

# Admittance Rules to Be Simplified for Applicants

Incoming freshmen will no longer be checking one of 63 boxes marked accounting or retailing or applied art or, or, or, when they apply for admittance to the University.

Undergraduate students will now be admitted through the nine colleges or the Division of Counseling in an attempt to "simplify the number of tracts of entrance," Lawrence E. Dennis, vice president for academic affairs, said.

Prior to this program, passed by the University Senate Nov. 5, students were admitted to the University on the basis of their high school records, their test scores and their choice of curriculum.

If a student had a poor record in mathematics and checked on of the engineering curricula, he would have a poorer chance of being admitted, Dennis said.

Under this new program the entrance requirements will be the same for all curricula within a given college and, for example, a student would apply for admittance through the College of Business Administration instead of accounting, he said.

This will give the student a "better opportunity to make up his mind after he enters," Dennis said. The student will no longer be required to have a specific major but will be admitted to a "broader area of study."

The University Senate also passed a recommendation that colleges have common frosh year programs whenever possible. Following the recommendation the colleges of Engineering-Architecture, Chemistry-Physics and Mineral Industries will have the same program for all freshmen in 1960.

### Freshmen to Hold Tea

Freshman women will have a tea for all upperclass women at 2 p.m. Dec. 6 in Atherton lounge.

Entertainment will be provided by the freshmen.

# 'Monitor' to Appear for Last Time

The last issue of Monitor, Education Student Council's news magazine, will come out this week.

The council decided Tuesday night to discontinue the news magazine because of difficulties in printing. Beverly Yurick, alternate chairman of the Monitor committee, said that by the time the news is sent to the printer and arrangements for printing and releasing it are finished, the news is too old.

The council will start a new paper in the form of some kind of a newsletter next semester.

Dorothy Newman, council president, gave an orientation survey report on the Student Personnel and Welfare Committee on Education. The committee stated that the objectives of orientation program were to meet personalities of the College of Education; to help the incoming freshmen to find their way around the campus; to give freshmen the opportunity to identify themselves with their college and curriculum; and to assign advisors to the freshmen and help them make out their schedules.

Several suggestions were made by members of the council on how to make the orientation program more effective.

# Council Offers 2 Scholarships

Could you use a full semester's tuition? Each year the Engineering and Architecture Student Council offers \$240 scholarships to two outstanding sophomores in the College of Engineering and Architecture.

Last year there were fewer than 15 applicants for the two scholarships and this year no one has yet indicated his interest.

The awards are given on the basis of scholarship, financial need, extracurricular activities and character.

Application forms may be obtained from the scholarship office, Old Main or 204 Sackett. Completed forms should be returned to 204 Sackett before 5 p.m., Dec. 4.

CANBERRA, Australia (AP) — Australians traveling abroad now may take the pounds equivalent of \$4480 for spending anywhere, Treasurer Harold Holt announced.

### Prof to Attend Meeting

George M. Dusinger, professor of mechanical engineering, will attend a meeting of the National Academy of Sciences advisory panel to the National Bureau of Standards Building Technology Division in Washington, D.C., Nov. 24.

### Profs Co-author Book

Peter W. Knepp, instructor in forging and welding, and Benton K. Bristol, instructor in agricultural education, are the authors of a book on basic principles of forging and welding.
