

Damage from Fire Not Yet Estimated

Alpha Fire Co. Chief George Miley said yesterday that no estimate of damage has yet been placed on the fire which gutted the home of Roy P. Matelski, professor of soil conservation.

According to Miley, the blaze started in the Matelski garage, in the vicinity of a trash barrel at 1 a.m. yesterday. The professor's car, a late model 4-door sedan, was completely destroyed. From the garage the fire then spread to the attic of the 1-story, year-old house, causing extensive water damage to the living areas and completely destroying the roof, Miley said.

Chief Miley irately denied that there was a water shortage at the scene of the blaze. He explained that one of the pumper trucks could not be started due to a faulty battery. Until the truck could arrive, Alphas were forced to use a tanker to use a tanker to keep boosters running on the other trucks. "When the pumper did come, we were able to handle the fire," Miley said.

The volunteers were called at approximately 1 a.m. when Mrs. Matelski noticed the smoke. When the firemen arrived the flames had already spread to the attic.

The Alphas were hampered throughout the blaze by extremely heavy smoke and holes were cut in the roof in an attempt to relieve it.

Firemen remained at the home until 4 a.m. when the blaze was completely extinguished.

100 Expected At Conference

Approximately 100 students and businessmen are expected to participate in the first annual Management Conference which will begin today, sponsored by the local chapter of the Society for the Advancement of Management.

Jack Turner, representing the International Paper Company, will give the opening address in place of Joel Ranum (Whirlpool Corp.) who is unable to attend. He will speak on "Design for Decision."

The conference includes several other speakers, luncheon and dinner as well as afternoon discussion sessions.

The deadline for student registration has been extended until 11:30 a.m. today. The fee is \$3.00 which pays for the entire conference.

"I Give...

Daily Collegian Subscriptions and so should you!"

\$3 starts the subscription Jan. 5 for the entire Spring Semester.

FREE gift card with \$3 payment at the Collegian business office, ground floor Carnegie.

University Party To Elect Chairman

The University Party will meet to elect a new party chairman at 7 p.m. tomorrow in 121 Sparks.

Only regular members may vote in the election.

An open discussion on past party policy of taking stands on campus issues will follow the election. Among the issues to be considered are the ROTC program, Nittany living conditions and transportation.

'Project Joey' Set To Entertain 48

'Project Joey', a plan to entertain 48 orphans at a party in the Nittany area, will go into operation at 12 noon tomorrow.

The 1000 men who live in the Nittany area will bring to the campus 48 children from St. Mary's Orphanage and St. John's Orphanage in Cresson. The children will range in ages from 6 to 12.

Students will take them on a tour of the campus, serve them a holiday dinner, entertain them in their living units and climax the day with a Christmas party complete with entertainment, Santa Claus and gifts.

Members of Leonides and personnel from the orphanages staffs will assist the Nittany area students in caring for the children during the holiday visit.

4 RECENT GRADUATES + 4 GOOD OPENINGS = 4 PROMISING NEW CAREERS

PENN STATE '59

Civil Engineer Joe Oyler avoids going through a long, drawn-out apprenticeship. His new job makes full use of his training and ability, right from the start. He works in structural design for an electric company in Pennsylvania.

CARNEGIE TECH '59

Andre Giroux gets advanced professional training at company expense. On the payroll of one of Pennsylvania's electric companies, Andre studies the electronic computer at a New York school. He'll use the "brain" in his work as a research and development engineer.

INDIANA U. '58

Marian "Mitzi" Smith broils mouth-watering shish-kabob in her test kitchen. She's a Home Service Representative with an electric company in Pennsylvania. Mitzi is glad her company offers genuine career opportunities for women.

PITT '59

Nelson Tonet, mechanical engineer, looks forward to a promising future. He's with an electric company whose output is doubling on the average of every ten years. Nelson knows that this planned expansion increases his chances of reaching the top.

When a man finds his way into the right opening for him, a promising new career is born. That's why the electric companies of Pennsylvania take such pains to match the man to the job. For information, write to Pennsylvania Electric Association, State Street Building, Harrisburg, Pa.
