

Violators Dismissed By Judicial

The Judicial Board of the Women's Student Government Association handed down no penalties yesterday in the cases of the women students convicted of violating a local ordinance in connection with the March 18 raid at LaGalleria.

In reviewing the cases the Board also voted not to have the cases placed on the women's permanent record cards.

The board ruled that the girls were not adequately informed of the borough ordinance and have already suffered unduly because of the incident, Joan Beidler, acting chairman of the board said.

The board voted to send letters to the Borough Chief of Police, Borough Council and the State Liquor Control Board, recommending that a copy of this ordinance be posted in all local establishments which serve alcoholic beverages, Miss Beidler said.

State and local laws concerning drinking and visiting establishments which serve liquor will be explained as part of the Freshmen Orientation Program next fall, Dorothy J. Lipp, dean of women said.

Dean Lipp also said she plans to recommend that a printed circular explaining these regulations be placed in the mailboxes of all upperclass women at the beginning of each academic year.

In other business, Miss Beidler announced requests for late hour permissions should be turned into the Dean of Women's office in care of Miss Lois McCulloch one week in advance of the Tuesday Judicial Board meetings.

The requests should include reasons for the request, the name of the applicant, her phone and room number and the name of her residence hall hostess, Miss Beidler said.

Voting to End Today

Voting for SGA officers, class presidents and class representatives will end today.

The polls in the Hetzel Union Building will be open until 7 p.m. Voting in Sackett, Forestry, Boucke and Sparks will end at 5 p.m.

SGA ELECTIONS . . . Robert Cararie, freshman in engineering from Chicora, casts his vote as Elections commission members Pat Gardner, sophomore in liberal arts from Glenshaw, and Floyd Greer, junior in business administration from Coraopolis, look on.

Gamma Phi, TKE Place 1st in IFC Sing

Gamma Phi Beta and Tau Kappa Epsilon won top honors in the Ninth Annual Interfraternity-Panhellenic Sing last night.

Pi Beta Phi and Tau Kappa Epsilon won first place in the quartet division.

James Jimmiro, Beta Theta Pi graduate student, was master of ceremonies for the finals which were held in Schwab Auditorium.

Second place in the group contest went to Alpha Xi Delta and Pi Kappa Phi. Delta Delta Delta and Acacia won third place honors, and Alpha Delta Pi and Phi Gamma Delta came in fourth.

Kappa Kappa Gamma and Theta Chi won second place in the quartet finals, while Kappa Alpha Theta and Alpha Kappa Lambda came in third. Alpha Xi Delta and Acacia won fourth place in the quartet division.

Each fraternity group sang one number of its own choice in addition to the required number, "Halls of Ivy." The required sorority number was "September Song."

Cold Will Continue; Flurries Expected

A rapid change in the overall weather pattern brought a return of cold weather to this area yesterday.

The cold weather will continue today and there is a chance of a few brief snow flurries. Today's high will be near 46 degrees.

Fair and cold weather should continue tonight with temperatures dipping to the freezing mark.

Mostly cloudy and slightly warmer weather is due tomorrow with a chance of a few showers during the afternoon.

Windy and colder temperatures are predicted for tomorrow night.

'K's' Disarm Plan Rejected by West

GENEVA (AP) — The West rejected the Khrushchev total disarmament plan yesterday as too formless and dangerous to provide a basis for negotiation.

The action deadlocked the 10-nation conference on disarmament since the Soviet Union previously turned down the West's plan for gradual disarming. The next move appears to be up to Moscow. Western sources suggested the Soviets have these alternatives:

- They can change tack quickly and begin discussing concrete disarmament proposals along the lines suggested in the Western plan.
- They can wait for new directives to emerge from the summit conference opening in Paris May 16.
- Or they can even keep the negotiations frozen until the next United Nations General Assembly meeting in New York next autumn.

The Western delegations are prepared to keep on talking as long as the Soviets wish. The West's rejection was announced by U.S. Ambassador Frederick M. Eaton and French disarmament expert Jules Moch.

Eaton said the Soviet plan was so formless it threatened the world with anarchy. With no provision for an international police force, Eaton declared the Soviet plan would result "in the enslavement of small nations by their large neighbors."

"We cannot accept as a basis for discussion the Soviet plan or any text resembling it," Moch declared.

Informants said the delegations from the United States, Britain, France, Italy and Canada have concluded Soviet Deputy Foreign Minister Valerian A. Zorin came to Geneva without any precise plan at all. He arrived merely with the generalities of the total disarmament plan Premier Nikita Khrushchev put forward at the U.N. last fall.

His answers to questions reveal he lacks a detailed draft treaty in his briefcase, Western sources said.

Borough To Deputize 3 Patrolmen

At least three campus patrolmen will be deputized as special borough policemen within the next week, Burgess Roy D. Anthony said at the State College Borough Council meeting.

Since Anthony's statement Monday night, there has been some question as to the legality of this move. The problem hinges upon the question of whether the University is part of the Borough of State College.

Anthony said County Judge Paul R. Campbell has given his opinion that the University is part of the Borough, and that the deputizing would be legal.

Col. Lucien E. Bolduc, chief of the Campus Patrol, said yesterday he had checked the decisions of the University solicitors in the past, and that none of them ever considered the University as part of the Borough.

Borough solicitor Robert R. Kistler said he believes the University is within the Borough, but that it is a special case because of its status as a non-profit institution and its close ties with the state government.

Bellefonte Jury Convicts Physics Grad Student

Rama Mohanty, graduate student in physics from State College, was yesterday found guilty by a Bellefonte jury of failing to reveal his identity at the scene of an accident.

Fund Drive Planned By 'Picket' Group

By MEG TEICHHOLTZ

The anti-segregation group, which resumed their picketing of Bunn's Barber Shop at 110 S. Allen St. yesterday, is organizing a fund drive set for April 24 through 29.

Mrs. Peter Day, co-chairman of the drive, will meet with Robert G. Bernreuter, special assistant to the president on student affairs, on Friday to get final approval on details of the plan.

As the plan stands now, money raised would be used to pay for legal defense of persons arrested during non-violent anti-segregation demonstrations in the South. In addition, the funds would help encourage participation in programs and conferences designed to increase anti-segregation demonstrations.

The program for the drive will include a series of speakers from local groups who will talk on the issue of segregation the weekend preceding the drive. A definite listing of speakers has not been decided.

The organizers of this movement plan to find one local group, probably with church affiliation, to be their main sponsor. They will then seek both student and community groups to be endors-

ers. Organizations interested in supporting the drive may contact Regina Olvis, on campus, or Mrs. Day.

Steven Blum, chairman of the anti-segregation movement in State College, today reaffirmed his conviction that the group is "sincerely interested in ascertaining the opinion of the townspeople on the picketing of Bunn's Shop."

With this aim the group has scheduled a meeting for tomorrow night with town leaders and officials at the Bela Schlow Memorial Library.

Bunn, when contacted by the Collegian yesterday, declined to comment on the current situation. The leaders of the group plan to continue their "non-violent" demonstration for as long as this action is deemed necessary, Blum said.

Giant Projectors

TV Tests Considered

By NICKI WOLFORD

The University may become the first in the world to experiment with a brand new type of television projector which produces black and white pictures up to 24 by 34 feet in size.

Dr. Clarence R. Carpenter, head of the Division of Academic Research and Services, said that Felton Davis, Jr., of Eidophor Inc., had contacted the University about using the recently perfected projector called Eidophor.

However, Carpenter explained that the University had not made any agreement with the corporation about experimenting with the projector.

The new projector is based on the control layer process, in which electrical impulses from the camera control an electron

beam which bombards and thus modifies the surface of a film of oil in a concave mirror. Light passing through the resulting wrinkles in the oil film is projected through a special grating onto the screen.

Carpenter said that if the new projector were used in the educational television experiments here, "it should not just be used to test learning from a professor standing before a class."

He said the new system might be used for a biology course where the showing of many details is very important. Then, he said, the informational learning of those students under the new system could be compared with the informational learning of students in the regular television sections.

The new projector could also be placed where it might handle the overflow of people from events held in Schwab Auditorium or Recreation Hall, Carpenter said. Eidophor can project a colored

image up to 12 by 16 feet. But Carpenter explained that the University's originating equipment can be used only for black and white pictures and the sharpness of detail is not as good in the colored image.

Eidophor (pronounced EYE-doh-for) was developed by Dr. Edgar Gretener A. G. of Zurich, Switzerland. His firm was backed by CIBA Pharmaceutical Products, Inc.

The control layer system of television projection was invented in 1939 by Dr. Fritz Fischer at the Swiss Federal Institute of Technology in Zurich.

The first public demonstration of Eidophor was at a 1959 meeting of the American Association for the Advancement of Science. The audience which viewed a demonstration of scientific experiments being projected like by Eidophor numbered approximately 2400.
