A Campus-to-Career Case History

Bill Dugan goes over work schedules with Chief Operator Merle Brauch in the Des Moines toll center.

## Bill Dugan wanted responsibility. See how he's done in just four years.

When William P. Dugan graduated from State University of Iowa in 1955, he had a degree in business administration, a wife, and a firm resolution to get ahead in business.

Bill went to work with Northwestern Bell Telephone Company at Des Moines. "I wanted to work where I'd find real opportunities for advancement and get the training necessary to take advantage of them," he says. "I couldn't have made a better choice."

Ten months of diversified training taught Bill the "language" of the business and gave him the know-how and selfassurance he needed. He was transferred to the Traffic Department at Cedar Rapids where he gained experience in operating room procedures, force scheduling and training and in supervising operating personnel. He returned to Des Moines and in February, 1952, was promoted to District Traffic Supervisor there.

Today, Bill heads up an organization of ten supervisory people and about 230 telephone operators who handle approximately 42,000 calls each day. He is also responsible for auxiliary services such as Information and the Telephone Company switchboard.

"This is a booming business," says Bill. "There are new problems coming up every day to keep my job interesting and challenging. I don't know where a man can find more genuine opportunities to improve himself."

Bill Dugan found the career he was looking for with a Bell Telephone Company. You might find yours, too. Talk with the Bell interviewer when he visits your campus-and read the Bell Telephone booklet on file in your Placement Office.
