According to Walker, the University will have to really work on an honors program to fully develop it. He said that in the senior year students "might not take any courses at all. They might prepare themselves for graduation under a professor's guidance.

"There will have to be close cooperation between teachers and students, like the British system," Walker admitted it was impossible to use this system with thousands of students.

"The honors program will work for only 2 to 5 per cent of the students," he said. The remainder will continue with the present program, with some relaxations.

Walker said he was very happy the University had been chosen to join the Association of American Universities which has only 40 members. He said this put us with very exclusive company and among the top 40 colleges in the country.

BusAd Students Tie for First In IBM 'Bowl'

A team of five graduate students in business administration shared first place with Illinois in the Business Bowl this weekend.

The bowl, sponsored by International Business Machines, was played in Chicago Friday and Saturday. Those participating from the University were Paul Cryder, from State College; Ronald Herlihy, from New York City; Michael Hottenstein, from Myerstown; Howard Kreps, from Pittsburgh; and Richard Leshner, from Chambersburg.

The teams were given hypothetical businesses, which were not in good financial positions, to operate.

The players received quarterly reports on the firm's progress. Business decisions dealing with expenditures, pricing and investment policy were fed into an IBM computer, which showed the outcome of the decisions.

The College of Business Administration will receive a scale model of an IBM RAMAC 650 computer as a trophy.

Max D. Richards, associate professor of management, and Fred W. Kniffin, associate professor of marketing, were the team's advisors.

University Party--

(Continued from page five) added that students in college should be mature enough to know what benefits them.

On the Assembly chairman issue:

All the candidates present at the interview were in agreement on this issue. Carson explained that the present system of having the vice president presiding over Assembly was suitable because it lessens the workload of the SGA president.

Miss Cavanagh added that with the vice president heading the Assembly, the president is given more time for some extra duties such as speaking engagements.

On the additional class officers issue:

Steven Ott, candidate for senior assemblyman, stated that "class vice presidents and secretary-treasurers should definitely be elected."

Barbara Isaacson, candidate for freshman assemblyman, said that advisory boards should elect these officers, particularly in the freshman class since freshmen are less familiar with the candidates.

Mark Sandson, candidate for sophomore president, said he did not see the necessity of the two officers. He stated that a competent president would be able to handle the job he was elected to fulfill.

Counselors Outline Available

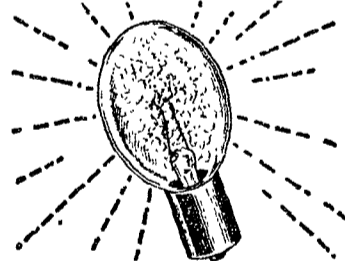

Women Orientation Counselors who missed last night's meeting concerning the counseling outline can pick up material on sororities in 47 Simmons before 10 tonight, according to Henrietta Harris, chairman.

COMPULSORY LOCAL AD STAFF MEETING
