

South Africa 'K' Hits Western Arms Plan; France Schedules New A-Test

JOHANNESBURG, South Africa (P) — South Africa's government beset by demonstrations against its segregation policies, declared a state of emergency yesterday and alerted its citizen defense force for mobilization.

The orders went out as more than 30,000 Negro demonstrators jamming the streets of Cape Town, the seat of South Africa's Parliament, emphasized the build-up of racial tension. Scattered violence flared in the countryside.

With armored cars circling the Parliament building, police with rifles guarding the entrances and street corners and a police helicopter circling overhead, Prime Minister Hendrik Verwoerd declared the situation was under control.

If 18 regiments of the citizens force now alerted cannot handle any disorders, he said, the regular army will be called in.

The Cape Town Negroes finally dispersed peacefully, but their sheer numbers made profound impressions.

Three million white persons control 10 million Negroes, nearly half a million Indians and more than a million coloreds—mixed bloods—in this nation, rigidly segregated according to racial complexion.

The dramatic events in Parliament came only a few hours after police had rounded up some white liberals and Negro, Indian and colored leaders to ward off what Verwoerd described earlier as "a massive revolt." More than 150 were reported arrested.

Floods Drive Thousands From Midwest Homes

BY THE ASSOCIATED PRESS
Flood danger and damage spread rapidly yesterday while the number of homeless mounted into the thousands.

Heavy rains beat down in the eastern half of the country and poured into streams as far east as New York State.

The Red Cross estimated 4000 persons have been forced out of their homes in Nebraska, Iowa, South Dakota, Kansas and Missouri. High water trouble reached into areas in other states.

ROUEN, France (P) — Soviet Premier Nikita Khrushchev criticized the West's disarmament plan yesterday at about the time his French hosts announced they may be about to set off another atomic blast.

While unaware of the French announcement at the time he was making his remarks about disarmament at a news conference, the touring Soviet leader said he disapproved of any further atomic tests by France or anyone else.

The French government sent warnings to airlines that the Sahara will be generally off limits to all flights beginning early today.

France's first test Feb. 13 was preceded by several similar announcements that were only often in bubbling spirits as he drills. The present alert also may be a drill since the French had indicated they will hold off further tests while Khrushchev is here.

The announcement emphasized on the eve of renewed talks between Khrushchev and French President Charles de Gaulle that France is an atomic power and intends to go on testing until there is an acceptable disarmament agreement.

Khrushchev was sprightly and often in bubbling spirits as he train that brought him here from Lille. He seemed tired at Lille.

Russians To Get Plan

GENEVA (P) — A new nuclear test ban plan tailored by President Eisenhower and British Prime Minister Harold Macmillan will be handed to the Russians today. Soviet reaction is uncertain.

Western sources said yesterday the United States and Britain will challenge the Soviet Union to remove all remaining obstacles to a partial nuclear test ban treaty.

Public Affairs Program

CORRY, Pa. (P)—A two-year program designed to promote interest in public affairs was launched here Tuesday night.

Seniors — find out what Kearfott's flexible training program offers You

Check the experiences of four '59 graduates at Kearfott

JAMES KEATING
Villanova University '59

Not at all sure of the area of engineering (development, design, test, manufacturing) which would interest him most, Jim has been most impressed by the way Kearfott Project Engineers STAY WITH A PROJECT from study phase right through to production, assuming full technical and financial responsibility for the quality and salability (price-wise) of the finished hardware. He finds that this Kearfott philosophy enables him to operate across the broad spectrum of engineering... Coming from out-of-town, Jim was also pleasantly surprised by the wide choice of living quarters readily available.

STANLEY WALLERSTEIN
Ohio University '59

The very advanced nature of many Kearfott projects fired this engineer's imagination. He joined the Electronics Systems Lab, where he worked on the development of a tiny counter—part of what is believed to be the most accurate test equipment yet devised for missile guidance systems. After exposure to the diversity of the projects in the Systems Lab, Stan has decided to look no further, but requested permanent assignment here, where work ranges over space navigation, digital computers, guidance systems, solid state physics, industrial automation systems and diverse electronic systems.

LENNART G. JOHANSSON
Lafayette College '59

Len is pleased with his six months' experience at Kearfott on two widely different counts. First is the combination of both theoretical and practical know-how he has gained in a field that has fascinated him for a long time—transistor applications. The other is Kearfott's location. Finding midtown New York only 40 minutes away by car, Len, a veteran, is planning to continue his studies for an MS at one of the many colleges in the New York/New Jersey area: Columbia, N.Y.U., Stevens, Newark College of Engineering are all close by. This semester, Len has enrolled for two Kearfott sponsored courses taught at the plant.

GARY WOERNER
Newark College of Engineering '59

Gary has worked by choice in two Laboratories since he joined Kearfott last June—Astronautics and Electronics. He values the opportunity he had to work in direct contact with senior engineers and scientists who have played a leading role in developing the Kearfott inertial systems and components which have been selected for application in over 80 aircraft and 16 major missile systems. Gary now leans to the choice of a permanent assignment in the Electronics Lab but has decided to work a few months in the advanced Gyrodynamics Division, before coming to a decision.

Opportunities at Kearfott are expanding

Long occupying a unique position in the fields of electronics and electro-mechanical components and precision instrumentation, Kearfott—in recent years—has moved more and more into the development of complete systems. This has led to major staff expansion at all levels, including a sizable number of positions for recent graduates in all 4 major company units:

- The Systems Division
- The Gyrodynamics Division
- The Electro-Mechanical Division
- The Precision Component Division

Through its flexible TRAINING PROGRAM, Kearfott offers young engineers freedom to explore the field, before selecting the broad area best fulfilling individual interests. Remarkable rapid professional advancement is possible—and likely—through the PROMOTION BY MERIT POLICY. For detailed information, see the Kearfott representative on campus.
