

# Resorts, Camps Seek Summer Employes

By JOANNE MARK

Are you interested in spending your summer vacation at a resort or camp? Do you plan to work over the vacation to make money to help with your college expenses in the fall?

If your answer was yes to either of these questions, perhaps you will be one of the students who will go to the Summer Employment section of the Placement Office in 112 Old Main this week.

Applications for summer employment in 127 camps in 27 states and 21 resorts in 8 states are now available in the office.

Most camps offer jobs in many areas. Openings exist in general counseling and such specialized areas as athletics, arts and crafts and waterfront direction.

Resorts, too, offer all types of openings from the ordinary requests for waitresses and bellboys to unusual ones for bartenders, pianists, social directors, beach boys and riding instructors.

Representatives from camps and resorts will interview students on campus during the next few weeks.

The Summer Employment office has information on file concerning dates of employment.

salary ranges, specific duties, location of resorts and camps, size and type.

Students may obtain this information and applications for jobs in the office. They may also write directly to the camp or resort in which they are interested.

Notices will continue to come in until spring vacation; the files remain open until June.

The student Summer Employment office also has a list of students enrolled in the University now who have held positions at the various locations. Students may contact these persons to get general information about the jobs.

Last year 17 camps and one resort interviewed students on campus. To date, four camps have arranged to interview and many more are expected to make arrangements.

## Hyde Will Give Talk On Microscopy at MI

Dr. W. Lewis Hyde, director of development for the J. W. Fecker Division of the American Optical Co., will speak on "Recent Developments in Microscopy" at 4:15 p.m. today in the Mineral Industries auditorium.

# JOB OPPORTUNITIES!

A General Motors representative will be on campus

February 15, 16, 17, 18, 19

Contact your college placement office to arrange an interview.

*shaping the course of power  
...in hydraulics*

General Motors engineers measure the torque and efficiency characteristics of torque converter blade designs with high velocity fluid flow, using electronic measurement devices to solve for unknowns in highly complex mathematic design problems.

What's your specialty, your first love in science and engineering? Astronautics? Automobiles? Electronics? Jet Power? Refrigeration? Basic Research? You'll find opportunities in all of these fields and many more at General

Motors. Because GM is a company where you and your talent can really go places. There's no dead-ending here. You can go forward by working on a variety of challenging projects, moving up through your division, and there's also a possibility of moving across to other divisions. Interested in postgraduate studies? GM provides financial aid. There's also a summer program for undergraduates. You gain work experience while vacationing from school.

Get the story on a rewarding GM career from your Placement Officer or write to General Motors, Personnel Staff, Detroit 2, Michigan.

# GENERAL MOTORS

GM positions now available in these fields for men holding Bachelor's, Master's and Doctor's degrees: Mechanical, Electrical, Industrial, Metallurgical, Chemical, Aeronautical and Ceramic Engineering • Mathematics • Industrial Design • Physics • Chemistry • Engineering Mechanics • Business Administration and Related Fields.
