

# Joint Committee to Head Artists, Lecture Series

By CAROL BLAKESLEE  
The Artist and Lecture Series Committees will soon be combined, SGA President Leonard Julius told the Assembly last night.

Wilmer E. Kenworthy, executive assistant to the President, told Julius several thousand dollars will be appropriated to carry on Lecture Series events.

The money will probably be granted by the end of the semester, he said, so the committee could be operating by next semester.

The combining of the two groups would involve some slight changes of personnel within the committees, he added.

Julius also announced in his

executive reports that a permanent plastic shell is being constructed to improve acoustics in Recreation Hall for Artist and Lecture Series performances.

The shell is only part of a central unit which will be fully constructed as soon as more funds can be obtained, he explained.

Julius also reported that the Artist Series Committee decided 1 p.m. was the best time for ticket distribution for Artist Series events. There had been complaints that many students were unable to get tickets because they had classes.

Julius also suggested that the Assembly might consider looking into the seating arrangement for students in the new Beaver Field stadium.

He said that at present most students will be sitting in the horseshoe part of the stadium his does not include those in the flashcard cheering section, however, who will be seated between the 40 and 50-yard line.

# Junior Panhel To See Council

The Junior Panhellenic Council will sit in on meetings of their sponsor, Panhellenic Council, beginning next week. Judith Weiss, vice president of the younger group, said last night.

This action was taken to give the new sorority pledges an opportunity to learn about the procedure and problems of Panhellenic life and activities. Barbara Strauss, co-chairman said.

Members of Jr. Panhel will take rotating positions as observers until each member has attended a meeting.

Also discussed at the meeting were plans for the council's project—collecting holiday gifts for the mentally ill.

Open bidding, the plan by which sororities may bid a coed who has registered for rush and who did not pledge after the close of formal rush, was also clarified for the council.

Moss is responsible for the unusual production technique employed in "The Tempest" and "Measure for Measure," which requires simple costuming and little scenery. He prefers to have American actors in the company because the American accent is easier to follow and allows for more personal enjoyment for the audience.

# Announcing a comprehensive Postgraduate Education Program for engineers, scientists and mathematicians

Ever since the founding of the company some forty years ago, IBM has recognized education as an integral and continuing part of a professional person's life. Through formal educational programs within the company, and through affiliations with universities, it has long been possible for IBM employees to earn scholastic credits. Now a comprehensive Postgraduate Education Program, surpassing any previous program, has been initiated at IBM for plant and laboratory personnel.

### ADVANCED DEGREE UNIVERSITY PLAN

A qualified engineer, scientist or mathematician, who has been with IBM at least a year, may compete for a fellowship or a scholarship in selected fields at the university which he believes offers the finest opportunities for advanced study. All benefits that would normally accrue if the candidate were on active employment will be retained.

- *Doctoral Fellowships:* Selected candidates will receive full tuition, fees and regular salaries for full-time study up to three years.
- *Masters' Scholarships:* Selected candidates will receive full tuition, fees and regular salaries for an academic year of full-time study.

### ADVANCED DEGREE ON-SITE PLAN

A qualified engineer, scientist, or mathematician may undertake part-time graduate studies at an IBM plant or laboratory, concurrent with active employment.

- *Masters' Degrees:* Candidates may complete their studies at company expense under various programs operated in conjunction with universities near IBM facilities.

### ADVANCED STUDY PLAN (NONDEGREE)

These studies offer continued educational opportunity throughout a career at IBM. They are not generally degree-oriented. Given at or near IBM facilities, they are designed to help retain mastery over basic engineering, science, and mathematical subjects and to gain knowledge in advanced fields such as number theory, finite mathematics, magnetism, solid state physics, and network analyses.
