# March Breaks Boro Cold Wave Record

Despite a pronounced upward trend in temperature during the last five days of the month, March 1960 will go into the record books as the coldest March ever observed in this area.

The temperature averaged 26 degrees during the month as compared to the normal 36 degrees. The old record of 28 degrees was established in 1888 and was tied in 1896 and again in 1916.

The warmest March ever noted in this area occurred in 1945 when the temperature averaged a mild 49 degrees.

March 1960 was also the sixth snowiest March ever observed in this area. The total fall was 19.5 inches as compared to a normal of 9.1 inches.

Even with its numerous snowfalls, this month fell far short of the all-time March snowfall record of 47.5 inches that was established in 1942. The biggest snow storm ever seen in this area occurred March 29-30 of that year when 30.5 inches fell.

The upper air weather pattern that became well established in the second week of February continued to hold sway through most of March. This weather regime kept a continuous flow of cold

arctic air feeding into Pennsylvania from Canada.

During the last week of March the upper air pattern began to shift to a more spring-like type and a definite warming trend was noted. It is reasonable to assume that this trend will continue, and so one of the most fierce winter seasons in recent years appears to be over.

### Koons Claims--

(Continued from page eight) with violating a borough ordinance last Monday night.

Twenty-six of the students pleaded guilty to the charge and were fined a total of \$34. Two students failed to appear and had their hearings rescheduled.

Koons, however, changed his plea from guilty to not guilty and he was granted a separate hearing, the date and time of which is to be announced this week.

## Student to Join Ice Capades For '61 Season

William K. Kieffer, graduate student from Wayne, has signed a contract with the Ice Capades. He will start in July when the show begins rehearsals in Atlantic City for the 1961 season.

Beginning in September the show will tour the major cities in the United States. Kieffer also has an option in his contract to perform with the show in Europe.

Kieffer is a member of the Penn State Figure Skating Club. He was largely responsible for the organization of the club and has contributed to the instruction offered.

The club will meet at 7 tonight in 112 Buckhout.

A discussion of next season's program will be conducted at the meeting. A committee recommendation to devise a program to encourage the instruction, practice and advancement of techniques will be discussed.

Possible affiliation with the United States Figure Skating Association and the possibility of organizing a Skate Exchange for younger members will also be considered at the meeting.

### Picketing--

(Continued from page five) time. "We will maintain the picketing for as long as we feel it demonstrates our moral convictions on the matter of segregation," Blum said.

The picketing, which had halted March 28 after three days to allow "discussion between Bunn and the picketers to continue in a more free and relaxed environment," is being conducted by a group composed of members who have all signed an agreement "to be non-violent in word and deed."

### Comments on Froth--

(Continued from page five) not wish to make statements in the midst of "a heated political campaign" in view of the positions they hold as advisors to the SGA Assembly.

Michael Hazel and Henry Opperman, co-chairmen of University Party, said, "Elms has made some of the most absurd charges ever to have been brought before the student body." In answer to these charges, the chairmen said they hope the students are more intelligent than Elms.

## + CLASSIFIEDS +

### FOR SALE

POTTED PLANTS beautify a window or the interior of a room. Why not select several plants for your suites or dorm from a large variety priced as low as 19¢ from O. W. Houts & Son, Inc., State College.

PAINTING COMES easier when using quality Grumbacher Art Supplies. Everything for the artist. 6% cash and carry discount. Save today at O. W. Houts & Son, Inc., State College.

ONE BEDROOM trailer, good condition, porch with roof, utility shed, thermostatically controlled heat. August graduate. Phone AD 8-0088.

1955 THUNDERBIRD, red body, two black tops, automatic transmission—\$1850. Car can be seen at extreme NW corner of lot No. 83 Will consider trade. Call George at UN 6-7800 or UN 5-5861.

STUPENDOUS 3-PIECE Hi-Fi. Also: bicycle \$15. Also: Royal Portable typewriter, almost brand new. Mike AD 7-2196.

YOUR CHOICE of any classical LP in a collection of 200. Recommended by Good Housekeeping, \$2.00 each. 137 N. Atherton Street, third floor.

ELECTRIC STOVE for sale. Good condition. Call AD 8-1170.

ENROLL NOW for ballroom dancing, tap, toe or acrobatic lessons. Professional School of Dance. AD 8-1078.

ENROLL NOW for ballroom dancing, tap, toe or acrobatic lessons. Professional School of Dance. AD 8-1078.

### ENGINEERS • SCIENTISTS

## BRIDGING THE GAP

...from components, equipments, and subsystems to fully integrated, large-scale systems

Air defense missiles, unmanned interceptors, manned interceptors, early warning aircraft, long-range radar, gap filler radar, Texas towers, vast communication nets, high-speed computers and advanced information display devices are a few of the integral parts in an air defense system. Each of these has its individual operational characteristics and it is the responsibility of The MITRE Corporation to provide the basic system engineering and design necessary to integrate these many diverse and complex parts into a mutually compatible, fully-integrated air defense system.

Formed under sponsorship of the Massachusetts Institute of Technology, MITRE employs the skills of engineers, mathematicians, physicists and psychologists on large-scale system projects ranging from design through prototype engineering and subsystem development to test and evaluation of the total on-line system. The growing scope of MITRE's technological effort affords the opportunity to establish a rewarding professional career in one of these areas of long-term importance:

- Component Research • Advanced System Design
- System Test and Evaluation • Computer Programming
- Human Engineering • Radar Systems and Techniques
- Subsystem Development • Communications
  - Air Traffic Control Systems

## CAMPUS INTERVIEWS

Friday, April 8  
Please Contact  
Your Placement Director for Appointment

244 WOOD STREET — LEXINGTON 73, MASSACHUSETTS

A brochure more fully describing MITRE and its activities is available upon request.
