Epstein Calls SGA 'Unrepresentative'

David Epstein, in his closing remarks as president of the Liberal Arts Student Council, characterized student government last night as "the most unrepresentative representative system ever created."

He said "professional alternates" could not be anybody's idea of representation.

Eighteen Accept Sorority Bids In Past Week

Eighteen women have received and accepted open bids from sororities in the past week.

A total of 25 coeds have pledged since the Panhellenic open bidding began March 11. Open bidding will continue until May.

The extending and answering of bids must be handled through the dean of women's office.

Women receiving bids must reply to Mrs. Mountain, who will notify the sororities.

The new ribbonees and the sororities they joined are:

Alpha Epsilon Phi: Arlene Port, Alpha Phi: Ann Desimone and Donna Sutin.

Beta Sigma Omicron: Anne Chenevski, Nancy McMinn, Sara Peterson and Nancy Turnbaugh.

Chi Lambda: Phyllis Mandelbaum and Sharon Rosenbaum.

Delta Delta Delta: Sandra Schrenker and Mary Vreeland.

Delta Zeta: Terry Shaffer and Alice VonSuck.

Sigma Sigma Sigma: Karin Miller.

Theta Phi Alpha: Phyllis Pack, Zeta Tau Alpha: Marcia Fuzimer, Mary Lou Haines and Marion Wetty.

Hu to Present Paper

Dr. I. W. Hu, associate professor of engineering mechanics, will present a paper on current research contributions in the field of plasticity at a symposium on plasticity sponsored by the Office of Naval Research and Brown University.

Epstein said that this year the council had neglected half of its responsibility by not participating in student government and urged the council to devote more interest in student government next year.

"I implore you," he told the council, "to maintain interest in student government and put back in a representative and responsible system."

He said he wanted to go back to the rule of two or three years when councils were leaders in student affairs.

Student councils have been cut off from student government, and the link between the students and student government has been cast aside, Epstein said.

In referring to the new student government system, he said he thought at first that assembly members would run for re-election and provide for a more experienced and responsible student government.

But he said that in looking over the candidates for this election he found only one candidate was running for re-election.

"Either the students are not interested in running again or the political parties don't want experience, but vote getters," Epstein said.

Math Honorary Meeting

Pi Mu Epsilon, the honorary mathematics fraternity, will hold an open meeting at 7:30 tonight in 12 Sparks.

Sr. Board Reduces Gift Suggestions

The Senior Class Advisory Board last night narrowed the suggestions for its class gift to seven.

These suggestions, which were taken from the 21 proposals advanced at last week's meeting of the board, will be presented to the Executive Committee of the Board of Trustees for approval.

Those suggestions that are approved by the Executive Committee will be voted on by seniors during Senior Week.

The gift suggestions are: a sign and monument for Beaver Field, an archway for Beaver Field, a memorial fountain for the lawn of Old Main, an archives room in the HUB extension to contain some things that are now in the Penn State Room of the HUB, books for the library, funds toward the construction of a new auditorium to be started in 1965.

Also offered was a plan for a combined gift which would include chimes for Old Main so school songs could be played and a revolving art exhibit.

The advisory board assigned some persons to check the cost and feasibility of these gift suggestions and report back at the next meeting on Tuesday.

A total of \$3900 is in the senior class gift fund. About \$1300 was collected at registration. The University promised to provide \$2 for every \$1 collected from the student body and donated the remaining \$2600.

Nuclear Society To Hear Rees

Donald R. Rees, general manager of the Saxton Nuclear Experimental Corp., will speak to the University chapter of the American Nuclear Society at 7:30 tonight in 119 Osmond.

The subject of the talk will be "The Saxton Nuclear Power Station." Rees will describe the design of the Saxton Station and discuss how it is to be used as a tool for the development of the nuclear power industry.

The University has recently become a participant in the Saxton Nuclear Experimental program and will take an active part in the experimentation and evaluation of data.

University Party--

(Continued from page one) felt that the extended women's hours could be put to better use if they remained open later.

The party also will advocate the following:

- Physical improvements of the campus, such as paving certain paths.
- A committee to study infirmary facilities because of student complaints.
- The seating of Block "S" Club members on the 50-yard line of Beaver Stadium.

Chem Prof Studies Radiation Effects

By JOEL MYERS

Dr. Erwin Muller, professor of chemistry and inventor of the world's most powerful microscope, is engaged in a study of the effects of radiation on various metal crystal structures.

Muller invented the most powerful microscope in the world, known as the inverted field ion microscope, in 1956.

This instrument, which is capable of 2 million times magnification, is a vast improvement on the electron microscope which was invented in 1936 and is only capable of magnification up to 200,000 times.

Muller's current research project consists of bombarding different metals with high speed electrons to see what effects these particles have on the internal structure of the metal. He is able to observe these changes as they occur by using this microscope.

According to Muller "any piece of metal exposed to radiation will have its crystal structure destroyed and hence the metal will become brittle."

The purpose of Muller's research is to discover the cause of the damage and the way in which it occurs.

Although other researchers are studying the same thing, Muller says that they are going about it by indirect means because they don't have the use of the ion microscope.

Muller claims that his microscope is the ultimate in magnification as far as power is concerned, but he points out that it has its limitations with regard to the material that is being studied.

One major drawback of his invention is the fact that it cannot be used with biological subjects.

Classes To Give Dance On April 8

The Freshman and Sophomore classes have combined to present the "Froshmore-Duo", an informal jam-session type dance to be held April 8, featuring Frieda Lee and two dance bands.

"The title of the dance symbolizes two classes, two bands and twice as much fun," said Morris Baker, co-chairman of the publicity committee for the dance.

The Ivy Rocks, a group well known among the fraternities, will play rock and roll. They will alternate with Howard Pearlloff and his Philadelphians who will play slow music. Frieda Lee, who sings at La Galleria, will act as mistress of ceremonies.

Patricia Dyer and James Kridel are the sophomore co-chairmen of the dance committee, and Louise Mitchell is the freshman chairman.

The other members of the committee are: Morris Baker and Earl Gershenow, publicity chairmen; Elvin Newhart, refreshment chairman; Herschel Richman, entertainment chairman; Betty Skade and Geraldine Jones, decoration chairmen; and Betsy Horn and Meg Teichholtz, ticket chairmen.

Tickets will be free to members of the freshman and sophomore classes and their dates, and will be on sale at the Hetzel Union desk the week before the dance. The dance will be held from 9 p.m. to midnight. Dress will be informal.
