

Power Line To Go Through; Exact Route Not Determined

The proposed power line for the State College area will be put somewhere on Mt. Nittany but the "exact route is subject to change," John Novotny, district engineer for the West Penn Power Co., said yesterday.

The line "must go through in that general area," Novotny said following a company district meeting.

However, only preliminary surveys have been taken and the exact route has not been definitely determined. "We'll keep at it to see what we can do to satisfy everybody," Novotny said.

He was referring to a protest made by the Lion's Paw Alumni Association that the power line would scar the natural beauty of the mountain.

Earlier in the week, Robert M. Koser, association president, said the group will do everything it could to prevent the line from cutting across the mountain. The association purchased 560

acres on Mt. Nittany in 1946 to prohibit a lumber company from cutting timber from the sides of the mountain.

The path of the power line, however, would not fall on the association's property.

The line, running from the Milesburg substation to the Shingletown station, will, as proposed, follow the timber line on the lower slopes of the mountain and will be "cut off" before it runs across the face of the mountain, Novotny said.

The path will not spoil the view for most of the area residents, he said.

However, Koser said, "The mountain is a college symbol and no changes whatever should be made in its appearance."

Parsky to Head Supreme Court

Robert Parsky, senior in architecture from Philipsburg, was elected chairman of the Supreme Court Monday night at its initial meeting.

Parsky is Interfraternity Council Board of Control chairman.

Other members are Lanny Dey, chairman of off-campus tribunal; Malcom Stauffer, traffic court chairman; Carol Raidik, panhellenic board of control chairman and Dorothy Toklish, judicial court chairman.

The organizational board of control chairman and the chairman of on campus tribunals have not yet been chosen.

Real Cool Coeds Hold Fire Drill

The thermometer shivered in its teens last night—an automatic signal that it's fire drill time again.

Coeds in Lyons where the drill was supposed to be held and Haller, where by mistake the alarm was also set off, marched stiff legged and armed at about 9:30 last night.

Just after the bell rang in Haller, a hostess entered the lounge and announced to the coeds and dates assembled there: "I'd advise you to leave, this may be the real thing." Some did, others thought it was too cold, deciding if there was a fire at least they'd be warm.
