COLLEGE: THE FOE OF EDUCATION

In your quest for a college degree, are you becoming a narrow specialist, or are you being educated in the broad, classical sense of the word? This question is being asked today by many serious people-including my barber, my podiatrist, and my little dog Spot - and it would be well to seek an answer.

Let us examine our souls. Are we becoming experts only in the confined area of our majors, or does our knowledge range far and wide. Do we, for example, know who fought in the battle of Salarus, or Kant's epistemology, or Planck's constant, or the voyage of the Beagle, or Palestrina's cantatas, or what Wordsworth was doing ten indes above Tintern Abbey?

If we do not, we are turning, alas, into specialists. What, then, can we do to escape this strait jacket, to broaden our vistas, lengthen our horizons, to become, in short, educated?

Well sir, the first thing we must do is throw away our curricula. Tomorrow, instead of going to the same old classes, let us try something new. Let us think of college, not as a rigid discipline, but as a kind of vast smorgasbord, with all kinds of tempting intellectual tulbits to sample and savor. Let us dive in. Let our pent-up appetites roam and snatch where they will.

We will start the day with a stimulating seminar in Hittite artifacts. Then we will go over to marine biology and spend a happy hour with the mollusks. Then we will open our pores by drilling with the ROTC for a spell. Then we'll go over to journalism and scramble a font of Bodoni. Then we'll go to the medical school and palpate a few spleens. Then we'll go to home economics and have lunch

And between classes we'll smoke Marlboro Cigarettes. This, let me emphasize, is not an added fillip to the broadening of our education, it is an essential. To learn to live richly and well is an important part of education, and Matlboros are an important part of hying richly and well. Do you think flavor went out when filters came in Well, ha-ha, the joke is on you. Marlboro, with its Selectrate filter, delivers flavor in full measure, flavor without stift or compromise, flavor that wrinkled care derides, flavor holding both its sides. This triumph of the tobacconist's art comes to you in soft pack or flip-top box and can be lighted with match, lighter, candle, Welsbach mantle, or by rubbing two small Indians together.

When we have embarked on this new regimen-or, more accurately, lack of regimen -- we will soon be studded with culture like a ham with cloves. When strangers accost us on the street and say, "What was Wordsworth doing ten miles above Tintern Abbey?" we will no longer slink away in silent abashment. We will reply loud and clear

"As any truly educated person knows, Wordsworth, Shelley, and Kents used to go the Widdicombe Fair every year for the poetry-writing contests and three-legged races, both of which they enjoyed wildly. Well sir, imagine their chagrin when they arrived at the Fair in 1776 and learned that Oliver Cromwell. Jittery because Guy Fawkes had just invented the spinning jenny, had canceled all public gatherings, including the Widdicombe Fair and Liverpool. Shelley was so apset that he drowned hunself in the Bay of Naples, Keats went to London and became Samuel Johnson, and Wordsworth ran blindly into the forest until he collapsed in a heap ten miles above Tintern Abbey. There he lay for several years, sobbing and kicking his little fat legs At length, peace returned to him. He composed hunself and, noticing for the first time the beauty of the forest around him, he wrote Joyce Kilmer's immortal Trees . . . And that, smartypants, is what Wordsworth was doing ten miles above Tintern Abbey."

Poets and peasants alike know that if you like mildness but you don't like filters, you can't do better than Marlboro's companion cigarette—Philip Morris.
