

Movie Funds to Aid New School Library

The motion picture "It Happened to Jane" will be presented at the State Theater today, with all proceeds going to the Houserville School to help start a school library.

In cooperation with the Houserville Parent Teachers Association, University students and townspeople have been working on this "movie party" project for the past five weeks.

Teachers at the Houserville School, which is two miles outside of State College and included in the State College Area School system, will select the books to go into the library.

The project first started out to be a community service project of Pi Lambda Phi social fraternity. With the encouragement of Dr. Jerome M. Weiss, assistant professor of secondary education and a member of the Houserville PTA, more students began to work on the project.

Weiss said that most of the students are in secondary education.

The movie, which stars Kim Novak, Jack Lemon and Ernie Kovacks, will be presented four times today starting at 1:30 p.m., and running through until the 9:30 p.m. presentation.

Tickets at 75 cents are being sold in the Hetzel Union Building, Murphy's Five and Ten and at the State Theater.

Students working on the project are committee co-ordinators, William Dusack and Richard Campbell; publicity, Iris Pogal, chairman, and Nancy Gilliland.

Posters, Mona Meabon, chairman, Ann Anderson, Patricia Purdy, Marilyn Crowell, Martha Zsidisin, Warren Hullo, Jack Meiss, Carol Stone and Janet Toluck; tickets, William Collins, chairman, Gilbert Sergeant, Wayne Clawson, Zelda Greenspan and Joyce Meisler.

Organizations working on the project are Acacia, Alpha Omi-

cron Pi, B'nai B'rith, Chi Lambda (I) Foundation, Kappa Alpha, Thompson residence hall, Kappa Delta, Lambda Chi Alpha, Outing Club, Pi Lambda Phi, Pi Kappa Alpha, Sigma Tau Delta and Zeta Tau Alpha.

Members of the Outing Club have been selling tickets in the HUB, and members of Chi Lambda social sorority have been selling tickets in Murphy's Five and Ten.

BusAd Council Forms Available in Boucke

Gym Show--

(Continued from page ten) gent and let them do what they want about sports."

Rich Barasch, UCLA, and Pat Bird, Illinois, are testimonials to handicapped athletes. Both had polio when youngsters and it left them with withered legs. Barasch couldn't walk till he was five years old.

In spite of their handicaps both men fashioned for themselves fine bodies and became champions in their events.

A Los Angeles Metropolitan AAU champ, Barasch tied for second in the rope climb Saturday. Bird, captain of the potent Illinois squad and Big Ten ring titlist, tied for third in the still rings.

"The leg gave me inspiration to work that much harder," said Barasch.

"Just make that check payable to the dog food co."

Admittedly few dogs create financial emergencies like this! However, countless other occasions do arise that call for cash in a hurry. When this is your situation, this is your place to come . . . for quick cash on a low-cost loan . . . on easy-to-handle terms.

The most difficult puzzle in the world

Do you have a solution?

In high school, you may have thought you had the solution, only to have it vanish. In college, it may seem well within your grasp, only to vanish again. But this is not unusual. It's a very difficult puzzle.

The puzzle? How to find your life's work. The solution? It comes only with searching. It may be right under your nose or it may still be far away in the future.

But the solution will come. You will very probably find it in the work you undertake after college.

This has proved true many times at IBM. For instance, young engineers and scientists—after learning the scope of IBM activities in research, development and manufacturing—have found their interests leading them into such vital growth fields as microwaves, circuit design, solid state physics, magnetics and manufacturing research. Depending on individual talents and inclinations, a college graduate may acquire skills at IBM that lead to a variety of careers.

When a person is able to move into areas where his true interests lie, and when he has many areas to choose from, it will certainly be easier for him to find his life's work.

After all, it's easier to find the solution to The Most Difficult Puzzle in the World when you have access to all the clues.

IBM.

You are invited to investigate opportunities in Research, Development, Manufacturing, Programming, and other fields. Your Placement Director can tell you when our representatives will next visit your campus. Or you may write to: Manager of Technical Employment, Dept. 873, IBM Corporation, 590 Madison Avenue, New York 22, N. Y.
